

Contents

1	Introduction	1
2	Fundamentals and Trends in Power Distribution Systems	11
2.1	Changing Role of Distribution Grid Operators	11
2.1.1	Challenges for the Electric Distribution Grid	12
2.1.2	Impact on Distribution System Operators	14
2.1.3	Summary	21
2.2	Complex Power Flow Calculations	21
2.2.1	Mathematical Description of the Electric Grid State	22
2.2.2	Mathematical Methods to Solve Power Flow Equations	28
2.2.3	Summary	31
2.3	Power System Modeling and Simulation – State of the Art	32
2.3.1	Steady-State Power Flow Execution and Simulation	32
2.3.2	System Participant Grid Usage Profiles	34
2.3.3	Co-Simulation Frameworks	34
2.3.4	Summary	35
3	Modeling and Simulation Fundamentals	37
3.1	Basics of Modeling and Simulation	37
3.1.1	Modeling and Simulation Concepts	38
3.1.2	Types of Models	41
3.1.3	Types of Simulations	42
3.1.4	Summary	44
3.2	Discrete-Event Modeling and Simulation	45
3.2.1	Classic Discrete-Event System Specification	46
3.2.2	Discrete-Event Specified Network	48
3.2.3	Discrete-Event Execution Mechanisms	51
3.2.4	Summary	52
3.3	Multi-Agent Systems and Agent-Based Simulation	53
3.3.1	Multi-Agent-Systems	53
3.3.2	Agent-based Simulation Models	58
3.3.3	Agents, Objects and Actors - Implementing ABS	60
3.3.4	Summary	63
4	Agent-based Discrete-Event Electric Power System Model	65
4.1	Overall Model Specifications	66

4.2	Conceptual Overview	69
4.2.1	System Concept	69
4.2.2	Agent System Model	71
4.2.3	Environment Model	72
4.2.4	Summary	78
4.3	Agent Classification	78
4.3.1	Physical Models	78
4.3.2	Agent Types	79
4.3.3	Agent Entities	82
4.3.4	Agent States	84
4.3.5	Summary	86
4.4	Discrete-Event System Model	86
4.4.1	Formal Overall System Concept	86
4.4.2	Scheduler Service Entity	88
4.4.3	Summary	96
4.5	Agent-based Distributed Backward-Forward Sweep Algorithm	97
4.5.1	Power Flow Algorithm and Grid Model Specifications	97
4.5.2	Mathematical Model of Single and Coupled Subgrids	99
4.5.3	Grid Agent	103
4.5.4	Solution Algorithm and DBFS Agent Interaction Protocol	107
4.5.5	Summary	113
4.6	Photovoltaic Agent	114
4.6.1	Motivation for Model Development	114
4.6.2	Generic System Participant Agent	115
4.6.3	Physical Model of a Photovoltaic Plant	117
4.6.4	Physical Model Verification and Validation	123
4.6.5	Summary	128
4.7	Evaluation of the Developed Overall Model	128
5	Application Example	131
5.1	Power Flow Validation at Nominal Operating Point	131
5.2	Use Case: Photovoltaic Park Connection Request	135
5.2.1	Defined Supply Task and Grid Specification	135
5.2.2	Future Supply Task Definition	137
5.2.3	Simulation Results	137
5.2.4	Conclusion	143
5.3	Summary	144

6 Summary and Outlook 145

Bibliography 155

List of Abbreviations 171

List of Symbols 173

List of Figures 179

List of Tables 181

A GridAgent Details 183

 A.1 GridAgent Events 183

B Basic Photovoltaic angles and conventions 185

C Photovoltaic Model Validation Parameters 189

D Application Example Amendments 193

 D.1 SIMONA-Ecosystem 193

 D.2 SimBench Grid Database 195

 D.3 SimBench Validation Information 196

 D.4 Application Example Properties 198

Evidence of Scientific Activity 201
