1	Struggles and Successes	1
1.1	Struggles	1
1.2	Other Major Considerations.....	2
1.3	Anatomical Landmarks as Moving Targets.	3
1.4	Winds of Change	3
1.5	The Rocky Road to Success.....	4
1.6	Scope of This Book	6
1.7	Evidence and Trust.....	7
1.8	The Internet	7
1.9	Results and Outcomes (Apples and Oranges)	8
1.10	The Vision	8
1.11	Listening to Patients' Demands	8
2	History as Documented by Patents and Patent Applications	11
3	Morphology of BOI Implants and Related Designs.....	25
3.1	Morphology of the Threaded Pin	25
3.2	Load Transmission by Disks or Rings....	27
3.3	Distance Between Crestal and Basal Load-Transmitting Surfaces	27
3.4	Shape of Basal Load-Transmitting Surfaces	28
3.5	Structural Resilience of Implants	29
3.6	Configuration and Relative Dimensions of the Implant Components	29
3.7	Surface Areas of Implants.....	30
3.8	Elastic Versus Stiff Implant-Restoration Systems	31
3.9	Retention Systems for Prosthetic Superstructures (ED Versus ID Types) ...	32
3.10	Conclusion.....	34
4	Insertion Tools and Implant Designs.....	35
4.1	Insertion Tools for External Thread Designs.....	35

4.1.1	External Implants (ED)	36
4.1.2	Abutments and Components for External-Thread Designs	38
4.1.3	Tools for External-Thread Implants	40
4.1.4	Compatible Crestal Implant Types: KOS System and S Implants	40
4.1.5	Semi-permanent Bonding on ED Implants	40
4.2	Internal Designs with an External Hexagon (ID System)	43
4.3	Internal BOI Designs with an External Octagon	43
4.3.1	Internal-Thread Designs (IDO System)	43
4.4	Tools for Surgery	44
4.5	Internal Versus External Thread Designs	44

5 Equipment and Surgical Techniques 49

5.1	Plans and Outcomes and the Coexistence Between Living and Dead Objects	49
5.2	General Considerations	49
5.3	Irrigation	52
5.4	Configuration of the Load-Transmitting Surface and Threaded Pin	53
5.5	Combination with Screw Implants and Bending of Base-Plate Areas	59
5.6	Intraoperative Bleeding	61
5.7	Medication	63
5.8	Implant Positioning for Prosthetic Treatment	65
5.9	Injury to Adjacent Teeth	65
5.10	Intraoperative Vision	66
5.11	Analysing the Causes of Implant Loss	67

6 Diagnostics 69

6.1	Introduction	69
6.1.1	The Strategic Task	69
6.1.2	Exploring the Treatment Objective	69
6.2	Orthopantomographs	69
6.3	Panoramic Radiograph of the Skull	70
6.4	Lateral Teleradiographs	70
6.5	Palpatory Examination	70

6.6	Functional Diagnosis and Restorative Alternatives.....	71
6.6.1	Non-correctable Dysfunctions.....	71
6.7	Storage Requirements	72
6.8	Systemic Health Diagnosis	73
6.9	Structural History of the Implant Site ...	73
6.10	Diagnosis of Speech and Hearing Function	73
7	Treatment Planning	77
	<i>S. Ihde and T. Maier</i>	
7.1	Scope of Therapy	77
7.2	Number of Implants for Complete Bridges.....	77
7.2.1	Maxillary Restorations	78
7.2.2	Mandibular Restorations.....	79
7.3	Which Jaw Should Be Restored First?	80
7.4	When Should the Implants Be Loaded? ..	80
7.5	General Biomechanical Considerations in Treatment Planning.....	81
7.6	Cementing Versus Screwing	84
7.7	Reducing Functional and Parafunctional Loads by Prosthetic Treatment.....	84
7.8	Reducing Functional Loads by Drug Treatment.....	85
7.8.1	Dosage	86
7.8.2	Adverse Effects	86
7.8.3	Indications and Rationale.....	86
7.9	Extraction Versus Preservation of Natural Tooth Structures	88
7.10	Temporary Restorations	88
7.11	Scope of Restorative Treatment	88
7.12	The Significance of Third Molars	89
7.13	Summary	93
7.14	Final Comments	93
8	Aspects of BOI Treatment in Periodontally Involved Cases...	95
	<i>S. Ihde, V. Lekovic and Z. Aleksic</i>	
8.1	Introduction and Definition.....	95
8.2	Immediately Loaded BOI at Periodontally Involved Sites.....	99
8.2.1	Introduction	99
8.2.2	Objectives	99
8.2.3	Materials and Methods	99
8.2.4	Surgical Procedure.....	99
8.2.5	Prosthetic Protocol.....	99
8.2.6	Follow-Up	100
8.2.7	Results	100
8.3	Optimal Position of BOI Implants in the Vicinity of Extraction Sockets.....	101

8.4	Peculiarities Concerning Implants in Periodontally Involved Tissue	101
8.5	Summary	101
9	Four-Dimensional Considerations of Bone Morphology and Mechanics .	103
9.1	Properties of Bone Tissue in the Oral Environment	103
9.1.1	Cortical Bone	103
9.1.2	Why Does BMU Activation Occur?	105
9.1.3	Interactions Between Joints and Bone Changes	107
9.1.4	Hormonal and Mechanical Influences During Growth and Aging	107
9.1.5	Disuse Atrophy, Blood Supply and Periodontal Problems	108
9.1.6	Aspects of Periodontal Disease	109
9.1.7	Role of Direct Bone Stimulation in Crestal Implants	110
9.1.8	Force, Deformation, Pressure and Flow . .	111
9.1.9	The 0-1 Property and the Self-Trabeculation Model - Micromodelling	111
9.2	Form Follows Function	113
9.2.1	Conclusions	124
9.3	Impact of Compression and Tension on the Vertical Bone Level	126
9.3.1	Introduction	126
9.3.2	Background Considerations Regarding Vertical Bone Growth	127
9.3.3	Clinical Application	129
9.3.4	Summary	130
9.4	Hormonal Influences and Drug Treatment	131
9.4.1	Effects of Hormonal Deficits	131
9.4.2	Fractures After Implant Therapy	134
9.4.3	Fractures and Osteomyelitis	135
9.4.4	Psychosocial Aspects	136
9.4.5	Conclusion	136
9.5	Macroscopic Functional Anatomy	137
9.5.1	Introduction	137
9.5.2	Age-Related Changes in Jaw Morphology	137
9.5.3	Maxillary Morphology	138
9.5.4	The Problem of Symmetry (Which Was First: The Hen or the Egg?) .	138
9.5.5	Summary: Looking into the Past	139
9.6	Microscopic Anatomy and Nutrient Supply	139
9.6.1	Why and How "All Things Are in Flux" . .	139
9.6.2	Clinical Considerations	141
9.6.3	Holistic Considerations on Implant Therapy in Fields of Disturbance	142

9.7	Simultaneous Mineralization and Remodelling Tendencies	144
	<i>F. Krass and S. Ihde</i>	
10	Functional Considerations as the Guiding Treatment Principle	149
10.1	Long-Term Function Requires Persistent Balance	149
10.2	Introduction	150
10.3	Decompensation of the Masticatory Apparatus	150
10.3.1	Avoidance Patterns.....	151
10.3.2	Unilateral Chewing and Side Switching ..	151
10.3.3	Restricted Movement.....	153

Presentation 1: Introduction

Presentation 2: Maintenance

- 1 Insertion of BOI implants and KOS for bar-supported restoration
- 2 Bleeding on BOI implant insertion, anterior mandible
- 3 Animation: Elastic BOI implant
- 4 Animation: Type 1c construction
- 5 Animation: Type 1f construction
- 6 Animation: Type 1g construction
- 7 Placement of BOI implants below the mandibular nerve.
- 8 Supporting implant, maxilla
- 9 Trans-sinus implant placement
- 10 Insertion of pre-bent BOI implant
- 11 Supporting implant in the maxilla
- 12 Bending anterior implant upward, plus membrane
- 13 Insertion of IDOT implant
- 14 BOI implant insertion in the distal mandible
- 15 KOS screws implants and BOI implants in the mandible

-
- 16 Three BOI implants and one STC implant
in the maxilla
 - 17 Maintenance after the installation
of the bridge
 - 18 Change of chewing pattern I
 - 19 Change of chewing pattern II
 - 20 Change of chewing pattern III
 - 21 BOI implants in the upper jaw,
bending of vestibular struts
 - 22 BOI implants and KOS screw implants
in the upper jaw
 - 23 Placement of a tuberopterygoid screw
 - 24 Replacement of a fractured BOI implant
 - 25 Correction of early contacts in distal area
 - 26 Failure of a BOI implant due to missing
masticatory corrections and vertical
bone growth
as response to function
 - 27 Failure of BOI implants due to missing
masticatory corrections
 - 28 Bibliography on lateral implants
 - 29 Preparation of a fibrin mebrane
