Preface — V

Abinaya Inbamani, Prabha Umapathy, Kathirvel Chinnasamy,
Veerapandiyan Veerasamy, S. Venkatesh Kumar

1 Artificial intelligence and Internet of things for renewable energy systems — 1

Bibhu Prasad Ganthia, Subrat Kumar Barik, Byamakesh Nayak

2 Power control of modified type III DFIG-based wind turbine system using four-mode type I fuzzy logic controller — 41

B. Gunapriya, A. Singaravelan, M. Karthik, M. Mahesh, K. Sudhapriya

3 An IoT-based approach for efficient home automation — 91

Zhang RuiChoo, Hungyang Leong, Rodney H. G. Tan

4 Design and implementation of IoT-enabled smart single-phase energy meter monitoring system — 123

Monika Yadav, Amritansh Mehrotra, Devender Kumar Saini

5 Internet of things (IoT)-based smart grids — 165

Jia Shun Koh, Rodney H. G. Tan, Wei Hong Lim

6 Maximum power point tracking control under partial shading conditions using particle swarm optimization algorithm — 185

Varsha Singh, Simran Bajaj, Shreyash Ganvir, Swapnil Sahu, Mahendra Gavel

7 Wireless monitoring of substation using IoT — 215

Subin Koshy, S. Rahul, R. Sunitha, Elizabeth P. Cheriyan

8 Smart grid-based big data analytics using machine learning and artificial intelligence: a survey — 241

Emdadul Hoque, Dip Kumar Saha, Dibakar Rakshit

9 IoT-based intelligent solar energy-harvesting technique with improved efficiency — 279

Editor's Brief Biographies — 303

Index — 307
