Preface *xiii*

1 Current State of the Art of High-Throughput Metabolomics 1

Aihua Zhang, Qiang Yang, Hui Sun, and Xijun Wang

- 1.1 Introduction 1
- 1.2 Metabolomics 1
- 1.3 Mass Spectrometry Technology 2
- 1.4 Recent Advancements and Applications 4
 - 1.4.1 Disease Diagnoses and Metabolism 4
 - 1.4.2 Metabolic Mechanisms 6
 - 1.4.3 Drug Efficacy 7
 - 1.4.4 Nutrition 7
 - 1.4.5 Plant Biology 8
- 1.5 Limitation 8
- 1.6 Conclusions and Future Perspectives 9
- Acknowledgments 9
- References 9

2 Innovations in Analytical Techniques of Metabolomics 19

Ling Kong, Aihua Zhang, Shi Qiu, and Xijun Wang

- 2.1 Introduction 19
- 2.2 Current Analytical Technologies of Metabolomics 20
- 2.3 Chromatography Platform 21
 - 2.3.1 Gas Chromatography Technique 21
 - 2.3.2 Liquid Chromatography Technique 21
 - 2.3.3 Supercritical Fluid Chromatography Technique 22
 - 2.3.4 Capillary Electrophoresis Chromatography Technique 22
- 2.4 Mass Spectrometry Platform 23
 - 2.4.1 GC-MS Technique 23
 - 2.4.2 LC-MS Technique 24
 - 2.4.3 SFC-MS Technique 24
 - 2.4.4 CE-MS Technique 24

2.5	Nuclear Magnetic Resonance Platform	25
2.6	Comprehensive and Multidimensional Analytical Platform	25
2.7	Conclusions	25
	Acknowledgments	26
	References	26
3	Sample Preparation Method for Mass Spectrometry-Based Metabolomics	33
	<i>Shi Qiu, Aihua Zhang, Hui Sun, and Xijun Wang</i>	
3.1	Introduction	33
3.2	Sample Collection and Storage	34
3.2.1	Urine	34
3.2.2	Plasma and Serum	35
3.2.3	Cerebrospinal Fluids	35
3.2.4	Tissue Homogenates	35
3.2.5	Saliva	36
3.3	Sample Preparation and Processing	36
3.4	Application	37
3.5	Future Development	38
	Acknowledgments	38
	References	38
4	Multivariate Data Analysis Approach for Mass Spectrometry-Based Metabolomics	45
	<i>Junling Ren, Aihua Zhang, Ling Kong, and Xijun Wang</i>	
4.1	Introduction	45
4.2	Separation-Based MS Techniques	46
4.2.1	Gas Chromatography–Mass Spectrometry	46
4.2.2	Liquid Chromatography–Mass Spectrometry	46
4.2.2.1	Reversed-Phase Liquid Chromatography–Mass Spectrometry	47
4.2.2.2	Hydrophilic Interaction Chromatography–Mass Spectrometry	47
4.2.2.3	Supercritical Fluid Chromatography–Mass Spectrometry	48
4.2.3	Capillary Electrophoresis–Mass Spectrometry	48
4.2.4	Ion Mobility–Mass Spectrometry	49
4.3	Separation-Free MS Techniques	49
4.3.1	Direct Infusion–Mass Spectrometry	49
4.3.2	Matrix-Assisted Laser Desorption Ionization–Mass Spectrometry	50
4.3.3	Mass Spectrometry Imaging	50
4.3.4	Direct Analysis in Real Time–Mass Spectrometry	51
4.4	Tools for MS Result Analysis	51
4.5	Multivariate Statistical Analysis Approach for Data Analysis	53
4.6	Limitations and Challenges	57
4.7	Conclusions and Future Perspectives	58
	Acknowledgments	60
	References	60

5	Mass Spectrometry-Driven Metabolomics for Metabolites and Metabolic Pathway Analysis	67
	<i>Aihua Zhang, Hui Sun, Shi Qiu, and Xijun Wang</i>	
5.1	Introduction	67
5.2	Mass Spectrometry-Driven Metabolomics for Biomarker Discovery	69
5.3	Data Extraction and Analysis for Metabolites and Metabolic Pathway	69
5.4	Biomarker Identification	70
5.5	Applications	70
5.6	Conclusions	73
	Acknowledgments	73
	References	73
6	Metabolomics as Drivers for Biomarker Discovery and Mechanism Interpretation	81
	<i>Wanying Wang, Aihua Zhang, Hui Sun, Guangli Yan, and Xijun Wang</i>	
6.1	Introduction	81
6.2	Metabolomics for Biomarker Discovery	82
6.3	Metabolomics for Mechanism Interpretation	83
6.4	Application	85
6.5	Current Trends and Future Perspectives	88
6.6	Conclusions	89
	Acknowledgments	89
	References	89
7	Current Status of Technical Challenges in Mass Spectrometry-Driven Metabolomics	97
	<i>Shi Qiu, Aihua Zhang, Hui Sun, and Xijun Wang</i>	
7.1	Introduction	97
7.2	Metabolic Fingerprinting and Profiling	98
7.3	Non-targeted or Targeted Metabolomics	99
7.4	Metabolite Identification Bottleneck	99
7.5	Quality Control Bottleneck	101
7.6	Mass Spectrometry Techniques	102
7.6.1	LC-MS	102
7.6.2	GC-MS	103
7.6.3	NMR-MS	104
7.7	Prospects	105
7.8	Conclusions	105
	Acknowledgments	105
	References	106
8	The Application of Metabolomics in Cancer Management	113
	<i>Aihua Zhang, Hui Sun, and Xijun Wang</i>	
8.1	Introduction	113
8.2	Epidemiology and Diagnosis	114

8.3	Prospective Biomarkers	114
8.4	Metabolomics Screening Biomarkers	117
8.5	Conclusions and Future Directions	117
	Acknowledgments	118
	References	118
9	Metabolomics in Coronary Heart Disease: From Biomarker Identification to Pathomechanism Insights	123
	<i>Hui Sun, Aihua Zhang, Shi Qiu, and Xijun Wang</i>	
9.1	Introduction	123
9.2	Predicament	126
9.3	Metabolomics for CHD	126
9.4	Biomarker Dilemma	127
9.5	Lipid Metabolism	128
9.6	Treatment of Herbal Medicine	128
9.7	Conclusions and Future Direction	129
	Acknowledgments	129
	References	130
10	Metabolomics Applications in Neurological Disease	135
	<i>Shi Qiu, Ying Han, Aihua Zhang, Hui Sun, and Xijun Wang</i>	
10.1	Introduction	135
10.2	CSF Sampling	136
10.3	Application of Metabolomics in CNS	136
10.4	Future Direction	137
10.5	Conclusions	138
	Acknowledgments	139
	References	139
11	Metabolomics Toward Precision Medicine	143
	<i>Aihua Zhang, Shi Qiu, Hui Sun, Guangli Yan, and Xijun Wang</i>	
11.1	Introduction	143
11.2	Precision Medicine: A New Era of Medicine	144
11.3	Precision Biomarkers	145
11.4	Metabolomics as a Powerful Tool for Potential Biomarkers	146
11.5	Practical Application of Metabolomics	147
11.6	Precision Medicine for Herbal Medicine	148
11.7	Conclusions and Future Perspectives	150
	Acknowledgments	151
	References	151
12	Mass Spectrometry-Based Metabolomics Toward Biological Function Analysis	157
	<i>Shi Qiu, Wanying Wang, Aihua Zhang, and Xijun Wang</i>	
12.1	Introduction	157
12.2	Current Trend and Challenge of Disease Phenotype	158

12.3	Advances in Mass Spectrometry Analytic Technique	158
12.4	Advantages of Mass Spectrometry-Based Metabolomics	159
12.5	Mass Spectrometry-Based Metabolomics for Biological Function	159
12.6	Limitations of MS-Based Metabolomics	165
12.7	Future Perspectives	165
12.8	Conclusions	166
	Acknowledgments	166
	References	166
13	Mass Spectrometry-Driven Active Ingredients Discovery from Herbal Medicine	171
	<i>Wanying Wang, Aihua Zhang, Shi Qiu, and Xijun Wang</i>	
13.1	Introduction	171
13.2	An Overview of Herbal Medicine	172
13.3	Mass Spectrometry to Identify the Chemical Constituents	173
13.4	Mass Spectrometry for Constituent Analysis <i>In Vivo</i>	173
13.5	Mass Spectrometry-Based Chinmedomics Strategy	175
13.6	Application	175
13.7	Conclusions and Future Perspectives	176
	Acknowledgments	177
	References	177
14	Metabolomics Application in Herbal Medicine	185
	<i>Wanying Wang, Aihua Zhang, Hui Sun, and Xijun Wang</i>	
14.1	Introduction	185
14.2	Metabolomic Dissection of Herbal Medicine	186
14.3	Application in Herbal Medicine	189
14.3.1	Effect Evaluations	189
14.3.2	Mechanism Explorations	192
14.3.3	Quality Control Analyses	193
14.4	Conclusions	194
	Acknowledgments	194
	References	194
15	Mass Spectrometry-Based Metabolomics Insights into the Mode of Action of Natural Products	199
	<i>Junling Ren, Aihua Zhang, Hui Sun, and Xijun Wang</i>	
15.1	Introduction	199
15.2	Metabolomics: An Overview	200
15.2.1	Comprehensive Metabolomics for Metabolites Detection	200
15.2.2	Understanding Pharmacological Effects	200
15.2.3	Discovery of Biomarkers and Targets	201
15.2.4	Screen Bioactive Natural Products	201
15.3	Superiority of MS-Based Metabolomics	201
15.3.1	Enhanced MS Coverage for Small-Molecule Metabolites	202

15.3.2	MS-Based Metabolomics Guided Biochemical Analysis	202
15.3.3	Identify Molecular Mechanisms by Integrating MS with Databases	202
15.4	Mass Spectrometry Techniques Employed in Metabolomics	202
15.4.1	Gas Chromatography–Mass Spectrometry	203
15.4.2	Liquid Chromatography–Mass Spectrometry	203
15.4.3	Capillary Electrophoresis–Mass Spectrometry	203
15.4.4	Ion Mobility–Mass Spectrometry	204
15.4.5	Mass Spectrometry Imaging	204
15.4.6	New Challenges in MS-Based Metabolomics	204
15.5	Challenges of Natural Products	205
15.6	Herbal Ingredients: Current Research and Applications	205
15.6.1	Various Analytical Strategies for Herbal Ingredients	205
15.6.2	Effective Constituents <i>In Vitro</i> and <i>In Vivo</i>	206
15.7	MS in Natural Product	206
15.7.1	Qualitative Analysis	206
15.7.2	Quantitative Analysis	207
15.7.3	Mechanism Analysis of Action	207
15.8	MS-Based Metabolomics in Bioactive Ingredients	208
15.8.1	Reveal Efficacy of HMs	208
15.8.2	High-Throughput Analysis of HMs	209
15.8.3	Discovery of Quality Markers	209
15.8.4	Toxicity Explorations	211
15.8.5	Potential Impacts on Drug Discovery	211
15.9	Conclusions and Future Perspective	212
	Acknowledgment	212

16.1	Introduction	223
16.2	Lipidomics Method	223
16.2.1	Targeted Lipidomics	224
16.2.2	Non-targeted Lipidomics	225
16.3	Sample Preparation	225
16.4	Analytical Techniques in Lipidomics	227
16.4.1	Liquid Chromatography–Mass Spectrometry	227
16.4.2	Gas Chromatography–Mass Spectrometry	228
16.4.3	Supercritical Fluid Chromatography–Mass Spectrometry	228
16.4.4	Ion Mobility–Mass Spectrometry	228
16.4.5	Mass Spectrometry Imaging	229
16.4.6	Shotgun Lipidomics	229
16.5	Lipidomics for Biomarker Discovery	229
16.6	Application of MS-Based Lipidomics	230
16.6.1	Efficacy Analysis	230

16.6.2	Food Science	231
16.6.3	Environment	231
16.6.4	Clinical Biomarker Discovery	232
16.6.5	Pharmacological Research	232
16.6.6	Toxicology Analysis	232
16.7	Future Perspectives	233
16.8	Conclusions	234
	Acknowledgments	234
