

Contents

1	Accurate, Efficient and Comparable Measurements.....	9
1.1	Accurate Measurements	9
1.2	Efficient Measurements.....	11
1.3	Comparable Measurements	13
2	Analyzing the Measuring Job	18
2.1	Completely Defined Characteristic.....	18
2.2	Task-oriented Measurement Strategy – Measuring Recipes.....	31
3	Measurement Strategies – Evaluation Strategies.....	34
3.1	Inspection-able Datum	34
3.2	Association	39
3.3	Filtering	51
3.4	Defining the Presentation of Results.....	64
3.5	Strategy Documentation	74
4	Measurement Strategies – Sampling Strategies.....	75
4.1	Defining the Fixturing Strategy.....	75
4.2	Defining the Base Coordinate System.....	81
4.3	Stylus System Selection	84
4.3.1	Selecting the Stylus Material	86
4.3.2	Selecting the Stylus Tip Diameter	89
4.3.3	Selecting the Stylus Shaft and Stylus Extension	93
4.3.4	Documenting the Stylus System	96
4.4	Probing Parameters.....	97
4.5	Handling of Outliers.....	103
4.6	Temperature Compensation.....	105
5	Examples of Measurement Recipes.....	109
5.1	Measurement Recipe: Bore Hole in Metal.....	110
5.2	Measurement Recipe: Metal Shaft.....	117
5.3	Measurement Recipe: Cut Metal Surface	122
5.4	Measurement Recipe: Artificial Hip Ball	126
5.5	Roundings / Partial Arcs	128
5.6	Cast Measurement.....	131
5.7	Measurement Strategy Form	133

6	Ensuring Comparability and Accuracy	134
6.1	Test Equipment Capability	134
6.2	Version-safe Documentation	142
6.3	Measuring Result Verification	143
6.4	Measurement Process Assessment	144
7	Final Remarks.....	146
Appendixes		148
A	Internet Links to Coordinate Metrology	148
B	More Books from ZEISS Academy Metrology	149
C	Standards in Coordinate Metrology	152
D	Bibliography	159
E	Illustrations and Tables	165
F	Checklist (Excerpt from the MPA checklist)	169
G	Form for Measurement Strategy Documentation	179
H	Index	180
