Preface *xi*

1	History for Canonical and Non-canonical Structures of Nucleic Acids	1
1.1	Introduction	1
1.2	History of Duplex	1
1.3	Non-Watson–Crick Base Pair	5
1.4	Nucleic Acid Structures Including Non-Watson–Crick Base Pairs	7
1.5	Perspective of the Research for Non-canonical Nucleic Acid Structures	8
1.6	Conclusion and Perspective	9
	References	9
2	Structures of Nucleic Acids Now	11
2.1	Introduction	11
2.2	Unusual Base Pairs in a Duplex	11
2.2.1	Hoogsteen Base Pair	13
2.2.2	Purine–Pyrimidine Mismatches	13
2.2.3	Purine–Purine Mismatches	14
2.2.4	Pyrimidine–Pyrimidine Mismatches	16
2.3	Non-canonical Backbone Shapes in DNA Duplex	17
2.4	Branched DNA with Junction	19
2.5	Multi-stranded DNA Helices	20
2.6	Structures in RNA	20
2.6.1	Basic Structure Distinctions of RNA	20
2.6.2	Elements in RNA Secondary Structures	21
2.6.2.1	Hairpin Loop	22
2.6.2.2	Bulge Loop	22
2.6.2.3	Internal Loop	23
2.6.3	Elements in Tertiary Interactions of RNA	24
2.6.3.1	A-Minor Interactions	25
2.6.3.2	Ribose Zipper	25
2.6.3.3	T-Loop Motif	26

2.6.3.4	Kissing-Loop Interaction	26
2.6.3.5	GNRA Tetraloop Receptor Interaction	27
2.6.3.6	Pseudoknot Crosslinking Distant Stem Regions	29
2.7	Conclusion	29
	References	30
3	Stability of Non-canonical Nucleic Acids	33
3.1	Introduction	33
3.2	Factors Influencing Stabilities of the Canonical Duplexes	34
3.2.1	Hydrogen Bond Formations	34
3.2.2	Stacking Interactions	35
3.2.3	Conformational Entropy	35
3.3	Thermodynamic Analysis for the Formation of Duplex	36
3.4	Factors Influencing Stabilities of the Non-canonical Nucleic Acids	39
3.4.1	Factors Influencing Stability of Triplexes	39
3.4.2	Factors Influencing Stability of Quadruplex	42
3.4.2.1	G-Quadruplexes	42
3.4.2.2	i-Motif	44
3.5	Thermodynamic Analysis for the Non-canonical Nucleic Acids	45
3.5.1	Thermodynamic Analysis for the Intramolecular Triplex and Tetraplex	45
3.5.2	Thermodynamic Analysis for the Intermolecular Triplex	45
3.5.3	Thermodynamic Analysis for the Tetraplex	46
3.6	Conclusion	48
	References	49
4	Physicochemical Properties of Non-canonical Nucleic Acids	51
4.1	Introduction	51
4.2	Spectroscopic Properties of Non-canonical Nucleic Acids	51
4.2.1	Effect of Non-canonical Structure on UV Absorption	51
4.2.2	Circular Dichroism of Non-canonical Nucleic Acids	53
4.2.3	NMR Spectroscopy	56
4.2.4	Other Spectroscopic Characteristics of Non-canonical Nucleic Acids	57
4.3	Chemical Interactions on Non-canonical Nucleic Acids	59
4.3.1	Hydration	59
4.3.2	Cation Binding	61
4.3.3	pH Effect	62
4.3.4	Chemical Modification	63
4.4	Chemical Platform on the Non-canonical Structures	64
4.4.1	Specificity of a Ligand to Non-canonical Structures	64
4.4.2	Fluorescence Platform of Non-canonical Structures	67
4.4.3	Interface Between Proteins and Nucleic Acids	68
4.5	Physicochemical Property of Non-canonical Nucleic Acids in Cell	69
4.5.1	Molecular Crowding Condition that Reflects Cellular Environments	69

4.5.2	Effects of Crowding Reagents on Non-canonical Nucleic Acid Structures	70
4.5.3	Quantification of Physical Properties of Non-canonical Structures in Crowding Condition	71
4.5.4	Non-canonical Structures Under Mimicking Organelle Environment	72
4.5.5	Insight for the Formation of Non-canonical Nucleic Acids in Cells	73
4.6	Conclusion	75
	References	75
5	Telomere	79
5.1	Introduction	79
5.2	Structural Properties of Telomere	79
5.2.1	Structures of Telomere	79
5.2.2	Structural Properties of Human Telomeric G4s	81
5.2.3	Structure of Repeats of Human Telomeric G4s	84
5.3	Biological Relevance of Telomere G4	86
5.3.1	Telomerase Activity	86
5.3.2	Telomerase Repeated Amplification Protocol (TRAP) Assay	89
5.3.3	Alternative Lengthening of Telomere (ALT) Mechanism	89
5.4	Other Non-canonical Structures Related to Telomere Region	89
5.4.1	Telomere i-Motif	89
5.4.2	Telomere RNA	90
5.5	Conclusion	92
	References	93
6	Transcription	95
6.1	Introduction	95
6.2	Transcription Process	96
6.2.1	Transcription Initiation	96
6.2.2	Transcription Elongation	98
6.2.3	Transcription Termination	99
6.3	Transcription Process Perturbed by Certain Sequences of DNA and RNA	101
6.4	Transcription Process Perturbed by Non-canonical Structures of DNA and RNA	103
6.5	Conclusion	110
	References	110
7	Translation	113
7.1	Introduction	113
7.2	RNAs Involved in Translation Machinery	113
7.3	General Process of Translation	117
7.3.1	Translation Initiation	117
7.3.2	Translation Elongation	119
7.3.3	Translation Termination	119

7.4	RNA Structures Affecting Translation Reaction	121
7.4.1	Modulation of Translation Initiation in Prokaryotes	121
7.4.2	Modulation of Translation Initiation in Eukaryotes	123
7.4.3	RNA Structures Affecting Translation Elongation	126
7.4.4	RNA Structures Affecting Translation Termination	130
7.5	Conclusion	133
	References	134
8	Replication	137
8.1	Introduction	137
8.2	Replication Machineries	137
8.3	Replication Initiation	138
8.3.1	Mechanism of Activation of Replication Origins	138
8.3.2	Activation Control of Origins by G4s	139
8.3.3	Control of Timing of Replication Initiation by G4s	142
8.4	DNA Strand Elongation	142
8.4.1	Mechanism of DNA Strand Elongation	142
8.4.2	Impact of G4 and i-Motif Formations on DNA Strand Synthesis	144
8.4.3	Relationship Between G4 and Epigenetic Modification	145
8.4.4	Expansion and Contraction of Replicating Strand Induced by Hairpin Structures	147
8.5	Termination of Replication	148
8.6	Chemistry of the Replication and Its Regulation	148
8.6.1	Cellular Environments	148
8.6.2	Control of Replication by Chemical Compounds	150
8.7	Conclusion	151
	References	152
9	Helicase	155
9.1	Introduction	155
9.2	Function and Structure of Helicases	155
9.3	Unwinding of Non-canonical DNA Structures by Helicases	158
9.4	G4 Helicases in Gene Expressions	162
9.5	G4 Helicases in Replication	163
9.6	G4 Helicases in Telomere Maintenance	164
9.7	Relation to Diseases by Loss of G4 Helicases	165
9.8	Insight into Specific Properties of Activities of G4 Helicase Under Cellular Conditions	165
9.9	Conclusion	167
	References	167
10	Dynamic Regulation of Biosystems by Nucleic Acids with Non-canonical Structures	171
10.1	Introduction	171
10.2	Time Scale of Biological Reactions	171
10.2.1	Cell Cycle	172
10.2.2	Central Dogma	172

10.2.3	Dynamic Structures of Nucleic Acids	174
10.3	Processes in the Central Dogma Affected by Dynamics of Nucleic Acid Structures	176
10.3.1	Epigenetic Regulation Caused by Chemical Modification of DNA	176
10.3.2	Co-transcriptional Formation of Metastable RNA Structures	178
10.3.3	Co-transcriptional Translation and Transcription Attenuation	180
10.3.4	Co-transcriptional Ligand Binding and Gene Regulation	181
10.3.5	Translation Elongation and Co-translational Protein Folding	183
10.4	Conclusion	184
	References	185
11	Cancer and Nucleic Acid Structures	189
11.1	Introduction	189
11.2	Detail Mechanism of Cancer	189
11.2.1	Cancer Incidence	189
11.2.2	The Relationship Between Genes and Cancer	192
11.3	Non-canonical Structures of Nucleic Acids in Cancer Cells	192
11.3.1	Structural Characteristics of Nucleic Acids in Cancer Cells	192
11.3.2	Non-canonical Structures Perturb Gene Expression of Cancer-Related Genes	195
11.4	Roles of Non-canonical Structures of Nucleic Acids in Cancer Cells	197
11.4.1	Monitoring of Non-canonical Structures in Cancer Cells	197
11.4.2	Regulation of Gene Expressions by the Non-canonical Structures in Cancer Cells	198
11.5	Conclusion	199
	References	199
12	Neurodegenerative Diseases and Nucleic Acid Structures	203
12.1	Introduction	203
12.2	Protein Aggregation-Induced Neurodegenerative Diseases	203
12.3	DNA Shows Key Role for Neurodegenerative Diseases	205
12.4	RNA Toxic Plays a Key Role for Neurological Diseases	210
12.5	Conclusion	212
	References	212
13	Therapeutic Applications	215
13.1	Introduction	215
13.2	Oligonucleotide Therapeutics	216
13.2.1	Antisense Oligonucleotide	216
13.2.2	Functions of Antisense Oligonucleotide Therapeutics	217
13.2.3	Chemical Modifications in Therapeutic Oligonucleotides	220
13.2.3.1	Backbone Modified Oligonucleotides	220
13.2.3.2	Ribose Modified Oligonucleotides	221
13.2.3.3	Oligonucleotides with Unnatural Backbone	221
13.2.4	Oligonucleotide Therapeutics Other Than Antisense Oligonucleotide	223

13.2.4.1	Oligonucleotide Therapeutics Functioning Through RNA Interference	224
13.2.4.2	Oligonucleotide Therapeutics Functioning Through Binding to Protein	224
13.3	Non-canonical Nucleic Acid Structures as Therapeutic Targets	224
13.3.1	Traditional Antibiotics Targeting Structured Region of RNAs	225
13.3.2	Strategies for Constructing Therapeutic Materials Targeting Structured Nucleic Acids	226
13.4	Non-canonical Nucleic Acid Materials for Inducing Non-canonical Structures	230
13.5	Conclusion	231
	References	232
14	Materials Science and Nanotechnology of Nucleic Acids	235
14.1	Introduction	235
14.2	Non-canonical Structure-Based Nanomaterials Resembling Protein Functions	235
14.2.1	Aptamer	235
14.2.2	DNAzyme	238
14.2.3	Ion Channel	240
14.3	Protein Engineering Using G4-Binding Protein	240
14.4	Regulation of Gene Expression by G4-Inducing Materials	242
14.5	Environmental Sensing	246
14.5.1	Sensing Temperature in Cells	246
14.5.2	Sensing pH in Cells	248
14.5.3	Sensing K ⁺ Ion in Cells	248
14.5.4	Sensing Crowding Condition in Cells	249
14.6	Conclusion	250
	References	250
15	Future Outlook for Chemistry and Biology of Non-canonical Nucleic Acids	253
15.1	Introduction	253
15.2	Exploring Potential: Properties of Non-canonical Structures in Unusual Media	253
15.3	Systemizing Properties: Prediction of the Formation of Non-canonical Nucleic Acids Structures	259
15.4	Advancing Technology: Applications of Non-canonical Structures Taking Concurrent Reactions into Account	262
15.4.1	Co-transcriptional Dynamics of G-Quadruplex	263
15.4.2	Co-transcriptional Functionalization of Riboswitch-Like Sensor	263
15.4.3	Co-transcriptional RNA Capturing for Selection of Functional RNAs	266
15.5	Conclusion	267
	References	268
