Part I Income Taxes, Lottery, and Lion Hunting—Elementary Mathematics

1	“We Take over Your VAT!” How Big Is the Actual Discount?	3
2	Millions Every Week, but Not for Me. Six Numbers in the Lottery	5
3	Where Did My Money Go? Loss Compensation After a Price Drop	9
4	How Do You Catch a Lion? Finding a Zero by Halving the Interval	13
	Literature	16
5	Upside Down and Up Again. How Many Zeros Does a Polynomial Have?	17
6	“According to Adam Ries, that Comes to ...” About Fusti, Freight, and Cartage	21
	Literature	24
7	How to Invest? The Cost-Average Effect	25
	Literature	27
8	§ 32a, the Politician and the Coaster. Calculating the Income Tax of a Person	29
9	This Makes the Taxpayer Shudder. What Does “Cold Progression” Actually Mean?	33
	Literature	37

Part II Interest Rates, Prices, Yields—Classical Financial Mathematics

10	A Fair Deal? Or: There’s Nothing Like Starting Young	41
	Literature	42

11	Should I Pay the Bill Quickly? Cash Discount	43
12	The Children of the Interest Rate Are the Grand-Children of the Capital. Compound Interest	45
	Literature	48
13	When Will Scrooge McDuck Be Satisfied? The Doubling Problem ...	49
14	How Real Is Nominal? The Actual Rate of Return on a Principal	53
	Literature	56
15	“Have I Learned to Calculate Correctly?” Why Dr. X. from Gifhorn Was Wrong	57
16	“What, I Have to Pay that Long?” Full Repayment of a Loan	59
17	The Widow of the General and the Painter. A Loan à la Chekhov	63
	Literature	66
18	Why Does Nominal not Equal Effective? The Effective Interest Rate of an Immediate Loan.....	67
19	Sandwich with a Car Inside. Financing with Hooks and Eyes	69
20	The Assiduous Clerk. Capital Certificates and Federal Bonds	73
21	7500 Euros Monthly: A Lifetime. Or Better Yet, Two Millions Right Away?	77
22	Financing a Car with Zero Percent: A Bargain?	81
	Literature	82
23	Interest Payments Anytime: Isn’t That Wonderful? Continuous Compounding of Interest	83
24	Bearer Bonds and Coupons. Bond Prices and Returns of Bonds	87
25	Oops! A Law Containing Formulas and Numerical Methods? The Calculation of the Effective Interest Rate According to the German Price Indication Ordinance	91
	Literature	94

**Part III Financial Products and Strategies—Modern Financial
Mathematics**

26	Fair Prices and Market Prices	97
27	The Short End and the Long End. Yield Curves, Spot Rates, and Forward Rates	99
	Literature	104
28	Simple as Vanilla Ice Cream. On Standard Financial Products	105

29 Exchanges for Mutual Benefit. Swaps	107
Literature	109
30 The Telescope That Has Been Pushed Together. How to Calculate a Swap Rate?	111
31 Pull out Yourself of the Swamp by Your Own Hair. The Bootstrapping Method	115
Literature	118
32 No Risk, No Fun! Risk Indicators of Fixed-Income Securities	119
33 Sleep Well Despite Turbulent Markets? The Immunization Property of the Duration	125
34 Rising Like a Phoenix from the Ashes. New Shine for Your Depot?	129
Literature	132
35 The Crop of Standing Corn. Are Speculators Really Bad People?	133
Literature	134
36 Orange Juice and Pork Bellies. Forward Transactions	135
37 Empty Pockets and No Money. About Short Sales and No-Arbitrage Portfolios	137
38 Earning Money Without Capital and Risk. Arbitrage Transactions and Fair Prices	141
Literature	145
39 Fibonacci and His Rabbits. A Few Words About Technical Analysis	147

Part IV Only Rights, No Obligations—Options

40 A Trip Around the World: Different Types of Options	153
Literature	155
41 Two Triumvirates: From Arbitrage to Speculation	157
42 Nothing Is for Free: The Arbitrage Principle	159
43 How Much Do I Have to Pay for My Right? Option Pricing According to Black and Scholes	161
44 It Takes Two: Option Pricing in the Binomial Model	165
Literature	172
45 Safe Behind the Hedge: Hedging of Stock Positions	173

46	Wrong Calculation—Right Result: Can This Really Be? The Correct Derivation of the Risk Measure Delta	177
	Literature	180
47	The Greeks and the Risk: About Risk Indicators for Stock Options	181
48	“In, At and Out of the Money”: The Language of the Actors at the Financial Markets	185
49	Volatility Determines the Option Price—Really?	187
50	Speculating with Options: Rich by Using Leverage?	191
	Literature	194
 Part V It Is All in the Mix—Portfolio Theory		
51	A Portfolio of Shares	197
52	Risky Investments: Everything Under Control	201
53	Negative with a Positive Impact: Risk Reduction Using Correlation	209
54	Above Your Needs and Maybe Even More? The CPPI Strategy	215
	Literature	220
55	High Risk Pays Off!? Sometimes: On Strategies in Stock Market Games	221
 Part VI The Collective Against Risks—Insurance		
56	A Duo Taming Uncertainty: The Law of Large Numbers and the Central Limit Theorem	225
	Literature	229
57	Do You like Classics? A German Life Insurance Concept	231
58	More Opportunities: Dynamic Hybrid Products	239
59	A Million Dollar Roulette in the Financial and Insurance Market? The Monte Carlo Method	245
	Literature	248
60	Insurance for Millions—Billions for the Insurer	249
	Literature	251
61	CRK: One Number for Risk and Return. Classification of Pension Products	253

62	Living with the Mortality Table	257
	Literature	260
63	What Relates Honoré de Balzac and 30 Young Geneva Girls with Life Annuities and Life Tables?	261
	Literature	265
64	Sometimes It Clicks and Sometimes Not. A Riester Pension Product with Index Participation	267
	Literature	270

**Part VII Theoretical Foundations—Classical and Stochastic
Financial Mathematics**

65	Classical Financial Mathematics	273
65.1	Linear Interest	273
65.1.1	Basic Notions and Definitions	273
65.1.2	Interest Formula	274
65.1.3	Time Values	275
65.1.4	Final Value with Linear Interest	275
65.1.5	Present Value with Linear Interest	276
65.1.6	Multiple Constant Payments	276
65.2	Compound Interest	278
65.2.1	Interest Formula	278
65.2.2	Present Value with Compound Interest	279
65.2.3	Sub-annual and Continuously Compounded Interest	281
65.3	Annuity Calculation	282
65.3.1	Annuities in Arrears	283
65.3.2	Annuities in Advance.....	284
65.3.3	Formula Conversion	285
65.3.4	Perpetual Annuity	286
65.4	Amortization Calculation	288
65.4.1	Basic Notions and Forms of Repayment	288
65.4.2	Annuity Amortization	289
65.4.3	Percent Annuity.....	291
65.5	Price Calculation	291
65.5.1	Price of a General Cash Flow	291
65.5.2	Price of a Bond	292
65.5.3	Price of a Zero Bond	292
	Literature	293
66	Stochastic Financial Mathematics	295
66.1	Basic Notions from Probability Theory	295
66.1.1	Discrete Probability Distributions	296
66.1.2	Probability Distributions with Density	297

66.2	Stochastic Modeling of Stock Prices	302
66.3	Option Pricing	305
	Literature	308
