

Table of Contents

8	Integral Calculus	1
8.1	Integration	3
8.2	Fundamental Theorem of Calculus	8
8.3	Rules of Integral Calculus	17
8.4	Integration Methods	19
8.4.1	Integration by Parts	19
8.4.2	Integration by Substitution	21
8.4.3	Partial Fraction Decomposition	27
8.5	Improper Integrals	33
8.6	Applications of Integral Calculus	35
8.7	More Applications of Integral Calculus	44
8.7.1	Averaging property	44
8.7.2	Arc length	45
8.7.3	Curvature	48
8.7.4	Volume and surfaces of bodies of revolution	49
8.8	Problems on Integral Calculus	52
9	Taylor Series	55
9.1	Series of Numbers	58
9.1.1	Example	60
9.1.2	Majorant Criterion	64
9.1.3	Quotient criterion	65
9.1.4	Leibniz's Criterion	67
9.2	Power Series	69
9.3	Taylor's Series	75
9.4	Applications	85
9.5	Complex Functions	90
9.6	Problems on Series and Taylor Series	98
10	Differential Calculus for Multivariate Functions	101
10.1	Functions with Several Variables	103
10.1.1	Introduction and Examples	103
10.1.2	Representation of Functions with Two Variables	106
10.2	Continuity	111
10.3	Differential Calculus	113
10.3.1	Partial Derivative	113
10.3.2	Total Differentiability	121
10.3.3	Gradient and Directional Derivative	123
10.3.4	Taylor's Theorem	129
10.4	Applications of Differential Calculus	136
10.5	Problems on Differential Calculus	158

11	Integral Calculus for Multivariate Functions	161
11.1	Double Integrals (Domain Integrals)	163
11.1.1	Definition	163
11.1.2	Calculation of Double Integrals	166
11.1.3	Reduction of Double Integrals to Single Integrals	169
11.1.4	Applications	171
11.2	Triple Integrals	176
11.2.1	Definition and Calculation of Triple Integrals	176
11.2.2	Applications	178
11.3	Problems on Integral Calculus	183
12	Laplace Transform	185
12.1	Laplace Transform	189
12.2	Inverse Laplace Transform	194
12.3	Two Basic Characteristics	196
12.3.1	Linearity	196
12.3.2	Laplace Transform of the Derivative	198
12.4	Methods of Inverse Transformation	201
12.5	Applications of the Laplace Transform	204
12.6	Problems on Laplace's Transform	207
13	First-Order Differential Equations	209
13.1	Preliminary Problems	212
13.2	Solving Homogeneous Differential Equations	216
13.3	Solving Inhomogeneous Differential Equations	217
13.4	Linear Differential Equations with Constant Coefficients	226
13.4.1	Homogeneous Solution	226
13.4.2	Particular Solution	227
13.5	1st Order Non-linear Differential Equations	230
13.5.1	Differential Equation with Separable Variables	230
13.6	Numerical Solution of 1st Order DEq	233
13.7	Problems on First-Order Differential Equations	237
A	Appendix	241
	Glossary Volume 1 English	241
	Glossary English	247
	Glossary Deutsch	250
