

Contents

<hr/>		
Introduction		
<hr/>		
Chapter 1	The biology of vertically and horizontally augmented bone	1
Chapter 2	Scientific evidence of vertical bone augmentation utilizing a titanium-reinforced polytetrafluoroethylene mesh	17
<hr/>		
The extreme vertical defect of the posterior mandible		
<hr/>		
Chapter 3	Reconstruction of the extreme posterior mandibular defect: surgical principles and anatomical considerations	41
Chapter 4	Reconstruction of an advanced posterior mandibular defect with scarred tissue	81
Chapter 5	Reconstruction of an advanced posterior mandibular defect with narrow basal bone	97
Chapter 6	Reconstruction of an advanced posterior mandibular defect with incomplete periodontal bone levels: the 'pawn sacrifice'	109
Chapter 7	Reconstruction of an advanced posterior mandibular defect with the Lasagna technique using low-dose bone morphogenetic protein-2	129
<hr/>		
Anterior mandibular vertical augmentation		
<hr/>		
Chapter 8	Reconstruction of the advanced anterior mandibular defect: surgical principles and anatomical considerations	135
Chapter 9	Reconstruction of the advanced anterior mandibular defect: considerations for soft tissue reconstruction and preservation of the regenerated bone	149

Chapter 10	Reconstruction of the advanced anterior mandibular defect: importance of horizontal bone gain	159
<hr/>		
Posterior maxilla		
<hr/>		
Chapter 11	Long-term results of implants placed in augmented sinuses with minimal and moderate remaining alveolar bone	165
Chapter 12	Difficulties and complications relating to sinus grafting: hemorrhage and sinus septa	177
Chapter 13	Difficulties in sinus augmentation and posterior maxillary reconstructions: missing labial sinus wall and ridge deficiencies	187
Chapter 14	Sinus graft infection and postoperative sinusitis	211
Chapter 15	The reconstruction of an extreme vertical defect in the posterior maxilla	239
<hr/>		
Anterior maxillary vertical augmentation		
<hr/>		
Chapter 16	Introduction and clinical treatment guidelines	263
Chapter 17	Complex reconstruction of an anterior maxillary vertical defect	311
<hr/>		
Anterior maxillary defect		
<hr/>		
Chapter 18	Extreme defect augmentation in the anterior maxilla	321

Soft tissue reconstruction in conjunction with bone grafting		
Chapter 19	Reconstruction of a natural soft tissue architecture after bone regeneration	337
Chapter 20	The labial strip gingival graft	345
Chapter 21	The double strip graft	363
Chapter 22	Large open-healing connective tissue graft	391
Reconstruction of the interimplant papilla		
Chapter 23	The double connective tissue graft	407
Chapter 24	The Ice-cube connective tissue graft	423
Chapter 25	The Iceberg connective tissue graft	451
Interproximal bone and soft tissue regeneration		
Chapter 26	Vertical periodontal regeneration in combination with ridge augmentation	481
Ultimate esthetics		
Chapter 27	Reconstruction of the bone and soft tissue in conjunction with preserving the mucogingival junction	507
Chapter 28	Complications	523
