Contents

Part I: Basic Principles

1 Introduction 3
1.1 Swarms in Biology and Engineering 3
1.2 For Further Reading 9
1.2.1 Early Works in Biology 9
1.2.2 Early Works in Physics 11
1.2.3 Early Works in Engineering and Computer Science 12

2 Swarm Coordination and Control Problems 15
2.1 Aggregation 15
2.2 Social Foraging 17
2.3 Formation Control and Swarm Tracking 18
2.4 Distributed Agreement 20
2.5 Function Minimization 22
2.6 Related Problems and Behaviors and Further Reading 23
2.6.1 Formation Structure Breakdowns 23
2.6.2 Flocking 23
2.6.3 Rendezvous 24
2.6.4 Synchronization of Coupled Nonlinear Oscillators 24
2.6.5 Other Behaviors 25

Part II: Continuous Time Swarms

3 Swarms of Single Integrator Agents 29
- 3.1 Single Integrator Agent Model 29
- 3.2 Aggregation 30
  - 3.2.1 Potential Function Design 30
  - 3.2.2 Analysis of Swarm Motion 32
  - 3.2.3 Swarm Cohesion Analysis 35
  - 3.2.4 Agents with Finite Body Size 41
  - 3.2.5 Simulation Examples 44
- 3.3 Social Foraging 46
  - 3.3.1 Introduction 46
  - 3.3.2 Swarm Cohesion Analysis 48
  - 3.3.3 Swarm Motion in Various Resource Profiles 51
  - 3.3.4 Analysis of Individual Behavior in a Cohesive Swarm 59
  - 3.3.5 Simulation Examples 60
- 3.4 Formation Control 64
  - 3.4.1 Simulation Examples 66
- 3.5 Swarm Tracking 67
  - 3.5.1 Simulation Examples 71
- 3.6 Further Issues 72
  - 3.6.1 General Neighborhood Topology 72
  - 3.6.2 Non-reciprocal Agent Interactions 73
  - 3.6.3 For Further Reading 73

4 Swarms of Double Integrator Agents 75
- 4.1 Double Integrator Model 75
- 4.2 Stability Analysis of Swarm Cohesion Properties 76
  - 4.2.1 Controls and Error Dynamics 77
  - 4.2.2 Cohesive Social Foraging with Noise 81
  - 4.2.3 Special Case: Identical Agents 93
- 4.3 Stability Analysis of Swarm Trajectory Following 99
- 4.4 Simulation Examples 102
  - 4.4.1 No-Noise Case 102
  - 4.4.2 Noise Case 102
- 4.5 Further Issues 105
  - 4.5.1 Extensions and Generalizations 105
  - 4.5.2 For Further Reading 105

5 Swarms of Fully Actuated Agents with Model Uncertainty 107
5.1 Fully Actuated Agent Model with Uncertainty 107
5.2 Controller Development 108
5.2.1 Aggregation, Foraging, and Formation Control 108
5.2.2 Swarm Tracking 111
5.3 Potential Functions and Bounds 114
5.3.1 Aggregation 114
5.3.2 Social Foraging 115
5.3.3 Formation Control 117
5.3.4 Swarm Tracking 117
5.4 Simulation Examples 118
5.4.1 Aggregation 119
5.4.2 Social Foraging 120
5.4.3 Formation Control 121
5.4.4 Swarm Tracking 122
5.5 Further Issues 123
5.5.1 Extensions and Generalizations 123
5.5.2 For Further Reading 123

6 Swarms of Non-holonomic Unicycle Agents with Model Uncertainty 125
6.1 Non-holonomic Unicycle Agent Model with Uncertainty 125
6.2 Controller Development 126
6.2.1 Aggregation, Foraging, and Formation Control 126
6.2.2 Swarm Tracking 131
6.3 Potential Functions and Bounds 134
6.3.1 Aggregation 134
6.3.2 Social Foraging 137
6.3.3 Formation Control 139
6.3.4 Swarm Tracking 139
6.4 Simulation Examples 141
6.4.1 Aggregation 142
6.4.2 Social Foraging 144
6.4.3 Formation Control 144
6.4.4 Swarm Tracking 145
6.5 Further Issues 146
6.5.1 Model Equivalence 146
6.5.2 Extensions and Generalizations 148
6.5.3 For Further Reading 148

7 Formation Control Using Nonlinear Servomechanism 151
7.1 General Non-linear Agent Model 151
7.2 Nonlinear Servomechanism Based Controller Development 154

7.2.1 Full Information Controller 155
7.2.2 Error Feedback Controller 156
7.3 Formation Reconfiguration 158
7.3.1 Expansion/Contraction 160
7.3.2 Rotation 160
7.3.3 Topology Change 161
7.4 Illustrative Examples 161
7.5 Further Issues 170
7.5.1 Extensions and Generalizations 170
7.5.2 For Further Reading 172

Part III: Discrete Time Swarms

8 One-Dimensional Discrete-Time Swarm 177
8.1 The Swarm Model 177
8.1.1 Agent Model 177
8.1.2 One-Dimensional Swarm Model 178
8.2 The System under Total Synchronism 183
8.3 Asynchronous Swarm 189
8.4 Simulation Results 193
8.5 Further Issues 195
8.5.1 Extensions and Generalizations 195
8.5.2 For Further Reading 195

9 Asynchronous Distributed Agreement in Discrete Time Swarms 197
9.1 Model of the System 197
9.2 System under Total Synchronism 200
9.3 Asynchronous System 204
9.4 Simulation Examples 208
9.5 Further Issues 213
9.5.1 Application Areas of the Agreement Model 213
9.5.2 Extensions and Generalizations 214
9.5.3 For Further Reading 216

10 Formation Control with Potential Functions and Newton's Iteration 219
10.1 Path Planning for a Single Agent 219
10.2 Controller Development 223
10.3 Simulation Examples 227
10.4 Further Issues 230
10.4.1 Extensions and Generalizations 230
10.4.2 For Further Reading 230

Part IV: Swarm Based Optimization Methods

11 Bacteria Foraging Optimization 233
11.1 Bacterial Foraging by *E. coli* 233
11.1.1 Swimming and Tumbling 233
11.1.2 Chemotaxis and Climbing Nutrient Gradients 235
11.1.3 Underlying Sensing and Decision-Making Mechanisms 236
11.1.4 Elimination and Dispersal Events 237
11.2 *E. coli* Bacterial Foraging for Optimization 238
11.2.1 An Optimization Model for *E. coli* Bacterial Foraging 238
11.2.2 Bacterial Foraging Optimization Algorithm (BFOA) 242
11.2.3 Guidelines for Algorithm Parameter Choices 244
11.2.4 Relations to the Genetic Algorithm 245
11.3 Example: Function Optimization via *E. coli* Foraging 245
11.3.1 Nutrient Hill-Climbing: No Swarming 246
11.3.2 Swarming Effects 247
11.4 Further Issues 249
11.4.1 Extensions and Generalizations 249
11.4.2 For Further Reading 249

12 Particle Swarm Optimization 251
12.1 Basic PSO Iteration 251
12.2 Synchronous and Asynchronous PSO Implementations 253
12.2.1 Traditional PSO Implementations 253
12.2.2 Decentralized Asynchronous PSO Formulation 255
12.3 Particle Neighborhoods 257
12.3.1 Static Neighborhood 257
12.3.2 Dynamic Neighborhood 259
12.3.3 Directed Graph Representation of Particle Neighborhoods 264
12.3.4 Connectivity of the Swarm 266
12.4 Simulation Examples 270
12.5 Further Issues 275
12.5.1 Extensions and Generalizations 277
12.5.2 For Further Reading 278
