<b>Foreword</b>	<b>v</b>	<b>3</b>	<b>Soft tissue management and bone augmentation in implantology</b>	<b>75</b>
<b>Foreword of the first edition</b>	<b>vi</b>			
<b>Preface</b>	<b>vii</b>			
<b>Acknowledgments</b>	<b>viii</b>	3.1	Introduction	76
<b>Editors and Contributors</b>	<b>xi</b>	3.2	The basics of incisions, suturing techniques, and soft tissue healing	80
		3.3	Instruments	84
		3.4	Soft tissue management before augmentation	85
<b>1 Biology of bone regeneration in augmentative procedures</b>	<b>1</b>	3.5	Soft tissue management during augmentation and implantation	104
Reinhard Gruber	1	3.6	Soft tissue management during implant exposure	155
1.1 Introduction	2	3.7	Soft tissue management following prosthetic restoration	187
1.2 Cells of bone remodeling	3	3.8	References	197
1.3 Biology of bone regeneration	7			
1.4 Autograft resorption	14	<b>4 Mandibular bone block grafts: diagnosis, instrumentation, harvesting techniques, and surgical procedures</b>	<b>205</b>	
1.5 Osteoconductive characteristics of autografts	15	4.1	Introduction	206
1.6 Osteogenic properties of autografts	15	4.2	Biologic procedure for mandibular bone grafting	206
1.7 Osteoinductive properties of autografts	16	4.3	Techniques and methods for intraoral bone harvesting	229
1.8 Summary	17	4.4	Augmentation techniques	314
1.9 References	18	4.5	Bone remodeling and volume changes after grafting	449
		4.6	Conclusion	459
<b>2 Diagnosis and planning of the augmentation procedure</b>	<b>23</b>	4.7	References	472
2.1 Introduction	24			
2.2 Patient consultation	26			
2.3 Anamnesis	26			
2.4 Specific findings	34			
2.5 Choice of grafting technique	54			
2.6 Conclusion	62			
2.7 References	70			

<b>Special Appendix</b>	<b>477</b>	<b>7</b>	<b>Complex implant-supported rehabilitation from the temporary to the definitive restoration</b>	<b>553</b>
A. Use of the maxillary tuberosity (MT) in the immediate dentoalveolar restoration (IDR) technique	478	7.1	Introduction	554
References	479	7.2	Specific aspects of temporary restorations	554
B. The palatal bone block graft (PBBG)	482	7.3	Treatment planning	557
References	483	7.4	Classification of temporary restorations	559
C. Alumni case reports	485	7.5	Restorative concept	576
<b>5 Bone grafts from extraoral sites</b>	<b>499</b>	7.6	Fixed complex restoration: step by step	587
5.1 Introduction	500	7.7	Long-term provisional	589
5.2 Bone harvesting from the calvaria	500	7.8	Surgical procedures	589
5.3 Bone harvesting from the tibia	504	7.9	Final restoration	592
5.4 Bone harvesting from the iliac crest	511	7.10	Concluding remarks	599
5.5 References	531	7.11	References	606
<b>6 Clinical and scientific background of tissue regeneration via alveolar callus distraction</b>	<b>535</b>	<b>8</b>	<b>Risk factors and complications in bone grafting procedures</b>	<b>611</b>
6.1 Introduction	536	8.1	Introduction	612
6.2 History of the callus distraction	536	8.2	Risk factors	612
6.3 Principles of the callus distraction	537	8.3	Intraoperative complications	629
6.4 Devices	538	8.4	Postoperative complications	663
6.5 Surgical technique	538	8.5	Complications during implant placement after bone grafting	704
6.6 Distraction in different areas	544	8.6	Complications during implant exposure	716
6.4 Conclusion	546	8.7	Late complications after prosthetic restoration	721
6.5 References	550	8.8	References	736
			Index	745
