

Contents

Chapter 1 Research methodology	1
1.1 Motivation and main focus	1
1.2 Research questions	4
1.3 Objectives.....	5
1.4 Process and milestones	6
1.5 Research tools	7
1.5.1 Analysis and review of existing joining techniques	7
1.5.2 Global structural FEM analysis.....	10
1.5.3 Case studies: aspects and research tools	10
Literature	13
 Chapter 2 Joining techniques - State of the art.....	 15
2.1 Groundwork	16
2.1.1 Collection of reference projects and studies	17
2.1.2 A brief introduction to paper-based products.....	20
2.1.2.1 Features & observations derived from existing studies.....	24
Material characterization	24
Investigations on lightweight hollow products	26
2.2 Joining techniques for paper-based assemblies	27
2.2.1 The architecture of the review.....	27
2.2.1.1 Joining techniques for paper-based assemblies prior to this research	27
2.2.1.2 Framing the review of joining principles & techniques	28
2.2.2 Basic joining techniques	31
2.2.3 Joining techniques specialized on boards.....	37
2.2.3.1 Construction details.....	40
2.2.4 Joining techniques specialized on profiles	45
2.2.4.1 Joining techniques for paper-based tubes	45
Basic techniques	47
Hybrid techniques and intermediate joints.....	50
Light timber nodes.....	50
Massive wooden nodes	53
Steel nodes.....	57
3d printed nodes	64
Concrete nodes	65
2.2.4.2 Assembling L, U & square paperboard profiles.....	65
2.2.5 Further types of specialized joining techniques	68

2.2.6 Summary	68
Literature	68
2.3 Joining techniques in common construction materials.....	71
2.3.1 Timber.....	72
Summary	82
Literature.....	84
2.3.2 Bamboo	85
Summary	97
Literature.....	98
2.3.3 Textiles and composites	99
2.3.3.1 Textiles.....	100
2.3.3.2 Synthetic composites.....	104
Summary	107
Literature.....	108
2.3.4 Steel	109
Summary	114
Literature.....	114
2.4 Global overview of joining techniques for paper structures	115
2.4.1 Summary of findings per material category	116
2.4.2 Global overview of joining techniques	119
Epilogue for the ‘state of the art’ and direction of the research following.....	127
Literature	128
 Chapter 3 Global structural analysis	 131
3.1 An introduction to paper structures	132
3.1.1 Construction typologies	132
3.1.2 Paper tubes as a construction material	139
3.1.3 Construction outlines and typical cases	141
3.2 Global FEM analysis.....	145
3.2.1 Guidelines for the FEM analysis.....	146
3.2.2 Orthogonal grid beam-structure	148
3.2.3 Truss structure.....	156
3.2.4 Dome beam-structure	159
3.3 Summary	162
3.3.1 Observations on the global structural analysis	162
3.3.2 Selection of specific context for the case studies	163
Literature	165

Chapter 4 Case studies	167
Guidelines	168
4.1 Design concepts and selection of case studies.....	170
4.1.1 Design concepts	170
4.1.2 Selection of case studies	172
4.2 Case studies.....	175
Guidelines for the elaboration of case studies.....	175
Development of the design	175
Prototyping.....	175
Experimental structural testing	176
Guidelines for the bending tests	177
Processing the results from structural testing.....	179
Structural behaviour of paper-tube.....	180
Local FEM Analysis	183
Stress analysis of multi-axial nodes.....	183
Stress analysis of linear configurations.....	184
Literature.....	185
4.2.1 Plug-in joints.....	186
4.2.1.1 Timber plate puzzle node.....	187
Characteristic joining method	188
Detailing alternatives	189
Assembly techniques	191
Production and prototyping	192
Structural testing.....	196
Testing configuration 1	198
Testing configuration 2	203
Testing configuration 3.....	207
Testing the limits of the screws	212
Local FEM Analysis	214
Summary.....	224
Literature	226
4.2.1.2 Timber block node	227
Characteristic joining method	228
Detailing alternatives	229
Assembly techniques	229
Production and prototyping	230
Structural testing.....	233
Testing configuration 1	233
Testing configuration 2	237
Local FEM Analysis	243

- Summary 251
 - Literature 253
- 4.2.1.3 Tolerance adaptive joint 254
 - Characteristic joining method 255
 - Detailing alternatives 256
 - Assembly techniques 256
 - Production and prototyping 256
 - Structural testing 258
 - Summary 259
- 4.2.2 Sleeve joints 260
 - 4.2.2.1 Fiber reinforced pulp-composite connector 261
 - Characteristic joining method 262
 - Detailing alternatives 263
 - Assembly techniques 264
 - Production and prototyping 265
 - Structural testing 268
 - Summary 273
 - Literature 273
 - Acknowledgments 273
 - 4.2.2.2 Textile-reinforced epoxy resin laminated joint 274
 - Characteristic joining method 275
 - Detailing alternatives 276
 - Assembly techniques 276
 - Production and prototyping 277
 - Structural testing 280
 - Testing configuration 1 280
 - Testing configuration 2 284
 - Local FEM Analysis 288
 - Summary 294
 - Literature 294
- 4.3 Evaluation of case studies 295**
 - 4.3.1 Design aspects 296
 - 4.3.2 Structural Performance 303
 - Summary 315

Chapter 5 | Global observations 317

5.1 Research questions and findings 318

5.2 Reflection 331

 5.2.1 Outlook 331

 5.2.2 Research, teaching and tutoring 332

 5.2.3 Epilogue 332

Literature 333

Chapter 6 | Appendix..... 334

6.1 ‘House 1’ – Connections 334

6.2 Preliminary Experimental Bending Tests 334

6.3 ‘Branch-out’ Pavilion..... 339

6.4 Research within education 340

 6.4.1 Supervised Theses and Projects 340

 6.4.1.1 Investigations of joining techniques for paper tubes used as beams in
 framework..... 340

 6.4.1.2 Development of a paper structure for ‘glasstec2018’. Design, dimen-
 sioning and construction execution..... 341

 6.4.1.3 Natural fiber composite joining techniques for paper tubes..... 342

 6.4.2 Educational modules 343

 6.4.2.1 ‘Experimental Façade Technology 1’ 343

 6.4.2.2 ‘Experimental Façade Technology 2’ 344

 6.4.2.3 IPBU- ‘Paper Bridge’..... 345

6.5 List of figures, tables and graphs 347

 6.5.1 List of figures..... 347

 6.5.2 List of graphs 353

 6.5.3 List of tables..... 354
