Editors' Introduction — V

Per Enflo's personal thoughts about Victor Lomonosov — VII

María D. Acosta and Maryam Soleimani-Mourchehkhori

1 Bishop–Phelps–Bollobás property for positive operators between classical Banach spaces — 1

Asuman Güven Aksoy, Mehmet Kılıç, and Şahin Koçak

2 Isometric embeddings of finite metric trees into $(\mathbb{R}^n, d_1)$ and $(\mathbb{R}^n, d_\infty)$ — 15

Chafiq Benhida and Raúl E. Curto

3 Iterates of the spherical Aluthge transform of 2-variable weighted shifts — 25

Jesús M. F. Castillo

4 The freewheeling twisting of Hilbert spaces — 43

Lixin Cheng, Mikio Kato, and Wen Zhang

5 A survey of ball-covering property of Banach spaces — 67

Andrea Colesanti and Galyna Livshyts

6 A note on the quantitative local version of the log-Brunn–Minkowski inequality — 85

James E. Corbin and Peter Kuchment

7 Spectra of “fattened” open book structures — 99

Sheldon Dantas, Sun Kwang Kim, Han Ju Lee, and Martin Mazzitelli

8 On some local Bishop–Phelps–Bollobás properties — 109

Stephen Deterding

9 Bounded point derivations of fractional orders — 123

Gilles Godefroy

10 Invariant subspaces: some minimal proofs — 131

Sophie Grivaux

11 On the Hypercyclicity Criterion for operators of Read's type — 139

A. J. Guirao, S. Lajara, and S. Troyanski

- 12 Three-space problem for strictly convex renormings — 149**

Vladimir Kadets, Ginés López, Miguel Martín, and Dirk Werner

- 13 Norm attaining operators of finite rank — 157**

Seychelle S. Khan, Mutasim Mim, and Mikhail I. Ostrovskii

- 14 Isometric copies of ℓ_∞^n and ℓ_1^n in transportation cost spaces on finite metric spaces — 189**

Edward Kissin, Victor S. Shulman, and Yurii V. Turovskii

- 15 From Lomonosov lemma to radical approach in joint spectral radius theory — 205**

Edward Kissin, Victor S. Shulman, and Yurii V. Turovskii

- 16 Pontryagin–Krein theorem: Lomonosov’s proof and related results — 231**

Dong Li and Alexander Volberg

- 17 Poincaré type and spectral gap inequalities with fractional Laplacians on Hamming cube — 251**

Pedro J. Miana and Jesús Oliva-Maza

- 18 Spectra of generalized Poisson integral operators on $L^p(\mathbb{R}^+)$ — 281**

T. Oikhberg and M. A. Tursi

- 19 Order extreme points and solid convex hulls — 297**

Sasmita Patnaik, Srdjan Petrovic, and Gary Weiss

- 20 Universal block tridiagonalization in $\mathcal{B}(\mathcal{H})$ and beyond — 317**

Mikhail Popov

- 21 Rademacher-type independence in Boolean algebras — 327**

Index — 349
