## List of Participants — VII

### 10 Diterpenoids — 1

- 10.1 Labdane-type diterpenoids — 1
- 10.2 Clerodane-type diterpenoids — 43
- 10.3 Halimane-type diterpenoids — 91
- 10.4 Abietane-type diterpenoids — 96
- 10.5 Pimarane- and isopimarane-type diterpenoids — 142
- 10.6 Rosane-type diterpenoids — 167
- 10.7 Dolabrane-type diterpenoids — 171
- 10.8 Cassane-type diterpenoids — 176
- 10.9 Cembranolide-type diterpenoids — 192
- 10.10 Staminane-type diterpenoids — 193
- 10.11 Podocarpene-type diterpenoids — 196
- 10.12 Kaurane-type diterpenoids — 202
- 10.13 Beyerane-type diterpenoids — 246
- 10.14 Atisane-type diterpenoids — 251
- 10.15 Paraliane-, pepluane-, and euphoractine-type diterpenoids — 257
- 10.16 Trachylobane-type diterpenoids — 261
- 10.17 Taxane-type diterpenoids — 267
- 10.18 Jatrophone-type diterpenoids — 292
- 10.19 Lathyrane-type diterpenoids — 309
- 10.20 Myrsinane-type diterpenoids — 313
- 10.21 Cyclo- and pre-myrsinane-type diterpenoids — 317
- 10.22 Daphnane-type diterpenoids — 322
- 10.23 Ingenane-type diterpenoids — 326
- 10.24 Tigliane-type diterpenoids — 330
- 10.25 Segetane-type diterpenoids — 334

### 11 Triterpenoids — 339

- 11.1 Squalene- and botryococcane-type triterpenoids — 339
- 11.2 Lanostane-type triterpenoids — 350
- 11.3 Cycloartane-type triterpenoids — 368
- 11.4 Dammarane-type triterpenoids — 376
- 11.5 Tirucallane-type triterpenoids — 387
- 11.6 Cucurbitane-type triterpenoids — 403
- 11.7 Oleanane-type triterpenoids — 407
- 11.8 Ursane- and taraxastane-type triterpenoids — 425
- 11.9 Ferraane-type triterpenoids — 437
- 11.10 Lupane-type triterpenoids — 443

|                                                      |                                                             |            |
|------------------------------------------------------|-------------------------------------------------------------|------------|
| 11.11                                                | Hopane- and fernane-type triterpenoids —                    | 454        |
| 11.12                                                | Limonoids —                                                 | 458        |
| 11.13                                                | Some other triterpenoids —                                  | 478        |
| <b>12</b>                                            | <b>Sesterterpenoids, tetraterpenoids, and carotenoids —</b> | <b>487</b> |
| 12.1                                                 | Sesterterpenoids —                                          | 487        |
| 12.1.1                                               | Long-chain-type sesterterpenoids —                          | 487        |
| 12.1.2                                               | Monocycle-type sesterterpenoids —                           | 491        |
| 12.1.3                                               | Dicycle-type sesterterpenoids —                             | 492        |
| 12.1.4                                               | Tricycle-type sesterterpenoids —                            | 494        |
| 12.1.5                                               | Tetracycle-type sesterterpenoids —                          | 498        |
| 12.1.6                                               | Sesterterpenoids of complex structure —                     | 506        |
| 12.2                                                 | Tetraterpenoids and carotenoids —                           | 511        |
| 12.2.1                                               | Tetraterpenoids —                                           | 511        |
| 12.2.2                                               | Carotenoids —                                               | 535        |
| <b>Index of compound names — 541</b>                 |                                                             |            |
| <b>Index of molecular formula of compounds — 567</b> |                                                             |            |
