

Contents

1	Introduction	1
1.1	Motivation	1
1.2	Research Question and Dissertation Goal	3
1.3	Coherence of the Dissertation Studies	6
1.4	Structure and Outline	8
2	The Social Capital View	11
2.1	The Evolution of the Social Capital Concept	12
2.2	Considering Social Capital Theorists	16
2.2.1	Pierre Bourdieu	17
2.2.2	James Samuel Coleman	20
2.2.3	Robert David Putnam	21
2.2.4	Janine Nahapiet and Sumantra Ghoshal	23
2.2.5	Nan Lin	27
2.3	Defining Social Capital	34
2.4	Social Capital Research Today	40
2.5	Characteristics of Social Capital compared to other Forms of Capital	44
2.6	Drawbacks of Social Capital	47
2.7	Social Capital in the Context of Organizations	49
2.8	Summary	51
3	Open Source Software and Firm Involvement	53
3.1	The Open Source Software Phenomenon	54
3.1.1	A Comparison of Open Source Software and Proprietary Software	54
3.1.2	An Outline of the Open Source Movement	56

3.1.3	The Understanding of Open Source Software at a Glance	58
3.2	Exposing Open Source Communities and Open Source Software Developers	62
3.2.1	Introducing Open Source Software Communities	62
3.2.2	Motivation of Open Source Software Developers	66
3.2.3	Motivation of Firms to get Involved in Open Source Software Communities	73
3.3	Business Models related to Open Source Software	75
3.4	Summary	80
4	The Linux Kernel Project	83
4.1	History of and Facts about the Linux Kernel	84
4.2	Governance of the Linux Kernel and the Linux Kernel Community	85
4.3	Explaining the Linux Kernel Development Process	88
4.4	Linux Kernel Project as Research Context	89
4.5	Summary	90
5	Collection and Cleanup of Network and Source Code Data	93
5.1	Linux Kernel Mailing List Data	93
5.1.1	The Process of Data Crawling	93
5.1.2	The Process of Data Cleaning	98
5.1.3	The Process of Contributor Categorization	100
5.2	Linux Kernel Source Code Data	104
6	Study I: Private-Collective Innovation and Open Source Software: Longitudinal Insights from Linux Kernel Development	109
6.1	Introduction	109
6.2	Theoretical Background	111
6.2.1	Open Source Software Contributors	111
6.2.2	Private-Collective Model of Innovation	114
6.3	Method	116
6.3.1	Data Collection and Coding of Contributor Categories	116
6.3.2	Social Network Analysis	117
6.4	Results	119
6.4.1	Comparison of In-Degree and Out-Degree	119
6.4.2	Comparison of Degree per Group	120
6.4.3	Longitudinal Analysis	122

6.5	Discussion and Conclusion	124
6.5.1	Discussion	124
6.5.2	Conclusion	125
6.5.3	Implications for Research	125
6.5.4	Limitations and Suggestions for Future Research	126
7	Study II: The Social Capital Effect on Value Contribution— Revealing Differences between Voluntary and Firm-Sponsored Open Source Software Developers	127
7.1	Introduction	127
7.2	Theoretical Background	129
7.2.1	The Concept of Social Capital	129
7.2.2	Open Source Software Communities	129
7.3	Hypotheses Development	130
7.3.1	Relations of Social Capital Dimensions to Each Other	130
7.3.2	Relations of Social Capital Dimensions to Contribution	132
7.3.3	Firm-Sponsorship as Moderator	134
7.4	Research Design	134
7.4.1	Setup of the Data to be Examined	134
7.4.2	Operationalization of Variables	136
7.4.3	Outlier Detection	141
7.4.4	Validity Consideration	142
7.5	Results	143
7.5.1	Descriptive Information about Linux Kernel Mailing List Actors in 2014	143
7.5.2	Descriptive Information about the Linux Kernel Source Code for 2014 and 2015	145
7.5.3	Correlations and Regression Results	148
7.6	Discussion, Conclusion and Implications	159
7.6.1	Discussion and Conclusion	159
7.6.2	Implications for Research	162
7.6.3	Implications for Management	164
7.6.4	Limitations of the Study	165
8	Study III: Social Capital and the Formation of Individual Characteristics—An Examination of Open Source Software Developers	167
8.1	Introduction	167

8.2	Hypotheses Development	169
8.3	Research Design	173
8.3.1	Utilized Constructs and Indicators	173
8.3.2	Conception and Method of Research	175
8.3.3	Conduct of the Survey	178
8.4	Data Analysis	180
8.4.1	Methods of Data Analysis	180
8.4.2	Survey Data Preparation	183
8.5	Results	185
8.5.1	Descriptive Information about the Linux Kernel Survey Participants	186
8.5.2	Confirmatory Factor Analysis	188
8.5.3	Correlations and Regression Results	192
8.6	Discussion, Conclusion and Implications	197
8.6.1	Discussion and Conclusion	197
8.6.2	Implications for Research	199
8.6.3	Implications for Management	201
8.6.4	Limitations of the Study	201
9	Summary, Conclusion and Outlook	203
9.1	Theoretical and Empirical Contribution	203
9.2	Implications for Research	206
9.3	Implications for Management	207
	Bibliography	209
