1	Introduction	1
----------	---------------------------	----------

Part I Theoretical Background

2	Conceptualizing Spatial Cognition	19
2.1	Space in Cognition	20
2.1.1	Physical and Psychological Space	21
2.1.2	Spatial Cognition	23
2.1.3	Scale as a Psychological Construct	25
2.2	Spatial Representations and Spatial Behavior	30
2.2.1	The Concept of Representation	31
2.2.2	Palmer's Model of (Spatial) Representations	32
2.2.3	Liben's Model of Spatial Representations	34
2.2.4	Spatial Behavior	36
2.3	Encoding and Maintainance of Spatial Knowledge	39
2.3.1	Frames of Reference	40
2.3.2	Primary and Secondary Sources of Spatial Knowledge	44
2.3.3	The Architecture of Spatial Memory	45
2.4	Spatial Abilities	50
2.4.1	Definition of Spatial Abilities at Different Scales of Space	50
2.4.2	Conceptual Distinctions	53
3	Understanding Spatial Abilities at Different Scales of Space	57
3.1	Spatial Behavior at Different Scales of Space	58
3.1.1	Object Manipulation in Small-Scale Spaces	59

3.1.2	Map-Based Navigation in Real Space	61
3.2	Cognitive Analysis of Small-Scale Spatial Abilities	65
3.2.1	Representation of Small-Scale Spatial Information	67
3.2.2	Mental Transformations of Small-Scale Spatial Information	69
3.2.3	Maintenance of Small-Scale Spatial Information in Working Memory	79
3.3	Cognitive Analysis of Large-Scale Spatial Abilities	83
3.3.1	Understanding Maps	84
3.3.2	Representation of Large-Scale Spatial Information	85
3.3.3	Cognitive Processes of Map-Based Orientation	93
3.3.4	Maintenance of Large-Scale Spatial Information in Working Memory	104
3.4	Comparison of Spatial Abilities at Different Scales of Space	106
4	Reviewing Empirical Findings of Spatial Abilities at Different Scales of Space	111
4.1	The Dissociation of Two Subclasses of Small-Scale Spatial Abilities	113
4.1.1	The Psychometric Literature	114
4.1.2	The Individual Differences Literature	121
4.1.3	The Developmental Literature	122
4.2	The Dissociation of Two or More Subclasses of Large-Scale Spatial Abilities	129
4.2.1	The Psychometric Literature	130
4.2.2	The Individual Differences Literature	131
4.2.3	The Developmental Literature	136
4.3	The Relationship Between Small-Scale and Large-Scale Spatial Abilities	141
4.3.1	Studies Without Maps	142
4.3.2	Studies Involving Maps	144

Part II Empirical Study

5	Design of the Empirical Study	149
5.1	Research Questions, Latent Constructs, and Research Design	149

5.1.1	Research Questions	149
5.1.2	Latent Constructs	151
5.1.3	Hypotheses	153
5.1.4	Research Design	156
5.2	Methodological Framework	158
5.2.1	Psychometrics	158
5.2.2	Structural Equation Modeling	164
5.2.3	Treatment of Missing Data	170
5.3	Planning of the Empirical Study	174
5.3.1	Location and Organizational Framework	175
5.3.2	Requirements Regarding the Sample and Testing Material	176
6	Testing Material for Small-Scale Spatial Abilities	179
6.1	Development of a Set of Paper-and-Pencil Tasks	180
6.1.1	Preliminary Considerations	180
6.1.2	Tasks Measuring OB	181
6.1.3	Tasks Measuring EGO	186
6.2	Pilot Study	198
6.2.1	Sample, Material, and Procedure	198
6.2.2	Preliminary Analysis	199
6.2.3	Detailed Analysis of All Measures	200
6.2.4	Confirmatory Factor Analyses	211
6.2.5	Implications for the Main Study	215
7	Testing Material for Large-Scale Spatial Abilities	221
7.1	Development of a Set of Map-Based Orientation Tasks	222
7.1.1	Preliminary Considerations	222
7.1.2	Conceptual Choices	223
7.1.3	Methodical Choices	224
7.2	Presentation of the Map-Based Orientation Tests	226
7.2.1	Tasks Measuring MapEnvSelf	227
7.2.2	Tasks Measuring SurveyMap	231
8	Additional Testing Material	235
8.1	The Corsi Block Test	235
8.1.1	Materials	236
8.1.2	Procedure	238
8.1.3	Scoring	239
8.2	PTSOT-C	240

8.2.1	Design of the Adopted Instrument	240
8.2.2	Framework for Item Construction and Analysis	242
8.2.3	Testing Procedure	244
9	Data Collection	247
9.1	Participants	247
9.2	Materials	249
9.3	Experimenters	249
9.4	Procedure	250
9.4.1	Testing Procedure for the Small-Scale Spatial Abilities Test	251
9.4.2	Testing Procedure for the Large-Scale Spatial Abilities Test	251
9.5	Documentation	253
9.6	Data Treatment	254
9.6.1	Encoding and Scoring	254
9.6.2	Treatment of Missing Data	254
 Part III Results and Discussion		
10	Children's Small-Scale Spatial Abilities	259
10.1	Analyses of Items and Measures	259
10.1.1	Summary of Item Analyses	260
10.1.2	Descriptive Statistics	262
10.1.3	Reliabilities	264
10.2	On the Dissociation of Two Subclasses of Small-Scale Spatial Abilities	265
10.2.1	Class Clustering Effects	265
10.2.2	Analysis of Pearson Correlations	266
10.2.3	Confirmatory Factor Analysis	267
10.3	The Role of Visuospatial Working Memory	272
10.3.1	Descriptive Analysis of Different Corsi Block Test Measures	272
10.3.2	Analysis of Pearson Correlations	275
10.3.3	An Extended Model Involving VSWM	276
10.4	Item Analysis for the PTSOT-C	277
10.5	Discussion of the Empirical Findings	279

11	Children's Large-Scale Spatial Abilities	287
11.1	Analyses of the Items and Measures	287
11.1.1	Detailed Analysis of Individual Measures	288
11.1.2	Summary: Psychometric Properties of All Items	305
11.1.3	Summary: Descriptive Statistics of the Measures	306
11.1.4	Reliabilities	308
11.2	On the Dissociation of Three Subclasses of Large-Scale Spatial Abilities	309
11.2.1	Analysis of Results From Multiple Imputation Procedure	309
11.2.2	Class Clustering Effects	311
11.2.3	Analysis of Pearson Correlations	312
11.2.4	Confirmatory Factor Analyses	313
11.3	The Influence of Visuospatial Working Memory	321
11.3.1	Analysis of Pearson Correlations	321
11.3.2	An Extended Model Involving VSWM	322
11.4	Discussion of the Empirical Findings	323
12	Relations Between Children's Small-Scale and Large-Scale Spatial Abilities	333
12.1	Results at the Manifest Level	333
12.1.1	Zero-Order Correlation Analysis	334
12.1.2	Semipartial Correlation Analyses	337
12.1.3	Hierarchical Multiple Regression Analyses	341
12.2	Results at the Latent Level	352
12.2.1	Results From Structural Equation Modeling	353
12.2.2	Latent Regression Models	359
12.2.3	The Role of Visuospatial Working Memory	363
12.3	Discussion of the Empirical Findings	367
13	Discussion, Limitations, and Implications	375
13.1	Discussion of the Empirical Findings	376
13.1.1	Children's Individual Differences in Spatial Abilities at Different Scales of Space	376
13.1.2	The Relation Between Small-Scale and Large-Scale Spatial Abilities	379
13.1.3	The Role of Subclasses of Spatial Abilities	380
13.1.4	The Role of Visuospatial Working Memory	386
13.1.5	An Extended Model of Spatial Abilities at Different Scales of Space	388

13.2	Limitations	391
13.2.1	Basic Assumptions and Design of the Study	391
13.2.2	Experimental Setup	393
13.2.3	Methodology	394
13.2.4	Neglected Covariates	396
13.3	Implications	397
13.3.1	Implications for Research in Mathematics Education	398
13.3.2	Implications for Research in Psychology	404
13.3.3	Implications for Geometry Education in Primary Schools	406
14	Conclusion	411
	Small-Scale Spatial Abilities Test	415
	Extra Tables	431
	References	439
