List of Figures	11
List of Tables	15
List of Abbreviations	17
1 Introduction	21
1.1 Motivation	23
1.2 Problem Statement	25
1.3 Thesis Organization	27
2 Related Work	29
2.1 Performance Metrics	29
2.2 Mobility Modeling	31
2.3 Aircraft Mobility Models	33
2.4 Analytical Models for Link and Path Duration	34
2.5 Analytical Models for Link and Path Probability	37
2.6 Airborne Internet	38
2.7 Online Black Box	40
2.8 Related Work Conclusion	44
3 Evaluation of Aircraft Mobility	45
3.1 Characteristics of Aircraft Mobility	45
3.1.1 A Typical Long Range Flight over the NAC	45
3.1.2 Regulative Constraints	46
3.1.3 Physical Constraints	47

3.1.4	Environmental Constrains	48
3.1.5	Impact on Mobility Modeling	49
3.2	Aircraft Traffic Analysis	52
3.3	Comparison of Flight Trajectory Data	56
3.4	Validation Scenario	58
4	Analytical Model for Link Probability	63
4.1	Link Probability Model	63
4.2	Link Probability Model using a Spatial Poisson Process . .	67
4.3	Evaluation of the Link Probability Model	68
4.4	Link Probability Model Conclusion	77
5	Analytical Model for Path Probability	79
5.1	Air-to-Ground Transmission Scenarios	80
5.2	Path Probability	81
5.3	Path Probability Model Conclusion	104
6	Analytical Model for Link and Path Duration	107
6.1	Link Duration	108
6.2	Path Duration	121
6.3	Path Duration Model Conclusion	126
7	Model Applicability	127
8	Conclusion	133
	Appendix	137
	Bibliography	143
	Curriculum Vitae	155
