

# Contents

**Preface — V**

**Introduction — 1**

**Chapter 1**

**Analytical chemistry — 3**

**Chapter 2**

**Laboratory operations — 7**

**Chapter 3**

**Planning the analysis — 31**

**Chapter 4**

**Sampling — 35**

## **Instrumental analysis**

**Chapter 5**

**Calorimetry — 51**

**Chapter 6**

**Chromatography — 55**

6.1 Column chromatography — 57

6.2 Gas-liquid chromatography — 57

6.3 High-performance liquid chromatography — 63

6.4 Ion chromatography — 65

6.5 Paper chromatography — 66

6.6 Thin-layer chromatography — 67

**Chapter 7**

**Conductometry — 71**

**Chapter 8**

**Coulometric analysis — 79**

**Chapter 9**

**Potentiometry — 83**

**Chapter 10**  
**Polarimetry — 89**

**Chapter 11**  
**Turbidimetry and nephelometry — 95**

**Chapter 12**  
**Polarography (voltammetry) — 97**

**Chapter 13**  
**Refractometry — 99**

**Chapter 14**  
**Spectrophotometry — 103**

- 14.1      Colorimetry — 107
- 14.2      Colour scales — 108
- 14.3      Ultraviolet and visible spectrophotometry — 109
- 14.4      Infrared spectrophotometry — 114
- 14.5      FTIR spectrophotometry — 114
- 14.6      Near-infrared spectrophotometry — 117
- 14.7      Raman spectrophotometry — 118
- 14.8      Mass spectrophotometry — 118
- 14.9      Atomic absorption spectrophotometry — 119
- 14.10     Inductively coupled spectrophotometry — 125
- 14.11     Reflectance spectrophotometry — 127
- 14.12     Fluorescence spectroscopy — 128
- 14.12.1   Physical measurements — 129

**Physical measurements**

**Chapter 15**  
**Viscosity — 133**

**Chapter 16**  
**Density — 139**

- 16.1      Hydrometers — 141

**Chapter 17**  
**Particle analysis — 147**

- 17.1      Gel permeation chromatography — 147
- 17.2      Test sieve analysis — 148

- 17.3 Particle counters — 151
- 17.4 Imaging — 151

## **Chapter 18**

### **Surface tension — 153**

- 18.1 Chemical analysis — 154

## **Chapter 19**

### **Chemical analysis — 157**

- 19.1 Electrochemical series — 157
- 19.2 Nomenclature of acids — 158
- 19.3 Valencies — 158
- 19.4 Chemical reagents — 160
  - 19.4.1 Preparation of some common laboratory solutions or reagents — 163
  - 19.4.2 Dilution formula — 164
  - 19.4.3 Preparation of AAS standard aqueous solutions — 164

## **Chapter 20**

### **Gravimetric analysis — 167**

- 20.1 Co-precipitation — 168
- 20.2 Post-precipitation — 169

## **Chapter 21**

### **Volumetric analysis (titrimetric) — 171**

- 21.1 Titrations — 172
- 21.2 Indicators — 175
- 21.3 Coulometric titrations — 176
- 21.4 Argentometric titrations — 177
- 21.5 Neutralisation titrations (acids and bases) — 178
- 21.6 Neutralisation titrations (acids and bases) — 180
- 21.7 Redox (reduction–oxidation) titrations — 181
- 21.8 Precipitation titrations — 182
- 21.9 Complexometric titrations — 183

## **Chapter 22**

### **Reactions with iodine — 185**

- 22.1 Iodimetry — 185
- 22.2 Iodometry — 185

## **Chapter 23**

**Qualitative chemical analysis — 187**

## **Data**

### **Chapter 24**

**Data interpretation — 197**

- 24.1 The t-test: (aka Student's t-test) — **199**
- 24.2 The Q-test (or Grubbs' test) — **199**
- 24.3 The F-test — **200**
- 24.4 Gantt charts — **200**
- 24.5 Control charts — **200**
- 24.6 Regression analysis — **201**
- 24.7 Calibration of instrumentation — **202**
- 24.8 Validation of analytical test methods — **203**
- 24.9 Measurement of errors — **207**

### **Chapter 25**

**Laboratory reports — 215**

- 25.1 What are significant figures? — **215**
- 25.2 The report — **217**

## **Appendices**

### **Appendix I**

**Laboratory safety and checklists — 223**

### **Appendix II**

**Internationally accepted laboratory procedures and test methods — 233**

### **Appendix III**

**Strengths of common concentrated acids — 235**

### **Appendix IV**

**Units of measurement and concentration — 237**

### **Appendix V**

**International System (SI) of Units — 241**

### **Appendix VI**

**Metric (SI) prefixes and decimal unit multiples — 243**

**Appendix VII****Temperature scales and conversions — 245****Appendix VIII****Vacuum units — 247****Appendix IX****Pressure units — 249****Appendix X****Autoclave steam pressure and temperature — 251****Appendix XI****Drying agents – desiccants — 253****Appendix XII****Constant humidity solutions — 255****Appendix XIII****Freezing mixtures — 257****Appendix XIV****Rate of flow units — 259****Appendix XV****Detection limits in atomic spectroscopy — 261****Appendix XVI****Oxidation states — 265****Appendix XVII****Commodity properties — 267****Appendix XVIII****Properties of metals and alloys — 269****Appendix XIX****Care of platinum apparatus — 271****Appendix XX****Periodic table — 273**

**XII — Contents**

**Glossary of terms — 275**

**Quiz — 287**

Questions — 287

Answers — 289

**Index — 295**
