

Contents

1	Starting Points	1
1.1	Conceptual Approach	3
1.2	The Adaptive Cycle of Landscapes	19
1.3	Criteria of Landscape Resilience	35
2	Levels of Landscape Resilience	43
2.1	Given Landscape Resilience	44
2.2	Acquired Landscape Resilience	64
3	Factors Influencing Landscape Resilience	97
3.1	Diversity and Flexibility	99
3.2	Redundancy and Modularity	106
3.3	Resistance and Stability	111
3.4	Elasticity and Tolerance	118
3.5	Self-Sufficiency and Decentralisation	126
3.6	Networking and Concentration	130
3.7	Principles of Landscape Resilience	135
3.8	Self-Efficacy Expectations and Other Catalysts	137
4	Landscape Explorations Between Given and Acquired Resilience	139
4.1	High-Montane Island Landscapes in Tourism Crises	140
4.2	Stormy Landscapes	147
4.3	Salt Landscapes in Economic Change	157
4.4	Urban Landscapes in Water Crises	169
4.5	Atoll Landscapes in a Changing Climate	181
4.6	Bioinvasive Landscapes	192
5	Landscape Resilience: Conclusions	203
5.1	Summary	204
5.2	Planning Implications	215
	Supplementary Information	
	Literature	224
	Index	243
