1 Urbanisation and Its Challenges for Ecological Urban Development	1
Stephan Pauleit, Martin Sauerwein und Jürgen Breuste	
1.1 The World is Urban	1
1.1.1 Population Development and Urbanisation	1
1.1.2 Spatial Processes of Urban Development.	7
1.2 Ecological Challenges for the City of the Twenty-First Century.	15
1.2.1 The Livable City.	16
1.2.2 The Resource-Efficient City.	19
1.2.3 The Resilient and Versatile City	22
1.3 Urban Ecology as a Research and Solution Approach.	24
1.4 Conclusions	29
References.	32
2 What Are the Relationships Between the Spatial Urban Structure and the Ecological Characteristics of the City?	41
Stephan Pauleit	
2.1 Spatial Urban Structure	41
2.2 Land Use and Land Cover as Key Ecological Features of the City.	45
2.3 Ecological Analysis of the Urban Form.	47
2.3.1 Mapping of Biotopes and Urban Morphology Types.	47
2.3.2 The “patch” Model, Landscape Dimensions and Landscape Gradients	64
2.4 Conclusions	68
References.	71
3 What Are Urban Ecosystems and Why Are They Special?	79
Dagmar Haase und Martin Sauerwein	
3.1 Urban Ecosystems and Their Special Features	79
3.1.1 Ecosystem Research and City	79
3.1.2 Urban Ecosystems	80

3.2	Which Abiotic Characteristics Define Urban Ecosystems?	83
3.2.1	Urban Climate and Radiation Balance	83
3.2.2	Water Balance.	87
3.2.3	Soils as Subsoil for Urban Ecosystems	89
3.3	Demarcation, Classification and Presentation of Urban Ecosystems	95
3.4	Conclusions	99
	References.	103
4	What Are the Special Features of the Urban Habitat and How Do We Deal with Urban Nature?	107
	Jürgen Breuste	
4.1	The Urban Habitat is Different	107
4.1.1	Urban Nature	107
4.1.2	Flora and Vegetation of Urban Habitats	112
4.1.3	Animals of Urban Habitats.	116
4.2	Urban Habitats, Condition, Use and Maintenance.	120
4.2.1	The Concept of the Four Natural Types	120
4.2.2	Urban Forests	124
4.2.3	Urban Waters	132
4.2.4	Urban Gardens	137
4.2.5	Urban Brownfields	143
4.2.6	Structure and Dynamics of Urban Habitats	146
4.3	Management of Urban Nature	148
4.3.1	Tasks and Objectives of Urban Nature Conservation.	148
4.3.2	Practical Nature Conservation in the City - Worldwide	151
4.4	Conclusions	155
	References.	158
5	What Do Urban Ecosystems Do for the People in the City?	165
	Dagmar Haase	
5.1	Urban Ecosystems and Their Services.	165
5.2	Urban Ecosystem Services and Urban Land Use	171
5.3	Individual Consideration of Selected Important Urban Ecosystem Services	174
5.3.1	Local Climate Regulation Through Urban Ecosystems	174
5.3.2	Water Supply and Flood Regulation.	178
5.3.3	Recreation Function	184
5.3.4	On the Air Pollution Reduction Function of Urban Trees	190
5.3.5	Urban Agriculture - Local Food Production and Social Cohesion	192
5.3.6	Carbon Storage in the City—A Contribution to Reducing the Urban Footprint?	194
5.3.7	Urban Ecosystem Disservices	196

5.3.8 Synergy and Trade-Off Effects. 198

5.3.9 Conclusions on the Application of the Urban Ecosystem
Services Approach in Urban Planning 199

References. 201

**6 How Vulnerable Are Urban Ecosystems and How Can Urban
Resilience Be Developed with Them? 209**

Jürgen Breuste, Dagmar Haase, Stephan Pauleit und Martin Sauerwein

6.1 What is Vulnerability? 209

6.2 Vulnerability of Urban Ecosystems Through Open Material Cycles 211

6.3 Vulnerability to Natural Hazards 214

6.4 Effects of Climate Change 223

6.5 Urban Resilience—Dealing with Crises 227

6.5.1 What is Urban Resilience? 227

6.5.2 Growing Versus Shrinking Cities 229

6.5.3 Resilience of Urban Structures in Dynamic Change 230

6.5.4 Compact City Versus Sprawling City 233

6.5.5 Is Resilience Dependent on the Size of the City? 240

6.5.6 Adaptation to Climate Change 244

6.5.7 City and Surrounding Area as a Resilient Region 250

References. 255

**7 What Does the Eco-City of Tomorrow Look like and What Are the
Paths Leading to It? 263**

Jürgen Breuste

7.1 From vision to mission statement - urban development
in the twentieth century 264

7.1.1 The principle of the ideal city. 264

7.1.2 Ideal Cities as Models of Modernity in the
Twentieth Century 264

7.1.3 Sustainable urban development as a model for the twenty-first
century 271

7.2 Eco-Cities—Cities in Harmony with Nature 276

7.2.1 Eco-Cities—Sustainable Cities 276

7.2.2 Eco-city criteria 282

7.2.3 The Real Eco-City—Examples 287

7.3 Conclusions 306

8 What is Urban Ecology and What Are Its Applications in Urban Development?	313
Jürgen Breuste, Dagmar Haase, Stephan Pauleit und Martin Sauerwein	
8.1 It is About the City of the Future!	313
8.2 It is All About Urban Structure!.	316
8.3 It is All About the Special Nature of Urban Ecosystems!	317
8.4 It is All About Urban Nature!.	317
8.5 It is About Ecosystem Services for People in the City!	319
8.6 It is About the Resilience of Urban Ecosystems!.	320
8.7 It is All About Eco-Cities!	321
References.	322
