1	Introduction	1
2	Defining Different Forms of Discrimination	13
2.1	When Is There Discrimination?	16
2.2	Social Discrimination Under Certainty	20
2.2.1	Are There Different Shades of Taste-Based Discrimination?	26
2.2.2	Tastes for Groups	29
2.3	Social Discrimination Under Uncertainty	31
2.4	How to Detect the Accurate Type(s) of Discrimination	41
3	Where Does Taste-Based Discrimination Come From?	45
3.1	A Taste for the Ingroup	46
3.1.1	Defining Taste-Based Discrimination in a Receiver Situation	47
3.1.2	Ingroup Favouritism and Social Identity Theory	56
3.1.3	Ingroup Love or Outgroup Derogation?	65
3.1.4	Tastes Outside the Ingroup-Outgroup Context	72
3.2	Is All Discrimination Ultimately Statistical Discrimination?	77
3.2.1	Interdependence of Outcomes and Direct Reciprocity	78
3.2.2	Indirect Reciprocity and Reputational Concerns	81
3.2.3	Cooperative Norm Violation	84
3.3	The Evolution of Agent-Relative Social Preferences	86
3.3.1	Why Altruistic Behaviour Can Be Adaptive	87
3.3.2	The Role of Culture in Evolution	93
3.3.3	Why Altruism Is Conditional	97

4	How Do We Get Our Beliefs for Statistical Discrimination?	109
4.1	Inherent Prior Beliefs	112
4.1.1	Prior Beliefs about Familiar and Unfamiliar Alternatives	115
4.1.2	Prior Beliefs about the Ingroup and Outgroup	125
4.2	How We Update Beliefs	132
4.2.1	On Availability, Frequency, and Probability	133
4.2.2	Distorted Memories	141
4.2.3	Why We Defend Our Beliefs	147
4.2.4	The Role of Social Identity in the Belief Formation Process	160
4.3	About the Beliefs We Learn	164
4.3.1	The Importance of Historical Circumstances	165
4.3.2	Self-Fulfilling Prophecies and Reproduction of Social Conditions	168
4.3.3	On the Structure of Society	172
5	Reassembling Discrimination	181
5.1	A Descriptive Model of Discrimination	182
5.2	Implications for a Normative Theory of Discrimination	189
6	Conclusion	197
