1	Current approaches to the transposition of sustainability in Higher Education Institutions	1
1.1	Adaptation of Sustainability Issues in Higher Education	1
1.1.1	Origins of Sustainability and Goals for Sustainable Development	1
1.1.2	Goals of Higher Education	6
1.1.3	Quality of Education	9
1.1.4	Education for Sustainable Development	13
1.2	Transition from Education for Sustainable Development to Sustainable Education	19
1.2.1	Heterogeneity Discourse in Higher Education	19
1.2.2	Transformative University and the Influence of Universities on Society	24
1.2.3	Sustainable Universities	27
2	Current Approaches to Employability Transfer In Higher Education	35
2.1	Employability Transfer In Higher Education Institutions	35
2.1.1	Employability as a Result of Educational Processes	35
2.1.2	Requirement Analysis Within a Didactic Framework Concept for Employability Skills Transfer at Higher Education Institutions	47
2.2	System Theory and Cybernetics as Theoretical Framework for Knowledge and Skills Transfer in Higher Education	56
2.2.1	Circular Causality In Systems Theory	56

2.2.2	Autopoiesis in Cybernetic Systems as a Framework for Sustainable Processes in Economic Systems and Organizational Learning	61
3	Trends and Developments in Higher Education in the Context of Knowledge Society With Focus on the Field of Business	
	Economic Studies	67
3.1	Emerging Prospects in Higher Education	67
3.1.1	Trends and Challenges of Knowledge Society and Digital Transformation	67
3.1.2	Integrating Trends in Universities' Curricula	75
3.2	Interdisciplinary Approaches and Trends in Business Economics	80
3.2.1	Identification of Management Trends Through Management Fashion Theory	80
3.2.2	New Perspectives in Education Using Large Scale Databases and Machine Learning	87
4	Research on Applications, Prerequisites and Measures for the Implementation of Sustainability at Higher Education Institutions	93
4.1	Investigating the Application of Sustainability Concepts in Higher Education Institutions	93
4.1.1	Widely Differing Approaches to What Constitutes a Sustainable University	93
4.1.2	Objectives and Research Methodology of the Study on Sustainable Universities Using Universities in German-speaking Countries as an Example	95
4.1.3	Results Concerning Sustainability Concepts by the Example of Selected Best Practice Universities in Germany, Austria and Switzerland	97
4.2	Assessing Successful Quality Management as Prerequisite for Sustainable Conduct in Higher Education	112
4.2.1	Quality Management at Universities as a Basic Prerequisite for Sustainable Conduct	112
4.2.2	Objectives and Methodology of the Study on Internal and External Quality Assurance at the Example of German Private Universities	115
4.2.3	Resulting Category System for Internal and External Quality Assurance at Higher Education Institutions	117

4.2.4	Results Concerning the Involvement of Students and Transparency in Quality Management at Example of the Universities Researched	119
4.3	Proposing the Implementation of a Continuous Improvement Process and the Transfer of Appropriate Measurement Concepts to the Higher Education Sector	123
4.3.1	Gap Between Supply and Demand for Employability ...	123
4.3.2	Objectives and Methodology for Modeling a Continually Improvement Process Within the Scope of Employability Transfer at Universities	124
4.3.3	Results Concerning a Holistic Approach to the Measurability of Employability	125
5	Research on the Identification and Evaluation of Market- and Future-oriented Business Knowledge and Skills	129
5.1	Identifying Demand-driven Employability Skills Through Database Assessment	129
5.1.1	Market's Needs for Suitable Skills	129
5.1.2	Objectives and Methodology of the Identification of Demand-driven Employability Skills	131
5.1.3	Results Regarding the Application of the Concept for the Identification of Demand-driven Employability Skills Using the Romanian Outsourcing Industry as an Example	132
5.2	Evaluating Students' Perception of Important Business-related Topics at Universities	136
5.2.1	Universities as Providers of Transformative Knowledge	136
5.2.2	Objectives and Methodology of the Study on Students' Perception and Knowledge of Future-oriented Concepts	139
5.2.3	Results Concerning the Surveyed Students' Knowledge About Transformative Concepts at the Example of Sustainability and Bioeconomy	141
5.2.4	Results on the Students' Perception of Universities' Relevancy as Transformative Knowledge Educators at the Example of Sustainability and Bioeconomy	145

5.3	Analyzing Important Current Management Topics Based on the Research Subjects of Final Theses at Universities of Economics and Business Administration	149
5.3.1	Students' Central Role as Knowledge Providers	149
5.3.2	Objectives and Methodology of the Identification of Suitability of Final Theses' Titles as Corpus for Content Analysis	150
5.3.3	Results Concerning the Identification of Final Theses' Titles as a Suitable Corpus for Management Trends Lifecycle Analysis by the Exemplary Deduction of Two Lifecycles and Their Statistical Comparison	152
6	The Improvement of Sustainable Employability Transfer in Higher Education Institutions Using Large Scale Data Bases and Machine Learning	165
6.1	Autopoiesis as an option to determine the content of teaching by developing future management topics using machine learning	165
6.2	Development of a sustainable employability transfer model in academic business education	179
	Conclusion	187
	Bibliography	203
