1	Introduction to NMR	1
2	Fundamentals	5
2.1	Basics of NMR	5
2.2	Magnetic Resonance Imaging (MRI)	9
2.2.1	Spatial encoding with MRI	10
2.2.2	Applied spin-echo imaging sequences	15
2.2.3	Short deadtime imaging sequences	16
2.2.4	MRI methods with pure phase encoding	19
2.2.5	MRI with low-power rf-excitation	20
2.3	Selective signal suppression and excitation	23
2.4	Investigation of natural porous media with MRI	27
2.4.1	Signal relaxation behavior in porous media	28
2.4.2	Soil characteristics	31
3	Advances in low-power Frank-sequence excitation	35
3.1	Introduction	35
3.2	Theory	38
3.3	Materials and Methods	44
3.3.1	Experimental implementation	44
3.3.2	Linear excitation	45
3.3.3	Methodology of colored Frank excitation	47
3.4	Results and discussion	50
3.4.1	Spectroscopy with Frank excitation	50
3.4.1.1	Spectroscopy with non-selective Frank excitation	50
3.4.1.2	Processing the response to Frank excitation	50
3.4.1.3	Excitation in the linear response regime	52
3.4.1.4	Permutation of wave packages	54

3.4.1.5	Selective excitation with colored Frank sequences . . .	55
3.4.1.6	Excitation in the linear response regime with colored Frank sequences	61
3.4.2	Frank excitation for spatial encoding	68
3.4.2.1	Non-selective Frank sequences for spatial encoding . .	68
3.4.2.2	Processing the response to Frank excitation with spa- tial encoding	70
3.4.2.3	Imaging in the linear response regime	72
3.4.2.4	2D Imaging with Frank excitation	73
3.4.2.5	Colored Frank sequences for spatial encoding	75
3.5	Conclusions	77
4	MRI of water-content changes in natural soil samples	79
4.1	Introduction	79
4.2	Material and Methods	82
4.2.1	Soil sample characteristics	82
4.2.2	Implementation of MRI experiments	82
4.2.3	Realization of a Multi-Step Outflow (MSO) integrated MRI ex- periment	88
4.3	Results and Discussion	88
4.3.1	Limitations of spin-echo imaging methods	88
4.3.2	Soil moisture quantification methodology	90
4.3.3	Soil moisture quantification using low-power Frank excitation .	96
4.3.4	Determination of hydraulic properties by MRI	103
4.4	Conclusions	106
5	Conclusions and Perspectives	109
