Preface — V

Notations — VII

Introduction — XV

Part I: Preliminary material

- 1 What is a singular trace? — 3**
 - 1.1 Compact operators — 3
 - 1.2 Calkin correspondence — 11
 - 1.3 Examples of traces — 17
 - 1.3.1 The trace — 17
 - 1.3.2 The Dixmier trace — 18
 - 1.3.3 Spectral formulation of traces — 22
 - 1.4 Notes — 23
- 2 Singular values and submajorization — 29**
 - 2.1 Projections in $\mathcal{L}(H)$ — 29
 - 2.2 Singular values — 34
 - 2.3 Submajorization — 43
 - 2.4 Ideals and traces — 55
 - 2.5 Examples of ideals — 65
 - 2.6 Notes — 72

Part II: Theory of traces on ideals of $\mathcal{L}(H)$

- 3 Calkin correspondence for norms and traces — 83**
 - 3.1 Introduction — 83
 - 3.2 Calkin correspondence for quasinorms — 87
 - 3.3 Discrete Figiel–Kalton theorem — 92
 - 3.4 Calkin correspondence for traces — 99
 - 3.5 Existence and structure of traces — 101
 - 3.6 Notes — 107
- 4 Pietsch correspondence — 113**
 - 4.1 Introduction — 113
 - 4.2 Pietsch correspondence for ideals — 119

4.3	Pietsch correspondence for traces —	123
4.4	Pietsch correspondence for quasinorms —	126
4.5	Lattice of regular traces —	131
4.6	Notes —	138
5	Spectrality of traces —	141
5.1	Introduction —	141
5.2	Normal operators in the commutator subspace —	145
5.3	Subharmonic functions on matrix algebras —	151
5.4	Kalton's estimate for quasinilpotent operators —	159
5.5	Logarithmic submajorization estimates for quasinilpotent operators —	165
5.6	Quasi-nilpotent operators are commutators —	170
5.7	Notes —	175

Part III: Formulas for traces on $\mathcal{L}_{1,\infty}$

6	Dixmier traces and positive traces —	185
6.1	Introduction —	185
6.2	Extended limits —	190
6.3	Positive traces on $\mathcal{L}_{1,\infty}$ —	196
6.4	Dixmier traces on $\mathcal{L}_{1,\infty}$ —	205
6.5	Extension of traces to $\mathcal{M}_{1,\infty}$ —	208
6.6	Dixmier traces on $\mathcal{M}_{1,\infty}$ —	213
6.7	Notes —	219
7	Diagonal formulas for traces —	225
7.1	Introduction —	225
7.2	Diagonal formulation of a singular trace fails in general —	232
7.3	Modulated operators —	234
7.4	Weyl asymptotics and expectations —	241
7.5	Notes —	245
8	Heat trace and ζ-function formulas —	249
8.1	Introduction —	249
8.2	Heat trace functionals and Dixmier traces —	256
8.3	General heat trace functionals —	266
8.4	ζ -function residues and Dixmier traces —	276
8.5	Not every Dixmier trace is a ζ -function residue —	283
8.6	Notes —	288

9	Criteria for measurability — 295
9.1	Introduction — 295
9.2	Spectral description of measurability — 310
9.3	Examples of measurability — 315
9.4	Measurability criteria and heat traces — 322
9.5	Measurability criteria and ζ -functions — 327
9.6	Measurability criteria in $\mathcal{M}_{1,\infty}$ — 332
9.7	A Fubini Theorem — 338
9.8	Notes — 349
A	Miscellaneous results — 355
A.1	Subhankulov Tauberian theorem — 355
A.2	Operator inequalities — 361
A.3	Matrix inequalities — 364

Bibliography — 367

Index — 381
