Part I Market for Bulk GaN Crystals

1	Development of the Bulk GaN Substrate Market	3
	Andrew D. Hanser and Keith R. Evans	
1.1	Introduction	3
1.2	III-N Device Market Drivers and Forecast	4
1.2.1	Light Generation and Solid State Lighting in the III-Ns	4
1.2.2	Electrical Systems and Power Electronics in the III-Ns	5
1.2.3	Positioning GaN Substrates for SSL and Power Electronics Markets	7
1.2.4	Key Drivers for Bulk GaN Substrate Commercialization Success	9
1.3	Benefits and Importance of Bulk GaN Substrates	11
1.3.1	Device Performance	12
1.3.2	Thermal Conductivity	16
1.3.3	Thermally Activated Device Failure	17
1.3.4	Device Cost	18
1.4	GaN Device Trends for Bulk GaN Substrates	19
1.4.1	Lasers and LEDs	19
1.4.2	Power Switches	20
1.4.3	High-Frequency, High-Power HEMTs	21
1.5	Bulk GaN Substrate Trends	21
1.5.1	Hydride Vapor Phase Epitaxy	22
1.5.2	Ammonothermal Growth	22
1.5.3	Solution Growth	23
1.5.4	Combined Growth Techniques	23
1.6	Summary	24
	References	25

Part II Vapor Phase Growth Technology

2	Hydride Vapor Phase Epitaxy of GaN	31
	Akinori Koukitu and Yoshinao Kumagai	
2.1	Introduction.....	31
2.2	Thermodynamic Analysis on HVPE Growth of GaN	32
2.2.1	Calculation Procedure	32
2.2.2	Equilibrium Partial Pressure and Driving Force for the GaN Deposition.....	34
2.3	Cubic GaN Epitaxial Growth on (100) GaAs Substrate	37
2.3.1	Experimental.....	38
2.3.2	Cubic GaN Growth	39
2.4	Comparison of GaN Growth on (111)A and (111)B GaAs Substrates	42
2.4.1	Experimental.....	42
2.4.2	Comparison of GaN Growth on (111)A and (111)B GaAs Surfaces	43
2.5	Ab Initio Calculations of GaN Initial Growth Processes on (111)A and (111)B GaAs Surfaces	45
2.5.1	Calculation Procedure	46
2.5.2	GaN Initial Growth Processes on (111)A and (111)B GaAs Surfaces	46
2.6	Thick GaN Growth on (111)A GaAs Substrate	49
2.6.1	Experimental.....	49
2.6.2	Thick GaN Growth on (111)A GaAs Surface	50
2.7	Preparation of Fe-Doped Semi-insulating GaN Substrates.....	53
2.7.1	Experimental.....	55
2.7.2	Fe-Doped GaN Layer Grown on Sapphire and GaAs.....	56
	References.....	59
3	Growth of Bulk GaN Crystals by HVPE on Single Crystalline GaN Seeds	61
	B. Łuczniak, B. Pastuszka, G. Kamler, I. Grzegory, and S. Porowski	
3.1	Introduction.....	61
3.2	Experimental	62
3.2.1	Seed Crystals.....	62
3.2.2	HVPE Reactor and Growth Conditions	63
3.2.3	Characterization	64
3.3	Experimental Results.....	64
3.3.1	Crystals Grown on Small Near Dislocation Free GaN Platelet-Like Seeds.....	64
3.3.2	Crystals Grown on Small Near Dislocation Free GaN Needle-Like Seeds	69

3.3.3	Crystals Grown on Large (0001) Oriented GaN Substrates	73
3.4	Conclusions.....	76
	References.....	77
4	Freestanding GaN Wafers by Hydride Vapor Phase Epitaxy Using Void-Assisted Separation Technology	79
	Y. Oshima, T. Yoshida, T. Eri, K. Watanabe, M. Shibata, and T. Mishima	
4.1	Introduction.....	79
4.2	Outline of the HVPE-VAS Technology	80
4.2.1	Concept of the HVPE-VAS Technology.....	80
4.2.2	Overview of the Process.....	81
4.3	Preparation of a GaN Template with a Porous TiN Film	81
4.3.1	Experimental.....	81
4.3.2	Results	81
4.3.3	Mechanisms for the Formation of the Porous Structure	82
4.4	HVPE Growth on GaN Templates with a Porous TiN Film.....	83
4.4.1	Process of HVPE Growth and Separation	84
4.4.2	Mechanisms of Growth and Separation	85
4.5	Properties of GaN Wafers Fabricated by HVPE–VAS Technology ..	88
4.5.1	Structural Properties.....	88
4.5.2	Electrical Properties	90
4.5.3	Thermal Properties	91
4.6	Summary.....	94
	References.....	95
5	Nonpolar and Semipolar GaN Growth by HVPE.....	97
	Paul T. Fini and Benjamin A. Haskell	
5.1	Introduction.....	97
5.2	Heteroepitaxial Films, Including Substrate Selection	99
5.2.1	Planar a-Plane GaN Films.....	99
5.2.2	Planar m-Plane GaN Films.....	102
5.2.3	Planar Semipolar GaN Films.....	104
5.3	Lateral Epitaxial Overgrowth of Nonpolar, Semipolar GaN	109
5.3.1	LEO of a-Plane GaN	109
5.3.2	LEO of m-Plane GaN	112
5.3.3	LEO of Semipolar GaN	115
5.4	Conclusions and Future Development.....	116
	References.....	117

6	High Growth Rate MOVPE	119
	K. Matsumoto, H. Tokunaga, A. Ubukata, K. Ikenaga, Y. Fukuda, Y. Yano, T. Tabuchi, Y. Kitamura, S. Koseki, A. Yamaguchi, and K. Uematsu	
6.1	Introduction	119
6.2	Growth Characteristics of AlGa _N and GaN by Conventional MOVPE	120
6.3	Quantum Chemical Study of Vapor-Phase Reaction	123
6.4	Result of High-Growth-Rate GaN by Using a High-Flow-speed Reactor	127
6.5	Discussion and Summary	130
	References	132
 Part III Solution Growth Technology		
7	Ammonothermal Growth of GaN Under Ammono-Basic Conditions	137
	R. Doradziński, R. Dwiliński, J. Garczyński, L.P. Sierzputowski, and Y. Kanbara	
7.1	Introduction	137
7.2	The Growth Method	138
7.2.1	Physico-Chemical Basics	139
7.2.2	Solubility Measurements	141
7.2.3	Equipment	142
7.2.4	Seeded Recrystallization	143
7.2.5	Doping	144
7.2.6	Crystal Machining	144
7.3	Crystal Characterization	146
7.3.1	Structural Properties	146
7.3.2	Optical Properties	151
7.3.3	Electrical Properties	152
7.4	Homoepitaxy on Ammonothermal GaN	152
7.5	Conclusions	157
	References	158
 8	 A Pathway Toward Bulk Growth of GaN by the Ammonothermal Method	 161
	Tadao Hashimoto and Shuji Nakamura	
8.1	Introduction	161
8.2	Impact of Mineralizer on Ammonothermal Synthesis of GaN	162
8.3	Solubility of GaN in Ammonobasic Solutions	165
8.4	Seeded Growth of GaN with Metallic Ga Nutrient	170
8.5	Seeded Growth of GaN with Polycrystalline GaN Nutrient	174
8.6	Growth of Bulk GaN Crystals and Sliced Wafers	177
8.7	Summary	180
	References	181

9	Acidic Ammonothermal Growth Technology for GaN	183
	Dirk Ehrentraut and Yuji Kagamitani	
9.1	Introduction	183
9.2	Brief History of the Ammonothermal Growth Technique of GaN	185
9.3	Growth Technology	186
9.4	Chemistry of the Solution and Growth Mechanism	188
	9.4.1 Solubility	188
	9.4.2 Growth Rate and Chemistry of the Solution	190
	9.4.3 Effect of Acidity on Formation of GaN	193
9.5	Properties of Ammonothermal GaN.....	195
9.6	Prospects and Future developments for Ammonothermal GaN.....	200
	References.....	202

Part IV Flux Growth Technology

10	High Pressure Solution Growth of Gallium Nitride	207
	Michal Boćkowski, Pawel Strąk, Izabella Grzegory, and Sylwester Porowski	
10.1	Introduction.....	207
10.2	Growth Method.....	209
	10.2.1 Thermodynamic and Kinetic Aspects of HPS Growth.....	210
	10.2.2 Experimental	211
10.3	Spontaneous Crystallization by HPS Growth Method.....	214
	10.3.1 Habit and Morphology of the Crystals	214
	10.3.2 Physical Properties of the Crystals.....	215
10.4	Seeded Growth by HPS Method.....	216
	10.4.1 Liquid Phase Epitaxy in the c-Direction on Various Substrates.....	217
	10.4.2 Modeling of the Convective Transport in Gallium for LPE Growth (Time Independent Solutions)	219
	10.4.3 Seeded Growth with Convective Flow of Gallium Under Control	222
	10.4.4 Growth on HVPE Seeds in the c-Directions	224
	10.4.5 Growth on HVPE Seeds in Nonpolar Directions	227
	10.4.6 Modeling of the Convective Transport in Gallium (Time Dependent Solutions)	227
10.5	Applications of Pressure Grown GaN Substrates: Blue Laser Diodes in TopGaN Ltd	230
10.6	Summary and Perspectives of HPS Growth Method	232
	References.....	233

11 A Brief Review on the Na-Flux Method Toward Growth of Large-Size GaN Crystal	235
Dirk Ehrentraut and Elke Meissner	
11.1 Introduction	235
11.2 Historical Development in Brief	235
11.3 Experimental Conditions for the LPE Growth of GaN by the Na-Flux Method	238
11.4 Growth Mechanism and Dislocations	239
11.4.1 Effect of Flux Composition on Growth Stability and Crystal Morphology	239
11.4.2 Growth Mechanism and Effect on Dislocation Population	240
11.4.3 Solubility and Growth Rate	241
11.5 Properties of GaN	242
11.6 Industrialization Potential for the Na-Flux Method	243
References	243
12 Low Pressure Solution Growth of Gallium Nitride	245
E. Meissner, S. Hussy, and J. Friedrich	
12.1 Introduction	245
12.2 Technology of Solution Growth Under Ambient Pressure, the LPSG Method	247
12.2.1 The Formation Reaction of GaN Under Ammonia Atmosphere	248
12.2.2 Solubility of Nitrogen in Gallium-Metal Solutions	251
12.2.3 Growth Setup, Process, and Basic Challenges	254
12.2.4 The Influence of Process Parameters on the Epitaxial and Parasitic Growth of GaN	256
12.3 Evolution of Structure and Morphology of the GaN Layers	261
12.3.1 Importance of the Initial Growth Stage	261
12.3.2 Macroscopic Defects in LPSG GaN	263
12.4 Properties of the LPSG GaN Material	265
12.4.1 Structural Properties and Dislocation Density in LPSG GaN Material	265
12.4.2 Electrical Properties	270
12.4.3 Impurities	270
12.5 Summary and Prospect	271
References	272
