**About the Authors — XXI**

## Part I: Laying the Groundwork

### Chapter 1

**Introduction and Definitions — 3**

- 1.1      **Introduction — 3**
- 1.2      **Definitions — 4**
- 1.2.1      **Process Machinery — 4**
- 1.2.2      **Commissioning Explained — 7**
- 1.2.3      **Asset Management (AM) — 9**

### Chapter 2

**Project Development and Risk — 13**

- 2.1      **Project Phases — 13**
- 2.1.1      **Project Development — 13**
- 2.1.2      **Approaches to Project Execution — 15**
- 2.1.3      **Charter – Operating Standards Are Needed to Define Asset Availability Goals — 16**
- 2.1.4      **Project Execution — 18**
- 2.2      **Process Plant Machinery Project Phases — 22**
- 2.2.1      **Commissioning and Startup — 23**
- 2.2.2      **Reducing the Delay Potential — 23**
- 2.2.3      **Determining Vendor Responsibility — 23**
- 2.2.4      **Exceptions to the Rule — 25**
- 2.2.5      **Reducing Risk by Using a Package Concept — 25**
- 2.3      **Risk – The Function of Probability and Loss Severity — 27**
- 2.3.1      **Probabilities — 27**
- 2.3.2      **Risk — 29**
- Appendix 2.A — 39**

### Chapter 3

**Planning — 42**

- 3.1      **The Task — 42**
- 3.2      **Organization — 42**

3.3	Startup Management Tools and Resources — 44
3.4	Planning — 46
3.4.1	Typical Schedules Are Easily Established — 46
3.4.2	Interface Problems and Their Solutions — 49
3.4.3	Successful Interfacing Assures Equipment Goals Are Met — 51
3.5	Commissioning and Startup Review Tasks — 52
3.5.1	Documentation Review — 52
3.5.2	Documentation for Effective Progress Tracking — 54
3.5.3	Assignment of Mechanics — 63
3.5.4	Assign the Plant's Machinery Engineers — 65
3.5.5	Set Up Training Program for Special Machinery Operation and Repair — 65
3.5.6	Train the Plant's Electricians, Instrument Mechanics and Operators — 66
3.5.7	Preparation of Specific Operating Instructions for Major Unspared Machinery — 66
3.5.8	Ascertain Availability of Test Equipment for Run-In and Operation — 67
3.5.9	Identify Outside Sources for Special Testing or Balancing — 68
3.5.10	Investigate the Availability of Expert Consultants and Contract Assistance — 69
3.5.11	Investigate Plan and Facilities for Repair of Remote Vendors' Equipment — 69
3.5.12	Investigate Local Repair Facilities — 70
3.5.13	Vendor Assistance — 70
3.5.14	Arrange Preventive Maintenance Details — 71
3.5.15	Understanding the Spare Parts Situation — 71
3.5.16	Outline Lubrication Requirements — 76
3.6	Machinery Startup Review Tasks — 76
3.6.1	Building Checklists — 76
3.6.2	The Mechanical Procedures Manual — 78
	Appendix 3.A: Project coordination procedure – example excerpt — 86
	Appendix 3.B: Checking out a mechanical contractor — 87
	Appendix 3.C: Major machinery recommended insurance spare parts – Based on component failure risk — 88
	Bibliography — 92

## **Chapter 4**

### **Preparation — 93**

4.1	Introduction — 93
4.2	Installation Procedures Should Be Reviewed Critically — 93

4.3	Establish Machinery Acceptance Baselines with Contractor — 95
4.3.1	What “Butt Lists” Are and Are Not — 95
4.3.2	Development of the Acceptance Basis — 95
4.4	Challenges — 96
4.4.1	Process Personnel and Others Must Be Aware of Run-In Requirements — 96
4.4.2	Process Engineers — 97
4.4.3	Electrical and Instrument Engineers — 97
4.5	General-Purpose Machinery Commissioning — 98
4.5.1	Attention to General-Purpose Machinery — 98
4.5.2	General-Purpose Summary Sheets Provide Useful Reference — 98
4.5.3	Cold Alignment Estimates Are Based on Geometry and Operating Temperature — 100
4.5.4	Run-In Performance of Pumps Should Be Estimated — 100
4.6	How to Deal with Deficient Installations — 102
4.7	Make Final Acceptance a Formal Transaction — 103
4.8	Pre-startup Checks Represent Last Chance to Avert Problems — 105
4.9	Equipment Run-In Should Be Uneventful — 105
4.9.1	Special Run-In Considerations — 106
	Appendix 4.A Pump pre-grout acceptance record — 107
	Appendix 4.B Typical pump alignment correction record sheet — 108
	Appendix 4.C Typical pump installation review log — 109

## Chapter 5

### Reaching Consensus — 111

5.1	Special-Purpose Machinery Commissioning and Startup — 111
5.1.1	Introduction — 111
5.1.2	Machinery Requiring Personal Attention of the Startup Engineer — 111
5.1.3	Special-Purpose Commissioning Requirements – General — 112
5.2	Installation Review Should Begin Early — 112
5.2.1	Handling, Rigging and Lifting — 112
5.2.2	Job Site Receiving and Storage Protection — 115
5.2.3	Foundations and Mounting Plate Grouting — 117
5.2.4	Shaft Alignment Practices — 123
5.2.5	Piping — 125
5.2.6	Lubrication and Seal Oil System Cleaning and Flushing — 133
	Appendix 5.A: Machinery storage protection products — 147
	Appendix 5.A1 — 151

<b>Appendix 5.B: Pickling procedure for reciprocating compressor suction piping</b> — <b>152</b>
<b>Appendix 5.C: Machinery piping considerations</b> — <b>155</b>
<b>Appendix 5.D: Pipe flanges and bolt-up/torque application</b> — <b>156</b>
<b>Appendix 5.D1</b> — <b>158</b>
<b>Appendix 5.E: Procedure for blowing steam turbine inlet lines</b> — <b>158</b>
<b>Appendix 5.F: Lube oil system commissioning procedure</b> — <b>162</b>

## **Part II: Execution**

### **Chapter 6**

#### **Shaft Sealing Systems** — **175**

<b>6.1</b>	<b>Introduction</b> — <b>175</b>
<b>6.2</b>	<b>Risk Profile</b> — <b>178</b>
<b>6.3</b>	<b>Commissioning and Startup</b> — <b>181</b>
	<b>Bibliography</b> — <b>184</b>

### **Chapter 7**

#### **Commissioning and Startup (C&S) of Electric Motors** — **185**

<b>7.1</b>	<b>Overview</b> — <b>185</b>
<b>7.1.1</b>	<b>Introduction</b> — <b>185</b>
<b>7.1.2</b>	<b>A-C Motor Type and Selection</b> — <b>185</b>
<b>7.1.3</b>	<b>Induction Motors</b> — <b>186</b>
<b>7.1.4</b>	<b>Synchronous Motors</b> — <b>187</b>
<b>7.1.5</b>	<b>Motor Enclosures</b> — <b>188</b>
<b>7.1.6</b>	<b>Motor Service Factor</b> — <b>190</b>
<b>7.1.7</b>	<b>Insulation and Heating</b> — <b>191</b>
<b>7.1.8</b>	<b>Motor Torques and Speeds</b> — <b>191</b>
<b>7.1.9</b>	<b>Motor Controls</b> — <b>192</b>
<b>7.1.10</b>	<b>Wiring System</b> — <b>192</b>
<b>7.2</b>	<b>Commissioning and Startup</b> — <b>193</b>
<b>7.2.1</b>	<b>Risk Profile</b> — <b>193</b>
<b>7.2.2</b>	<b>Commissioning and Startup</b> — <b>196</b>
<b>7.2.3</b>	<b>Large Motors</b> — <b>198</b>
<b>7.2.4</b>	<b>Couplings</b> — <b>199</b>
<b>7.2.5</b>	<b>Startup Preparation</b> — <b>200</b>
<b>7.2.6</b>	<b>Initial Startup</b> — <b>205</b>
<b>7.2.7</b>	<b>Motor Operation</b> — <b>207</b>

Appendix 7.A: Motor protective devices, controls and enclosures — 207
Bibliography — 209

## Chapter 8

### C&S of Mechanical Drive Steam Turbines — 210

8.1	Introduction — 210
8.2	The Steam Cycle — 210
8.3	Special-Purpose Steam Turbines — 211
8.4	General-Purpose Steam Turbines — 213
8.5	Risk Profiles — 213
8.6	Risk Mitigation — 216
8.7	Commissioning General-Purpose Steam Turbines — 223
8.7.1	Carbon Ring Run-in — 227
8.7.2	Casing Preparation — 227
8.7.3	Commissioning Example — 228
8.8	Special-Purpose Turbines — 230
8.8.1	Commissioning and Startup – Special-Purpose Steam Turbines — 232
8.8.2	Water Washing — 238
	Appendix 8.A: Field storage and staging procedure for steam turbines — 241
	Appendix 8.B: Long-term preservation steps for steam turbines — 241
	Appendix 8.C: Procedure to safely perform the solo run of a GP steam turbine — 242
	Appendix 8.D: General-purpose steam turbine carbon seal break-in — 250

## Chapter 9

### C&S of Gas Turbines — 253

9.1	Overview of Key Systems — 253
9.1.1	General — 253
9.1.2	Fuel Supply Control System — 256
9.1.3	Combustion Control System — 257
9.1.4	Lube Oil System — 257
9.1.5	Starting System — 257
9.2	Risk Assessment — 258
9.3	Commissioning and Startup — 263
9.3.1	Final Check-Out Before Starting — 263
9.3.2	Initial Startup — 263

9.3.3	Startup Control System Revisited — 269
9.3.4	After the Initial Run — 272
	Bibliography — 272

## **Chapter 10**

### **C&S of Internal Combustion Engines — 273**

10.1	Introduction — 273
10.1.1	Speed Ranges — 273
10.1.2	Engine Types and Characteristics — 274
10.2	Risk Profile — 277
10.3	Installation, Commissioning and Startup — 277
10.3.1	Installation — 277
10.3.2	Commissioning — 284
10.4	Preparing the Initial Startup — 290
10.4.1	Initial Startup and Run-In — 292
10.4.2	Engine Startup under Normal Conditions — 293
	Appendix 10.A: Engine grouting procedures — 294
	Bibliography — 298

## **Chapter 11**

### **Commissioning of Power Transmission Components — 299**

11.1	Drive Couplings — 299
11.1.1	Introduction — 299
11.1.2	Flexible Couplings — 299
11.1.3	Risk Profile — Why Couplings Still Fail — 301
11.1.4	Why Permanently Installed Torque Meters Make Economic Sense — 303
11.1.5	Commissioning and Startup — 305
11.2	Commissioning and Startup of Special-Purpose Gearboxes — 308
11.2.1	Introduction — 308
11.2.2	What Startup Leaders Must Know About High-Speed, Special-Purpose Gear Boxes — 310
11.2.3	Instruments and Controls — 311
11.2.4	Commissioning and Startup — 312
11.2.5	Gear Inspection — 322
	Appendix 11.A — 325
	Bibliography — 326

**Chapter 12****C&S Large Multistage Reciprocating Process Compressors — 327**

12.1	Introduction — 327
12.2	Risk Profile — 328
12.3	The Factory Acceptance Test (FAT) — 332
12.4	What Reciprocating Compressor C&S Files Should Contain — 336
12.5	Installation — 340
12.5.1	Rigging and Lifting — 340
12.5.2	Receiving, Inspection and Storage Protection — 340
12.5.3	Foundation, Base Plate and Grouting — 341
12.5.4	Assembly and Maintenance Tools — 341
12.6	Commissioning — 341
12.6.1	Safety Precautions — 342
12.6.2	Prime Movers — 343
12.6.3	Piping Cleanliness — 343
12.6.4	Pipe Alignment — 344
12.6.5	Inlet Gas Separation and Scrubbing — 345
12.6.6	Shaft Alignment — 345
12.6.7	Lube Oil System — 345
12.6.8	Cooling Water System — 347
12.6.9	Compressor and Motor Driver — 347
12.7	Startup — 354
12.7.1	Initial Unloaded Startup — 354
12.7.2	Unloaded Shutdown — 358
12.7.3	Torqueing of Valve Cover Fasteners — 359
12.7.4	Startup for Break-In — 360
12.7.5	Compressor Cylinder Break-In — 361
12.7.6	Loaded Startup and Operation — 361
12.8	Condition Monitoring — 362
12.8.1	Valve Monitoring — 362
12.9	Shutdown — 363
12.9.1	Safety Concerns After Shutdown — 363
	Bibliography — 365

**Chapter 13****C&S of Rotary Screw Compressors and Blowers — 366**

13.1	Introduction — 366
13.2	Blowers — 368
13.3	Commissioning — 371
13.3.1	Risk Profile — 371
13.3.2	Preliminaries — 374
13.3.3	Pre-Commissioning and Commissioning — 377

<b>13.4</b>	<b>Initial Startup — 380</b>
	<b>Appendix 13.A: Commissioning of lube and seal oil systems – large oil-free helical screw compressor — 384</b>

**Chapter 14**

**Commissioning and Startup of Turbocompressors — 387**

<b>14.1</b>	<b>Introduction — 387</b>
<b>14.1.1</b>	<b>Axial and Centrifugal Compressors — 387</b>
<b>14.1.2</b>	<b>Integrally Geared Compressors — 389</b>
<b>14.1.3</b>	<b>Expander-Compressors — 390</b>
<b>14.2</b>	<b>Commissioning — 392</b>
<b>14.2.1</b>	<b>Risk Identification — 392</b>
<b>14.2.2</b>	<b>The Mechanical Run Test — 401</b>
<b>14.3</b>	<b>Installation — 408</b>
<b>14.3.1</b>	<b>Storage Protection — 408</b>
<b>14.3.2</b>	<b>Foundation and Grouting — 408</b>
<b>14.3.3</b>	<b>Piping — 409</b>
<b>14.3.4</b>	<b>Shaft Alignment — 409</b>
<b>14.3.5</b>	<b>Lubrication — 410</b>
<b>14.4</b>	<b>Startup — 410</b>
<b>14.4.1</b>	<b>Review of Operating Characteristics — 410</b>
<b>14.4.2</b>	<b>Starting Up — 413</b>
<b>14.4.3</b>	<b>What We Have Learnt About Starting Up a Turbocompressor Train — 429</b>
<b>14.5</b>	<b>Initial Run — 429</b>
<b>14.6</b>	<b>C&amp;S of Integrally Geared Compressors — 430</b>
<b>14.7</b>	<b>C&amp;S of Turboexpanders — 430</b>
	<b>Appendix 14.A: Staging and storage protection of turbocompressors — 431</b>
	<b>Appendix 14.B1: Longer term preservation steps for turbocompressors — 432</b>

**Chapter 15**

**C&S of Fans and Centrifugal Blowers — 435**

<b>15.1</b>	<b>Introduction — 435</b>
<b>15.2</b>	<b>Commissioning and Startup Risks Assessed — 436</b>
<b>15.3</b>	<b>Commissioning — 438</b>
<b>15.4</b>	<b>Startup — 446</b>
<b>15.4.1</b>	<b>Monitoring After Initial Startup — 448</b>
<b>15.4.2</b>	<b>Progress Tracking — 448</b>
	<b>Bibliography — 451</b>

**Chapter 16**

**C&S of Process Pumps — 452**

- 16.1      Introduction — 452
- 16.2      Prime Movers Used — 453
- 16.3      Commissioning — 453
- 16.3.1      Risks Assessed — 453
- 16.3.2      Problem Services — 459
- 16.4      Startup — 459
- 16.5      Positive Displacement Pumps — 470
- Bibliography — 472

**Chapter 17**

**Outlook and Conclusion — 473**

- 17.1      The Path Forward — 473
- 17.2      Outlook — 473
- 17.3      Conclusion — 474
- Bibliography — 476

**Glossary — 477**

**Index — 485**
