1.2.5 Amount and quality of soft tissues	25	1.6 Tooth preparation: current concepts for material selection	89	
1.2.6 Occlusal and functional requirements	28	1.6.1	Introduction	90
1.2.7 Conclusions	34	1.6.2	Minimally invasive preparation techniques	90
1.2.8 References	34	1.6.3	Defect-oriented preparation techniques for posterior teeth: onlays, overlay-veneers, and partial crowns	107
1.3 Technical factors	37	1.6.4	Conventional crown and fixed dental prosthesis (FDP) preparation technique: the universal tooth preparation	110
1.3.1 Introduction	38	1.6.5	Virtual diagnostics and guided tooth preparation	117
1.3.2 Conventional vs computer-aided manufacturing techniques	38	1.6.6	Resin-bonded fixed dental prosthesis (RBFDP) preparation	120
1.3.3 Optical factors influencing the material selection	38	1.6.7	Conclusions	121
1.3.4 Monolithic and veneered restorations	43	1.6.8	References	126
1.3.5 Conclusions	53			
1.3.6 References	54			
1.4 Diagnostics	55			
1.4.1 Introduction	56			
1.4.2 Esthetic parameters to be evaluated: step-by-step checklist	56			

2.1.5	Anterior & posterior regions: Traditional veneers after undetected celiac disease (10 veneers – maxillary premolar to premolar)	228	2.3.3	Posterior regions: Defect-oriented restoration of endodontically treated posterior tooth	394
2.1.6	Anterior & posterior regions: Traditional veneers with the application of augmented reality (10 veneers – maxillary premolar to premolar)	236	2.3.4	Posterior regions: Defect-oriented restorations (direct computer-aided composite build-up)	398
2.1.7	Anterior & posterior regions: Traditional veneers with the application of augmented reality and orthodontic pretreatment (six maxillary anterior teeth)	246	2.4	Conventional single crowns (SCs)	407
2.1.8	Anterior & posterior regions: 360-degree and occlusal veneers with a single implant restoration (seven mandibular teeth and posterior implant)	258	2.4.1	Anterior regions: Anterior SC with non-discolored abutment tooth	408
2.1.9	Complex situations: Full-mouth rehabilitation with traditional veneers and overlays	268	2.4.2	Anterior regions: Anterior SCs with discolored abutment teeth	416
2.1.10	Complex situations: Additional veneers and implant restorations (maxillary premolar to premolar)	288	2.4.3	Posterior regions: Posterior SC with non-discolored abutment tooth	424
2.2	Minimally invasive restorations (resin-bonded fixed dental prostheses [RBFDPs])	297	2.4.4	Posterior regions: Posterior SC with a discolored abutment tooth	428
2.2.1	Anterior regions: Failing central incisor after many years of periodontal treatment	298	2.4.5	Complex situations: Conventional SCs and fixed dental prostheses (FDPs)	434
2.2.2	Anterior regions: Congenitally missing lateral incisor (RBFDP after orthodontic pretreatment)	310	2.4.6	Complex situations: SCs in combination with an implant	448
2.2.3	Anterior regions: Congenitally missing lateral incisors (RBFDP after orthodontic pretreatment)	320	2.5	Tooth-supported all-ceramic single crowns (SCs), fixed dental prostheses (FDPs), and a removable telescopic restoration	461
2.2.4	Anterior regions: Full-mouth rehabilitation with congenitally missing teeth (RBFDPs, veneers, and overlays after orthodontic treatment)	332	2.5.1	Anterior regions: Full-mouth rehabilitation	462
2.2.5	Complex situations: RBFDP and additional veneer in combination with orthodontic pretreatment	346	2.5.2	Posterior regions: Tooth-supported, all-ceramic three-unit fixed dental prosthesis (FDP)	494
2.3	Defect-oriented restorations	357	2.5.3	Posterior regions: The 3D-printed prototype	500
2.3.1	Posterior regions: Defect-oriented partial crowns and overlay in posterior regions	358	2.6	Implant-supported single crowns (SCs)	511
2.3.2	Posterior regions: Defect-oriented overlays in posterior regions	380	2.6.1	Anterior regions: Anterior implant-supported SC with GBR	512
			2.6.2	Anterior regions: Anterior implant-supported SC with GBR	526
			2.6.3	Anterior regions: Anterior implant-supported SC	534
			2.6.4	Posterior regions: Posterior implant-supported SC with GBR	544
			2.6.5	Posterior regions: Posterior implant-supported SC with GBR	550

2.6.6	Posterior regions: Posterior implant-supported SC and optical impression	556
2.6.7	Complex situations: Tooth- and implant-supported all-ceramic SCs and fixed dental prostheses (FDPs)	562
2.7	Implant-supported restorations	597
2.7.1	Anterior regions: Implant-supported four-unit fixed dental prosthesis (FDP)	598
2.7.2	Posterior regions: Implant-supported three-unit fixed dental prosthesis (FDP)	610
2.7.3	Posterior regions: Implant-supported fixed dental prosthesis with mesial cantilever (FDP)	620
2.7.4	Posterior regions: Implant-supported fixed dental prostheses (FDPs)	640
2.7.5	Complex situations: Full-arch implant-supported fixed restoration with pink ceramics (FDP)	648
2.8	Maintenance	663
2.8.1	Intraoral direct repair of an existing restoration	664
2.8.2	Maintaining an existing restoration	668
2.8.3	CAD/CAM-fabricated Michigan splint	674

Part III Long-term outcomes of fixed restorations679

3.1	Introduction	681
3.2	Tooth-supported veneers	681
3.3	Tooth-supported inlays and onlays	681
3.4	Tooth-supported SCs	681
3.5	Endocrowns	682
3.6	Tooth-supported conventional multiple-unit FDPs	684
3.7	Tooth-supported cantilever FDPs	685
3.8	Resin-bonded fixed dental prostheses (RBFDPs)	686
3.9	Implant-supported SCs	687
3.10	Implant-supported FDPs	691
3.11	Implant-supported cantilever FDPs	693
3.12	Combined tooth-implant-supported FDPs	693
3.13	References	696

Part IV Avoiding and managing complications703

4.1	Introduction	704
4.2	Success of tooth- and implant-supported restorations	704
4.3	Tooth-supported restorations	704
4.4	Implant-supported restorations	714
4.5	References	724
