

Inhaltsverzeichnis

HEAT as an example for efficient environmental perception for autonomous shuttle systems

Philipp Materne, Christoph Hartwig und Ulrike Peters

Digital Twin to design and support the usage of alternative drives in municipal vehicle fleets

Sven Spieckermann, Josef Becker, Markus Henrich und Thomas Schulte

Paving the way for trust in autonomous vehicles–How OEMs, authorities and certifiers can foster customers' trust in AVs

Nils Köster und Torsten-Oliver Salge

Building the bridge between automotive SW engineering and DevOps approaches for automated driving SW development

Dr. Detlef Zerfowski, Dr. Sergey Antonov und Christof Hammel

A Safety-Certified Vehicle OS to Enable Software-Defined Vehicles

Jan Becker, Mehul Sagar und Dejan Pangercic

Theoretical Substitution Model for Teleoperation

Elisabeth Shi und Alexander T. Frey

Physics-Based, Real-Time MIMO Radar Simulation for Autonomous Driving

Jeffrey Decker, Dr. Kmeid Saad, Dan Rey, Stefano M. Canta und Robert A. Kipp

**Validation concept for scenario-based connected test benches
of a highly automated vehicle**

Moritz Wäschle, Kai Wolter, Chenlei Han, Urs Pecha, Katharina Bause
und Matthias Behrendt

**Automatic emergency steering interventions with hands
on and off the steering wheel**

Alexander K. Böhm, Luis Kalb, Yuki Nakahara, Tsutomu Tamura
und Dr. Robert Fuchs

**Hand Over, Move Over, Take Over -What Automotive Developers
Have to Consider Furthermore for Driver's Take-Over**

Miriam Schäffer, Philipp Pomiersky und Wolfram Remlinger

Navigation with Uncertain Map Data for Automated Vehicles

Christopher Diehl, Niklas Stannartz
und Univ.-Prof. Dr.-Ing. Prof. h.c. Dr. h.c. Torsten Bertram

**Scenario Generation for Virtual Test Driving on the Basis of Accident
Databases**

Alexander Frings

**A modular test strategy for Highly Autonomous Driving based
on Autonomous Parking Pilot and Highway Pilot**

Andreas Bossert, Stephan Ingerl und Stefan Eisenhauer

Mastering the Data Pipeline for Autonomous Driving

Patrik Moravek und Bassam Abdelghani

**Smart Fleet Analysis with Focus on Target Fulfillment and Test
Coverage**

Erich Ramschak, Rainer Voegl, Philipp Quinz, Michael Erich Hammer
und Rudolf Freidekind
