

Periodic Problems in Thermoviscoelasticity

Two Seminars given at the Centro Internazionale Matematico Estivo, Bressanone, Italy, June 3-11, 1977.

R. Bouc

Laboratoire de Mécanique et d'Acoustique

C.N.R.S., Marseille

G. Geymonat

Politecnico di Torino

We thank Professor D. GRAFFI for his kind invitation to this talk, the aim of which is to give a survey of some recent work done at Laboratoire de Mécanique et d'Acoustique of C.N.R.S. Marseille, partly in collaboration with M. JEAN, B. NAYROLES and M. RAOUS, specially during the second author's year of leave from the Politecnico di Torino.

Contents

Introduction.

1. Background on the mechanics of continuous media with hidden variables.
2. A linearization result.
3. Some examples.
4. Some results on the nonlinear heat equation.
5. Duality and virtual work.
6. A viscoelastic constitutive equation with periodic coefficients.
7. The periodic bilateral problem for a Maxwell body.
8. The periodic unilateral Signorini problem.

Bibliography.
