List of Contributors	<i>xiii</i>
Preface	<i>xvii</i>
General Introduction	<i>xix</i>

Part I Recent Progress on Spectroscopic Techniques 1

1	Polymer Spectroscopy – Spectroscopy from the Far-Ultraviolet to Far-Infrared/Terahertz and Raman Spectroscopy	3
	<i>Yukihiro Ozaki and Harumi Sato</i>	
1.1	Introduction to Polymer Spectroscopy	3
1.1.1	Outline of Polymer Spectroscopy	3
1.1.2	Brief History of Polymer Spectroscopy	5
1.2	Overview of Molecular Spectroscopy from the Far-Ultraviolet to Far-Infrared/Terahertz and Raman Spectroscopy in Polymer Research	6
1.2.1	IR and Raman Spectroscopy Analyses	6
1.2.2	FIR/Terahertz and Low-Frequency Raman Spectroscopy	8
1.2.3	Near-Infrared (NIR) Spectroscopy	8
1.2.4	SERS and TERS Spectroscopy	9
1.2.5	FUV Spectroscopy	9
1.3	Specific Examples of Molecular Spectroscopy Studies of Polymers	10
1.3.1	Infrared, Raman, and NIR Spectroscopic Evidence for the Coexistence of Hydrogen Bond Types in Poly(Acrylic Acid)	10
1.3.2	Low-Frequency Vibrational Modes of Nylon-6 Studied by Using IR and Raman Spectroscopies and Density Functional Theory Calculations	16
1.3.3	NIR Spectra of Linear Low-Density Polyethylene and Their Chemometrics Analysis	21
1.3.4	Study of the Crystallization Behavior of Asymmetric PLLA/PDLA Blend by IR and Raman Spectroscopy and Raman Imaging	23
1.3.5	3D SERS Imaging Using Chemically Synthesized Highly Symmetric Nanoporous Silver Microparticles	28

- 1.3.6 Tip-Enhanced Raman Scattering Spectroscopy Study of Local Interactions at the Interface of Styrene-Butadiene Rubber/Multiwalled Carbon Nanotube Nanocomposites 34
- 1.4 Perspectives for Polymer Spectroscopy 39
- References 41

2 FTIR Spectroscopy and Spectroscopic Imaging for the Analysis of Polymers and Multicomponent Polymer Systems 45

Huiqiang Lu, Andrew V. Ewing, and Sergei G. Kazarian

- 2.1 Investigation of Polymers Using FTIR Spectroscopy and Spectroscopic Imaging 45
 - 2.1.1 Investigation of Miscibility in Polymer Blends 46
 - 2.1.2 Investigation of Intermolecular Interactions 47
 - 2.1.2.1 Investigation of Partially Miscible PMMA-PEG Blends Using Two-Dimensional Disrelation Mapping 48
 - 2.1.3 Investigation of Crystallization in Polymers 51
 - 2.1.3.1 Investigation of Solvent-Induced Crystallization in Polymers 51
 - 2.1.3.2 Investigation of the Crystallization Process of PHB, PLLA, and Their Blends 53
- 2.2 Investigation of Polymers Subjected to High-Pressure or Supercritical CO₂ Using FTIR Spectroscopy and FTIR Spectroscopic Imaging 55
 - 2.2.1 Morphology of Polymeric Materials Under High-Pressure or Supercritical CO₂ 56
 - 2.2.2 Investigation of Interaction in Polymers Under High-Pressure or Supercritical CO₂ 59
 - 2.2.2.1 Investigation of the Effect of High-Pressure CO₂ on the H-Bonding in PEG-PVP Blends 60
 - 2.2.2.2 Investigation of the Mechanism of Interaction Between CO₂ and Polymers Through the Thermodynamic Parameters Produced from In Situ ATR-FTIR Spectroscopy 61
 - 2.2.3 Investigation of Crystallization in Polymers Under High-Pressure or Supercritical CO₂ 61
 - 2.2.4 The Investigation of Structural Changes and Crystallization Kinetics of Polymers Exposed to High-Pressure CO₂ Through In Situ High-Pressure FTIR and FT-Raman Spectroscopy 64
 - 2.2.5 Investigation of Swelling and CO₂ Sorption into the Polymers Under High-Pressure or Supercritical CO₂ 65
- 2.3 Conclusion 67
- References 68

3 Interfaces in Polymer Nanocomposites Characterized by Spectroscopic Techniques 75

Liliane Bokobza

- 3.1 Introduction 75
- 3.2 Types of Interactions at the Interface 76

3.3	Characterization of the Interfaces	80
3.3.1	Fluorescence Spectroscopy	82
3.3.2	Solid-State NMR Spectroscopy	85
3.3.3	Vibrational Spectroscopy	88
3.3.3.1	Infrared Spectroscopy	89
3.3.3.2	Raman Spectroscopy	91
3.4	Conclusions	95
	References	96
4	Far-Infrared/Terahertz and Low-Frequency Raman Spectroscopies in Polymers	107
	<i>Harumi Sato</i>	
4.1	Introduction	107
4.2	Intermolecular Hydrogen Bonds in the Low-Frequency Region of PHB by QCCs	108
4.3	Several Types of Intermolecular Hydrogen Bonds in PCL	109
4.4	Stress-Induced Crystal Transition of Polybutylene Succinate (PBS)	113
4.5	The Differences in Intermolecular Hydrogen Bonding Between PET and PBT	115
4.6	THz Imaging of Polymer Film	117
4.7	Conclusions	120
	References	120
5	Near-Infrared Spectroscopy and Imaging of Polymers	125
	<i>Daitaro Ishikawa, Yuta Hikima, and Yukihiro Ozaki</i>	
5.1	Introduction to NIR Spectroscopy	125
5.1.1	Principles of NIR Spectroscopy	125
5.1.2	Characteristics and Advantages of NIR Spectroscopy	126
5.1.3	Analysis of NIR Spectra	126
5.2	Applications to Polymer Science and Engineering of NIR Spectroscopy	128
5.2.1	Polarized NIR Spectroscopy Studies of Molecular Orientation of Polymers	128
5.2.2	Isothermal Crystallization Kinetics of Poly(3-hydroxybutyrate)	134
5.2.3	Crystallization of Poly(3-hydroxybutyrate-co-3-hydroxyhexanoate) During Melt Extrusion Promoted by Residual Crystals	140
5.2.3.1	Outline of Online NIR Analysis and Online NIR Monitoring of the Residual Crystal Amount at the Extruder Outlet Nozzle	140
5.2.3.2	Amount of Residual Crystals at the Extruder Outlet	141
5.2.3.3	Crystallization of Extruded Strands	145
5.2.3.4	Analysis of Extruded Strand Crystallization Using the Avrami Equation	146
5.3	NIR Imaging for Polymer Sciences	148
5.3.1	Introduction	148
5.3.2	Theory of NIR Imaging	148

- 5.3.2.1 Acquisition of Hypercube 148
- 5.3.2.2 Data Transfer and Mapping 149
- 5.3.2.3 Feature of NIR Imaging Devices 150
- 5.3.3 Applications of NIR Imaging 151
- 5.3.3.1 Monitoring of Crystal Evolution Combined with Chemometrics 151
- 5.3.3.2 Quality Evaluation Potential for Wide Area 153
- 5.3.3.3 Diffusion Process Monitoring 153
- 5.3.3.4 Degradable Process Monitoring of Biodegradable Polymer 154
- 5.3.3.5 Rapid Evaluation of the Water Content in PLA Pellets 156
- 5.3.3.6 Nondestructive Detection of Degraded Polylactic Acid Moldings 157
- References 160

6 Far Ultraviolet Spectroscopy for Polymers 165

Yusuke Morisawa and Nami Ueno

- 6.1 Introduction 165
- 6.2 Measurement of ATR-FUV Spectra of Polymer 166
- 6.3 ATR-FUV Spectra of Nylons 167
- 6.4 ATR-FUV Spectra of Poly(3-hydroxybutyrate) (PHB) and Its Graphene Nanocomposites 172
- 6.5 ATR-FUV Study of Poly(ethylene glycol) (PEG) and Its Complex with Lithium Ion (Li^+) 176
- 6.6 Summary 181
- References 181

7 Synchrotron-Based UV Resonance Raman Spectroscopy for Polymer Characterization 183

Barbara Rossi, Mariagrazia Tortora, Sara Catalini, Alessandro Gessini, and Claudio Masciovecchio

- 7.1 Basic Principles of Raman and UV Resonance Raman Spectroscopy 183
 - 7.1.1 Molecular Vibrations and Raman Effect 183
 - 7.1.2 Resonance Raman (RR) Scattering 191
 - 7.1.3 Fundamental Applications of UV Resonance Raman Spectroscopy 193
- 7.2 Synchrotron-Based UV Resonance Raman: Basic Principles and Instrumentation 193
 - 7.2.1 Synchrotron-Based UVRR Setup on IUVS@Elettra 194
- 7.3 SR-UVRR Characterization of Biopolymers 197
- 7.4 UV Resonance Raman Studies on Polymeric Hydrogels 203
 - 7.4.1 Water Confinement in Polysaccharide Hydrogels 204
 - 7.4.2 Phase Transition in Thermo-Sensitive Polysaccharide Hydrogels 208
 - 7.4.3 Water and Polymer Dynamics in pH-Responsive Polysaccharide Hydrogels 212
- 7.5 Conclusions 215
- Acknowledgment 217
- References 217

8 Sum Frequency Generation Spectroscopy for Understanding the Polymer Dynamics at Buried Interfaces 227

Daisuke Kawaguchi and Keiji Tanaka

- 8.1 Introduction 227
- 8.2 Principle 228
- 8.3 Examples 230
 - 8.3.1 Nonsolvent Interface 230
 - 8.3.1.1 Polystyrene 230
 - 8.3.2 Solid Interface 238
 - 8.3.2.1 Polystyrene 238
 - 8.3.2.2 Polyisoprene 240
 - 8.3.2.3 Poly(styrene-co-butadiene) Rubber [89] 244
- 8.4 Conclusions 250
- Acknowledgements 251
- References 251

9 Application of Two-Dimensional Correlation Spectroscopy (2D-COS) in Polymer Studies 259

Yeonju Park, Isao Noda, and Young Mee Jung

- 9.1 Introduction 259
- 9.2 Theory 260
 - 9.2.1 Background 260
 - 9.2.2 Properties of 2D-COS 260
- 9.3 Applications of 2D-COS in Polymer Studies 261
 - 9.3.1 Applications of Conventional 2D-COS 261
 - 9.3.1.1 Biodegradable Polymers 261
 - 9.3.1.2 Thermo-Responsive Polymers 262
 - 9.3.2 2D Hetero-Spectral Correlation Analysis 267
 - 9.3.3 Two-Dimensional (2D) Gradient-Mapping Method 269
 - 9.3.4 Chemometric Techniques Combined with 2D-COS 270
 - 9.3.5 Smooth Factor Analysis 272
 - 9.3.6 Projection 2D-COS 275
 - 9.3.7 2D-COS for Hyperspectral Imaging 278
- 9.4 Conclusions 284
- References 284

10 Molecular Dynamics in Polymer Science 297

Mateusz Z. Brela, Marek Boczar, and Marek J. Wójcik

- 10.1 Introduction 297
- 10.2 Historical and Theoretical Background 299
- 10.3 Applications 302
 - 10.3.1 Vibrational Spectra of Hydrogen-Bonded Polymers 303
 - 10.3.2 Studies of Interactions Between Polymers and Water 304
 - 10.3.3 Mechanical Properties of Polymers 306
 - 10.3.4 Interphase Interactions 307

10.4	Summary and Perspectives	309
	Acknowledgment	311
	References	311
11	Spectroscopic Analysis of Structural Transformations Associated with Poly(lactic acid)	317
	<i>Shaw L. Hsu and Xiaozhen Yang</i>	
11.1	Introduction	317
11.2	Spectroscopic Tools	319
11.2.1	Vibrational Features of PLA Crystals	321
11.2.2	Analysis of Disordered PLA Chains	323
11.2.3	Description of Anisotropic PLA – Polarized Spectra	327
11.3	Simulation Studies for Both Ordered and Disordered Structures	329
11.4	Analysis of Conformational Changes in PLA During Deformation	334
11.5	Aging Behavior in PLA	338
11.6	Conclusion	340
	Acknowledgment	340
	References	340
	Part II Topical Polymers Studied by Spectroscopy	345
12	Probing Molecular Events in Self-Healable Polymers	347
	<i>Qianhui Liu, Lei Li, and Marek W. Urban</i>	
12.1	Introduction	347
12.2	Microphase Separation	349
12.3	Entropically Driven Self-Healing	353
12.3.1	Free Radical and Cationic Recombination	355
12.3.2	Van der Waals Interactions	360
12.3.3	Chemical Sensing of Damage–Repair Cycle	361
	Acknowledgments	365
	References	365
13	Recent Application of Vibrational Spectroscopy to Conjugated Conducting Polymers	367
	<i>Yukio Furukawa</i>	
13.1	Introduction	367
13.2	Carriers	369
13.3	Optical Absorption Spectra Upon Chemical Doping	371
13.3.1	P3HT	371
13.3.2	Poly(2,5-bis(3-hexadecylthiophene-2-yl)thieno[3,2- <i>b</i>]thiophene) (PBTTC-C16)	372
13.4	Raman Spectra of Positive Polarons and Bipolarons Generated Upon Chemical Doping	374

13.4.1	P3HT	374
13.4.2	PBTTC-C16	375
13.5	Carriers and Electrical Properties Based on ILGTs	377
13.5.1	ILGTs	377
13.5.2	Raman Spectra of ILGTs Fabricated with P3HT	378
13.5.3	Raman Spectra of ILGTs Fabricated with PBTTC-C16	380
13.6	Carrier Mobilities	383
13.7	Raman Images in the Channel Region	383
13.8	Carrier Dynamics in Bulk Heterojunction Films	386
13.8.1	Photoexcitation Dynamics on Femto- and Picosecond Time Scales	386
13.8.2	Microsecond Recombination Dynamics of Long-Lived Carriers	387
13.9	Conclusions	388
	References	388
14	Vibrational Spectroscopy for Fluoropolymers and Oligomers	393
	<i>Takeshi Hasegawa</i>	
14.1	Perfluoroalkyl-Containing Compounds	393
14.1.1	Molecular Conformation on Phase Diagram	393
14.1.2	Molecular Vibration of an R _f Group	396
14.1.3	The SDA theory	400
14.2	Spectroscopy for R _f Compounds	402
14.2.1	ROA analysis of R _f Compounds	402
14.2.2	Surface Modes of Phonon and Polaron	405
14.2.3	Summary and Perspective	408
	References	409
15	Probing Structures of Conductive Polymers with Vibrational Spectroscopy	413
	<i>Jianming Zhang and Yuan Yuan</i>	
15.1	Introduction	413
15.2	Application of Vibrational Spectroscopy	413
15.2.1	Chain Packing/Aggregate Mode Identification	413
15.2.2	Conformation-Sensitive Bands Identification	414
15.2.3	Doping-Sensitive Bands Identification	415
15.2.4	Thermally Induced Phase Transitions	417
15.2.5	Structural Dynamics	418
15.2.6	Chemical Composition/Morphology Analysis in Conductive-Polymer-Based Blends	420
15.2.7	Surface/Interface Molecular Orientation	423
15.2.8	Structure and Dynamics of Charge Carriers	425
15.2.9	Electric-Field-Induced Structural Changes	429
15.3	Conclusion	431
	References	431

16	Weak Hydrogen Bonding in Biodegradable Polymers	435
	<i>Harumi Sato</i>	
16.1	Introduction	435
16.2	Weak Hydrogen Bonding in Poly(3-hydroxybutyrate)	436
16.3	Comparison Between Weak and Strong Hydrogen Bonds	438
16.4	Difference in the Side Chain Length; PHB and PHV	439
16.5	Polyhydroxyalkanoate Copolymers	442
16.6	Crystallization Process of PHB	443
16.7	Other Kinds of CH \cdots O Hydrogen Bonding	443
16.8	Conclusions	447
	References	449
