

Contents

Chapter 1

Introduction — 1

- 1.1 Catalysis — 1
- 1.2 Reaction chemistry — 2
- 1.3 Catalyst production — 2
- 1.4 Catalyst fate — 3
- References — 4

Chapter 2

Homogeneous catalysis — 7

- 2.1 Introduction — 7
- 2.2 Advantages of a homogeneous system — 8
 - 2.2.1 Reaction chemistry — 8
 - 2.2.2 Catalyst production — 8
- 2.3 Catalyst fate — 9

Chapter 3

Heterogeneous catalysis — 11

- 3.1 Introduction — 11
- 3.2 Reaction chemistry — 11
- 3.3 Catalyst production — 12
- 3.4 Catalyst fate — 13
- References — 13

Chapter 4

Acrylics — 15

- 4.1 Introduction — 15
- 4.2 Reaction chemistry — 15
- 4.3 Catalyst production — 16
 - 4.3.1 Potassium persulfate — 16
 - 4.3.2 Iron (II) sulfate pentahydrate — 16
- 4.4 Catalyst fate — 17
- References — 17

Chapter 5

Adipic acid — 19

- 5.1 Introduction — 19
- 5.2 Catalyst production — 19
- 5.3 Catalyst fate — 20
- References — 21

Chapter 6

Ammonia — 23

- 6.1 Introduction — 23
- 6.2 Reaction chemistry — 23
- 6.3 Catalyst production — 24
- 6.4 Catalyst fate — 25
- References — 25

Chapter 7

Ammonium sulfate — 27

- 7.1 Introduction — 27
- 7.2 Reaction chemistry — 27
- 7.3 Catalyst production — 27
- 7.4 Catalyst fate — 28
- References — 28

Chapter 8

Benzene, toluene, xylene (BTX) — 29

- 8.1 Introduction — 29
- 8.2 Reaction chemistry — 30
- 8.3 Catalyst production — 30
- 8.3.1 Aluminum oxide, aka alumina, aka aluminum (III) oxide — 31
- 8.4 Catalyst fate — 31
- References — 32

Chapter 9

Butadiene — 33

- 9.1 Introduction — 33
- 9.2 Reaction chemistry — 33
- 9.3 Catalyst production — 34
- 9.3.1 Chromium (III) oxide, aka chromia — 34
- 9.3.2 Aluminum oxide, aka alumina, or aluminum (III) oxide — 34
- 9.4 Catalyst fate — 35
- References — 35

Chapter 10

Caprolactam — 37

- 10.1 Introduction — 37
- 10.2 Reaction chemistry — 38
- 10.3 Catalyst production — 38
- 10.4 Catalyst fate — 38
- Reference — 38

Chapter 11**Chlorine — 39**

- 11.1 Introduction — 39
- 11.2 Reaction chemistry — 39
- 11.3 Catalyst production — 40
- 11.4 Catalyst fate — 40
- References — 41

Chapter 12**Cumene — 43**

- 12.1 Introduction — 43
- 12.2 Reaction chemistry — 43
- 12.3 Catalyst production — 44
 - 12.3.1 Aluminum chloride — 44
 - 12.3.2 Phosphoric acid — 44
- 12.4 Catalyst fate — 45
- References — 45

Chapter 13**Cyclohexane — 47**

- 13.1 Introduction — 47
- 13.2 Reaction chemistry — 48
- 13.3 Catalyst production — 48
- 13.4 Catalyst fate — 49
- References — 50

Chapter 14**Ethanol — 51**

- 14.1 Introduction — 51
- 14.2 Reaction chemistry — 51
 - 14.2.1 From starches — 51
 - 14.2.2 From ethylene — 52
- 14.3 Catalyst production — 53
 - 14.3.1 Yeasts — 53
 - 14.3.2 Phosphoric acid — 53
 - 14.3.3 Silica — 54
 - 14.3.4 Diatomaceous earth — 54
- 14.4 Catalyst fate — 55
- References — 55

Chapter 15

Ethylene — 57

- 15.1 Introduction — 57
- 15.2 Reaction chemistry — 57
- 15.3 Catalyst production — 57
- 15.3.1 Aluminum oxide — 57
- 15.4 Catalyst fate — 58
- References — 58

Chapter 16

Ethylene dichloride — 59

- 16.1 Introduction — 59
- 16.2 Reaction chemistry — 59
- 16.3 Catalyst production — 60
- 16.3.1 Iron (III) chloride – FeCl_3 , aka ferric chloride — 60
- 16.3.2 Copper (II) chloride – CuCl_2 — 61
- 16.4 Catalyst fate — 61
- References — 62

Chapter 17

Ethylene glycol — 63

- 17.1 Introduction — 63
- 17.2 Reaction chemistry — 64
- 17.3 Catalyst production — 64
- 17.3.1 Silver (I) oxide — 64
- 17.4 Catalyst fate — 64
- References — 65

Chapter 18

Ethylene oxide — 67

- 18.1 Introduction — 67
- 18.2 Reaction chemistry — 67
- 18.3 Catalyst production — 68
- 18.3.1 Silver (I) oxide — 68
- 18.4 Catalyst fate — 68
- References — 69

Chapter 19

Formaldehyde — 71

- 19.1 Introduction — 71
- 19.2 Reaction chemistry — 72
- 19.3 Catalyst production — 72

- 19.3.1 Silver — 72
- 19.3.2 Iron oxide with molybdenum and/or vanadium — 74
- 19.4 Catalyst fate — 74
- References — 75

Chapter 20

Hydrogen — 77

- 20.1 Introduction — 77
- 20.2 Reaction chemistry — 77
- 20.3 Catalyst production — 78
- 20.4 Catalyst fate — 78
- References — 78

Chapter 21

Hydrogen peroxide — 79

- 21.1 Introduction — 79
- 21.2 Reaction chemistry — 80
- 21.3 Catalyst production — 81
- 21.4 Catalyst fate — 82
- References — 82

Chapter 22

Isopropanol — 83

- 22.1 Introduction — 83
- 22.2 Reaction chemistry — 83
- 22.3 Catalyst production — 84
- 22.3.1 Phosphoric acid — 84
- 22.3.2 Tungsten catalyst — 84
- 22.3.3 Raney nickel — 85
- 22.4 Catalyst fate — 85
- References — 85

Chapter 23

Linear alpha olefins — 87

- 23.1 Introduction — 87
- 23.2 Reaction chemistry — 87
- 23.3 Catalyst production — 88
- 23.3.1 The Ineos process — 88
- 23.3.2 The Gulf process — 89
- 23.3.3 SHOP — 89
- 23.3.4 Chevron Phillips — 89
- 23.3.5 Idemitsu — 89

- 23.3.6 Exxon research and engineering — **90**
- 23.3.7 DuPont — **90**
- 23.3.8 IHS — **90**
- 23.4 Catalyst fate — **91**
- References — **91**

Chapter 24

Methanol — 93

- 24.1 Introduction — **93**
- 24.2 Reaction chemistry — **93**
- 24.3 Catalyst production — **94**
- 24.4 Catalyst fate — **94**
- References — **94**

Chapter 25

Nitric acid — 95

- 25.1 Introduction — **95**
- 25.2 Reaction chemistry — **95**
- 25.3 Catalyst production — **96**
- 25.4 Catalyst fate — **97**
- References — **97**

Chapter 26

Nylon — 99

- 26.1 Introduction — **99**
- 26.1.1 Types of nylon — **99**
- 26.2 Reaction chemistry — **100**
- 26.3 Catalyst production — **100**
- 26.3.1 With dinitriles — **100**
- 26.3.2 Other acids — **101**
- 26.4 Catalyst fate — **101**
- References — **101**

Chapter 27

Phenol — 103

- 27.1 Introduction — **103**
- 27.2 Reaction chemistry — **103**
- 27.2.1 The cumene process — **104**
- 27.2.2 Other methods of phenol production — **104**

27.3	Catalyst production —	104
27.4	Catalyst fate —	105
	References —	105

Chapter 28

Phosgene — 107

28.1	Introduction —	107
28.2	Reaction chemistry —	108
28.3	Catalyst production —	108
28.4	Catalyst fate —	108
	References —	109

Chapter 29

Polycarbonate — 111

29.1	Introduction —	111
29.2	Reaction chemistry —	112
29.3	Catalyst production —	112
29.3.1	Titanium catalyst —	112
29.3.2	Zinc glutarate —	112
29.4	Catalyst fate —	113
	References —	113

Chapter 30

Polyester, polyethylene terephthalate (PETE) — 115

30.1	Introduction —	115
30.2	Reaction chemistry —	116
30.3	Catalyst production —	117
30.3.1	Antimony trioxide (Sb_2O_3 , aka antimony (III) oxide) —	117
30.3.2	Antimony triacetate ($\text{Sb}(\text{C}_2\text{H}_3\text{O}_2)_3$) —	118
30.3.3	Titanium dioxide (TiO_2) —	118
30.3.4	Germanium dioxide (GeO_2) —	118
30.4	Catalyst fate —	119
	References —	119

Chapter 31

Polyethylene — 121

31.1	Introduction —	121
31.2	Reaction chemistry —	122
31.3	Catalyst production —	123
31.3.1	SiO_2 – silica —	123
31.3.2	Ziegler–Natta catalysts —	123
31.3.3	Titanium tetrachloride on a support of magnesium chloride —	123

- 31.3.4 **Metallocenes — 124**
- 31.3.5 **Methylaluminoxane cocatalyst (MAO) — 126**
- 31.4 **Catalyst fate — 126**
 References — 127

Chapter 32

Polypropylene — 129

- 32.1 **Introduction — 129**
- 32.2 **Reaction chemistry — 130**
- 32.3 **Catalyst production — 130**
 - 32.3.1 **Diethylaluminum halide, $(\text{CH}_3\text{CH}_2)_2\text{AlX}_3$ — 131**
 - 32.3.2 **Metallocenes — 131**
- 32.4 **Catalyst fate — 132**
 References — 132

Chapter 33

Polystyrene — 135

- 33.1 **Introduction — 135**
- 33.2 **Reaction chemistry — 136**
- 33.3 **Catalyst production — 138**
 - 33.3.1 **For styrene — 138**
 - 33.3.2 **For polystyrene — 138**
- 33.4 **Catalyst fate — 139**
 References — 139

Chapter 34

Polytetrafluoroethylene — 141

- 34.1 **Introduction — 141**
- 34.2 **Reaction chemistry — 141**
- 34.3 **Catalyst production — 142**
 - 34.3.1 **Zinc (II) chloride, ZnCl_2 — 142**
 - 34.3.2 **Silver (I) nitrate, AgNO_3 — 142**
 - 34.3.3 **Methanol, CH_3OH — 142**
 - 34.3.4 **Ammonium persulfate, $\text{NH}_4\text{S}_2\text{O}_8$ — 142**
- References — 143**

Chapter 35

Polyvinyl chloride (PVC) — 145

- 35.1 **Introduction — 145**
- 35.2 **Reaction chemistry — 146**
- 35.3 **Catalyst production — 146**

- 35.4 Catalyst fate — 147
- References — 147

Chapter 36

Propylene — 149

- 36.1 Introduction — 149
- 36.2 Reaction chemistry — 149
- 36.3 Catalyst production — 150
- 36.3.1 Rhenium oxide (aka, dirhenium heptoxide) — 150
- 36.3.2 Molybdenum oxide (MoO_3) — 151
- 36.4 Catalyst fate — 151
- References — 151

Chapter 37

Propylene oxide and propylene glycol — 153

- 37.1 Introduction — 153
- 37.2 Reaction chemistry — 153
- 37.3 Catalyst production — 155
- 37.3.1 TS-1, titanium silicate — 155
- 37.3.2 Sulfuric acid, catalytically — 156
- 37.3.3 Alkali, for propylene glycol production — 156
- 37.4 Catalyst fate — 156
- References — 157

Chapter 38

Rubber — 159

- 38.1 Introduction — 159
- 38.2 Synthetic rubbers and use in tires — 160
- 38.2.1 Polyisoprene — 161
- 38.2.2 Polybutadiene — 162
- 38.2.3 Ethylene–propylene–diene rubbers — 164
- 38.2.4 Others — 165
- 38.3 Tire construction and compounding — 167
- References — 167

Chapter 39

Styrene — 169

- 39.1 Introduction — 169
- 39.2 Reaction chemistry — 169
- 39.3 Catalyst production — 170
- 39.3.1 Fe_2O_3 — 170

- 39.4 Catalyst fate — 170
- References — 170

Chapter 40

Sulfuric acid — 171

- 40.1 Introduction — 171
- 40.2 Reaction chemistry — 171
- 40.3 Catalyst production — 172
- 40.4 Catalyst fate — 172
- References — 173

Chapter 41

Toluene diisocyanate — 175

- 41.1 Introduction — 175
- 41.2 Reaction chemistry — 175
- 41.3 Catalyst production — 176
- 41.4 Catalyst fate — 176
- References — 177

Chapter 42

Vinyl acetate — 179

- 42.1 Introduction — 179
- 42.2 Reaction chemistry — 179
- 42.3 Catalyst production — 179
- 42.3.1 Catalyst form — 181
- 42.4 Catalyst fate — 181
- References — 181

Chapter 43

Vinyl chloride monomer — 183

- 43.1 Introduction — 183
- 43.2 Reaction chemistry — 184
- 43.3 Catalyst production — 185
- 43.3.1 Mercury (II) chloride, HgCl_2 — 185
- 43.4 Catalyst fate — 185
- References — 186

Chapter 44

Vitamins — 187

- 44.1 Introduction — 187
- 44.2 Reaction chemistry and syntheses — 187
- 44.2.1 Vitamin A — 187

44.2.2	Vitamin B ₁ or thiamine —	188
44.2.3	Vitamin B ₂ or riboflavin —	188
44.2.4	Vitamin B ₃ , often niacin —	189
44.2.5	Vitamin B ₅ or pantothenic acid —	189
44.2.6	Vitamin B ₆ or pyridoxine —	190
44.2.7	Vitamin B ₇ or biotin —	190
44.2.8	Vitamin B ₉ or folic acid —	191
44.2.9	Vitamin B ₁₂ or cyanocobalamin —	191
44.2.10	Vitamin C or ascorbic acid —	193
44.2.11	Vitamin D or cholecalciferol —	194
44.2.12	Vitamin E or tocopherols —	194
44.2.13	Vitamin K or phylloquinone —	195
44.3	Catalyst production —	195
	References —	196

Index —	197
