Preface	xxi
Editor Biography	xxiii

Section I Background of Forensic Science 1

1	History of Forensic Science 3
	<i>Kavya Hemanth, Maithri Tharmavaram, and Gaurav Pandey</i>
1.1	Introduction 3
1.2	History of Origin of Forensic Science 4
1.2.1	Origin of the Word "Forensic" 4
1.2.2	Origin of Procedures (Identification of Cause and Manner of Death: Autopsy) 6
1.3	History of Important Branches of Forensic Science 7
1.3.1	Forensic Entomology 7
1.3.2	Forensic Pathology 8
1.3.3	Forensic Toxicology 8
1.3.4	Forensic Anthropometry 9
1.3.5	Forensic Ballistics 10
1.3.6	Fingerprint Forensics 10
1.3.7	Digital Forensics 12
1.3.8	Forensic Odontology 12
1.3.9	Forensic Serology 13
1.4	Conclusions 14
	References 14
2	Conventional Technologies in Forensic Science 17
	<i>Piyush K. Rao, Maithri Tharmavaram, and Gaurav Pandey</i>
2.1	Introduction 17
2.2	Conventional Techniques in Different Divisions of Forensic Science 19
2.2.1	Forensic Biology 19
2.2.2	Forensic Chemistry 21
2.2.3	Forensic Physics 23
2.2.4	Questioned Documents and Fingerprints 25
2.2.4.1	Questioned Documents 25

2.2.4.2	Fingerprints	26
2.2.5	Cyber Forensics	27
2.2.6	Forensic Psychology	29
2.2.6.1	Narco-analysis Test	29
2.2.6.2	Brain Mapping or P300 Test	30
2.2.6.3	Polygraph or Lie Detection Test	30
2.2.7	Crime Scene Management	30
2.3	Conclusions and Future Prospects	31
	References	32

Section II Forensic Samples 35

3	Biological Evidence and Their Handling	37
	<i>Piyush K. Rao, Gaurav Pandey, and Maithri Tharmavaram</i>	
3.1	Introduction	37
3.1.1	Biological Evidences	38
3.2	Classification of the Biological Evidence	39
3.2.1	Location of the Evidences	40
3.2.2	Collection Methods of Various Types of Biological Evidences	42
3.3	Preservation of Viscera and Other Body Fluids in Death due to Poisoning	42
3.3.1	Preservatives Used for Storage	43
3.3.2	Mode of Preservative of Viscera	44
3.4	Collection of Blood for Isolation of the DNA	44
3.5	Semen and Seminal Stains	45
3.5.1	Condom Trace Evidence	45
3.6	Vaginal Secretions	46
3.7	Urine and Saliva	46
3.8	Tissue/Teeth/Bone Sample	46
3.9	Vomit	47
3.10	Feces	47
3.11	Sweat	47
3.12	Nasal Secretion	47
3.13	Tears and Human Milk	47
3.14	Botanical Evidence Collection and Preservation	48
3.14.1	Collection Method for Plant-Based Evidences	48
3.14.2	Collection of Fungi	48
3.14.3	Collection of Fresh Plants	48
3.14.4	Storage	49
3.15	Challenges Encountered	49
3.16	Future Prospects and Conclusions	50
	References	51
4	Physical Evidence and Their Handling	55
	<i>Piyush K. Rao, Gaurav Pandey, and Maithri Tharmavaram</i>	
4.1	Introduction	55

4.2	Classification of Physical Evidence	56
4.3	Precautions to Be Taken While Packaging	56
4.3.1	Weapons and Tools	56
4.3.2	Hair and Fibers	57
4.3.3	Dust or Soil	57
4.3.4	Tool Marks	58
4.4	Collection and Handling of Evidence	58
4.4.1	Impression Evidences	58
4.4.1.1	Lip Print Evidence	58
4.4.1.2	Collection and Preservation of Footprints/Shoe Print and Tire Impression	58
4.4.1.3	Tools Marks	60
4.4.1.4	Fingerprints	61
4.4.2	Collection and Preservation of Security Documents	62
4.4.2.1	Collection, Handling, and Packaging of the Torn Documents	62
4.4.2.2	Procedure, Handling, and Transportation of Charred Documents	63
4.4.2.3	Precautions that Are to Be Taken While Handling Questioned Document	64
4.4.3	Trace Evidences	64
4.4.3.1	Collection Labeling and Packaging of Glass	64
4.4.3.2	Hair	66
4.4.3.3	Fibers and Threads	67
4.4.3.4	Rope and Cord Examination	68
4.4.3.5	Paint	68
4.4.3.6	Soil	69
4.4.4	Digital Evidence Collection and Handling	70
4.4.4.1	Collection Criteria for Audio Evidence	70
4.4.4.2	Collection of Digital Evidence	71
4.4.5	Collection and Packaging of the Ballistic Evidence	72
4.4.5.1	Recovery of Firearm at the Scene of Crime	73
4.4.5.2	Collection of Firearm	73
4.4.5.3	Packaging of the Firearm	74
4.4.5.4	Ammunition	74
4.4.5.5	Discharged Residue/Gunshot Residue	75
4.5	Conclusions	75
	References	76
5	Chemical Evidences and Their Handling	79
	<i>Piyush K. Rao, Gaurav Pandey, and Maithri Tharmavaram</i>	
5.1	Introduction	79
5.1.1	Classification of Chemical Evidences	80
5.2	Collection, Preservation, and Handling Methods	82
5.2.1	Pharmacological Evidence	82
5.2.1.1	Sample Collection and Packaging	82
5.2.1.2	Handling of Chemical from the Clandestine Laboratory	83
5.2.2	Toxicological Evidences	83

5.2.2.1	Collection of Evidences in Case of Alcohol Poisoning	84
5.2.2.2	Evidences to Be Collected in Non-fatal Poisoning Cases	85
5.2.2.3	Evidences to Be Collected in Fatal Poisoning Cases	85
5.2.3	Collection and Handling of Drugs	86
5.2.3.1	Collection of the Drugs and Psychotropic Substances	87
5.2.3.2	Packaging of Evidences	87
5.2.4	Collection and Handling of Arson Evidences	88
5.2.4.1	Evidences in Case of Vehicular Arson or Fire	89
5.2.4.2	Evidences that Are Collected in Case of Electrical Short Circuit	89
5.2.4.3	Collection of Evidences	89
5.2.4.4	Packaging and Forwarding of the Evidences	90
5.2.5	Collection of Explosive Evidences	90
5.2.5.1	Collection of the Evidences	90
5.2.5.2	Packaging and Forwarding of the Evidences	92
5.2.6	Collection of Petroleum Products	93
5.2.6.1	Sample Procurement	93
5.2.6.2	Samples of MS/HSD from Carrier Tank	93
5.2.6.3	Precautions While Collecting the Samples	94
5.2.7	Nuclear Forensic	94
5.2.7.1	Soil/Sediment Matrices	94
5.2.7.2	Vegetation Matrices	95
5.2.7.3	Water Matrices	95
5.2.7.4	Fauna Matrices	95
5.2.7.5	Other Matrices	96
5.2.7.6	Collection Tactics	96
5.3	Conclusions	97
	References	97

Section III Analytical Techniques for Forensic Science 101

6	Microscopy for Forensic Investigations	103
	<i>Saeida Saadat, Gaurav Pandey, and Maithri Tharmavaram</i>	
6.1	Introduction	103
6.2	The Importance of Microscope in Forensic Investigations	104
6.3	Types of Microscope Used in Forensic Sciences	107
6.3.1	Light Microscopes	108
6.3.1.1	Compound Light Microscope	108
6.3.1.2	Polarizing Light Microscope	109
6.3.1.3	Stereomicroscope	110
6.3.2	Electron Microscopy	111
6.3.2.1	Scanning Electron Microscope (SEM)	111
6.3.2.2	Transmission Electron Microscopy	115
6.3.2.3	Differences Between SEM and TEM	116
6.3.2.4	Fourier- Transforms Infrared Microscope (FT-IR)	117
6.3.3	Probe Microscopes	119
6.3.3.1	Atomic Force Microscope	119

6.3.4	Comparison Between Light Microscope and Electron Microscope	122
6.3.5	Conclusions	123
	References	123
7	Chromatographic Techniques for Forensic Investigations	129
	<i>Yogita Bhoj, Maithri Tharmavaram, Gaurav Pandey, Deepak Rawtani, and Chaudhery Mustansar Hussain</i>	
7.1	Introduction	129
7.1.1	Types of Chromatography	130
7.1.2	Chromatography in Forensic Science	130
7.2	Types of Chromatographic Techniques Used in Forensic Investigations	131
7.2.1	Paper Chromatography	131
7.2.2	Thin Layer Chromatography	132
7.2.3	Gas Chromatography	133
7.2.4	High-Performance Liquid Chromatography	134
7.2.4.1	Types of HPLC	134
7.3	Applications of Chromatographic Techniques in Forensic Investigations	137
7.3.1	Forensic Toxicology	137
7.3.1.1	Thin Layer Chromatography	138
7.3.1.2	Gas Chromatography	139
7.3.1.3	High-Performance Liquid Chromatography	139
7.3.2	Ink Analysis	141
7.3.2.1	Thin Layer Chromatography	141
7.3.2.2	High-Performance Thin Layer Chromatography	141
7.3.2.3	High-Performance Liquid Chromatography	143
7.3.2.4	Gas Chromatography	144
7.3.3	Explosives	144
7.3.3.1	High-Performance Liquid Chromatography	144
7.3.3.2	Gas Chromatography	145
7.4	Conclusions and Future Aspects	146
	References	146
8	Hyphenated Techniques for Forensic Investigations	151
	<i>Riddhi Trivedi, and Prajesh Prajapati</i>	
8.1	Introduction	151
8.1.1.	Ballistics	151
8.1.2.	DNA Sequencer	152
8.1.3.	Hair Analysis	152
8.1.4.	Polymerase Chain Reaction	152
8.1.5.	Forensic Facial Reconstruction	152
8.1.6.	Fingerprint Analysis	152
8.1.7.	Luminol Spray	153
8.2	Hyphenation and Modern Hyphenated Techniques	153
8.2.1	Liquid Chromatography–Mass Spectroscopy	153

8.2.1.1	Different Ionization Techniques Used for Forensic Investigations	156
8.2.2	Capillary Electrophoresis–Mass Spectrometry	158
8.2.2.1	Sheath Interface	159
8.2.3	Gas Chromatography–Mass Spectrometry	159
8.2.3.1	Cold Electron Ionization	159
8.3	Various Applications for Forensic Investigation Using Hyphenated Techniques	160
8.3.1	Drug Abuse	160
8.3.1.1	Opiates	162
8.3.1.2	Cannabinoids	163
8.3.1.3	Amphetamines	164
8.3.1.4	LSD	164
8.3.1.5	Nicotine	164
8.3.2	Doping Agents	165
8.3.2.1	Anabolics	165
8.3.2.2	Non-Approved Substances	166
8.3.3	Therapeutic Drug and Its Toxicological Relevance	166
8.3.4	Explosives	167
8.3.5	Fingerprints	167
8.3.6	Natural Toxins	168
8.3.7	Biological Fluids	168
8.3.7.1	Hair	168
8.3.7.2	Oral Fluids	168
8.3.7.3	Meconium	169
	References	169

Section IV Biometrics Technology for Forensic Science 175

9	Conventional and Emerging Biometrics Techniques in Forensic Investigations	177
	<i>Aayush Dey, Maithri Tharmavaram, Gaurav Pandey, Deepak Rawtani, and Chaudhery Mustansar Hussain</i>	
9.1	Introduction	177
9.2	Conventional Technologies in Forensic Science	178
9.2.1	Fingerprint Biometrics	178
9.2.1.1	Types of Fingerprint Biometrics Acquisition	178
9.2.1.2	Examples of Fingerprint Scanners	185
9.2.1.3	Applications of Fingerprint Biometrics in Forensic Science	186
9.2.2	Face Recognition Biometrics	186
9.2.2.1	Imaging Techniques	186
9.2.2.2	Applications of Face Biometrics in Forensic Science	188
9.2.3	Speaker Recognition	188
9.2.3.1	Types of Speaker Recognition Technology	188
9.2.3.2	Applications of Speaker Recognition Biometrics in Forensic Science	190

9.2.4	Iris Recognition Biometrics	190
9.2.4.1	Applications of Iris Recognition Biometrics in Forensic Science	191
9.3	Emerging Technologies in Forensic Science	191
9.3.1	DNA Biometrics	191
9.3.2	Retina Recognition Biometrics	192
9.3.3	Gait Biometrics	193
9.3.4	Keystroke Biometrics	193
9.3.5	Ear Recognition	193
9.3.6	Body Odor	194
9.4	Conclusions	194
	References	194

Section V Sensors Technology for Forensic Science 199

10	Sensors for the Detection of Explosives and Gunshots Residues	201
	<i>Kishan Koyani, Maithri Tharmavaram, Gaurav Pandey, Deepak Rawtani, and Chaudhery Mustansar Hussain</i>	
10.1	Introduction	201
10.2	Gunshot Residues	203
10.2.1	Collection/Sampling of GSR	203
10.2.2	Degradation of Gunshot Residues	204
10.2.3	Sensors for Detection of Gunshot Residue	204
10.3	Explosives	207
10.3.1	Olfactory-Type Sensor	209
10.3.1.1	Electrochemical Nose Sensor	209
10.3.2	Chemical Sensor	210
10.3.2.1	Electrochemical Sensor	210
10.3.2.2	Luminescence Sensors	211
10.3.3	Polymer Sensors	211
10.3.4	Mass Sensor	212
10.3.4.1	Surface Acoustic Wave Sensor	212
10.3.4.2	Microcantilever Sensors	212
10.3.5	Optical Sensor	213
10.3.5.1	Fiber Optic Sensor	213
10.3.5.2	Spectroscopy Sensor	213
10.3.6	Biosensor	214
10.4	Conclusions	214
	References	215
11	Sensors for the Detection of Illicit Drugs	221
	<i>Sejal Purohit, Gaurav Pandey, Maithri Tharmavaram, Deepak Rawtani, and Chaudhery Mustansar Hussain</i>	
11.1	Introduction	221
11.2	Illicit Drugs in Forensic Science	223
11.2.1	Stimulated Drugs	223
11.2.1.1	Amphetamines	223

11.2.1.2	Cocaine	223
11.2.2	Depressant Drugs	224
11.2.2.1	Barbiturates	224
11.2.3	Narcotics	224
11.2.4	Hallucinogens	224
11.2.4.1	p-Lysergic Acid Diethyl Amide (LSD)	225
11.2.4.2	Marijuana	225
11.3	Conventional Techniques for the Detection of Illicit Drugs	225
11.3.1	Mass Spectrometry	225
11.3.2	Ion Mobility Spectrometry	226
11.3.3	Raman Spectroscopy	226
11.3.4	X-Ray Diffractometry	227
11.3.5	Thin-Layer Chromatography	227
11.3.6	Spot/Color Tests	228
11.4	Sensors for the Detection of Illicit Drugs	228
11.4.1	Chromogenic Sensors	228
11.4.2	Fluorogenic Sensors	231
11.4.3	Electrochemical Sensors	232
11.5	Conclusions	233
	References	234
12	Sensors for the Detection of Biological Fluids	239
	<i>Shubhankar Dube, Maithri Tharmavaram, Gaurav Pandey, Deepak Rawtani, and Chaudhery Mustansar Hussain</i>	
12.1	Introduction	239
12.2	Biological Fluids at Crime Scenes	240
12.2.1	Blood	240
12.2.2	Semen	241
12.2.3	Saliva	242
12.2.4	Sweat	242
12.2.5	Vaginal Fluid	242
12.2.6	Urine	243
12.3	Biosensors for Biological Fluids	244
12.3.1	Commercially Available Biosensor Kits	244
12.3.1.1	Blood	244
12.3.1.2	Saliva	247
12.3.1.3	Semen	248
12.3.1.4	Urine	250
12.3.2	Current Research	250
12.4	Conclusions	254
	References	254
13	Sensors for Dope Tests in Sports	259
	<i>Devisree Anil, Gaurav Pandey, Maithri Tharmavaram, Deepak Rawtani, and Chaudhery Mustansar Hussain</i>	
13.1	Introduction	259
13.2	Various Drugs and Methods Used in Sports Doping	260

13.2.1	Anabolic Androgenic Steroids	260
13.2.2	CNS Stimulants	260
13.2.3	Erythropoietin	261
13.2.4	Human Growth Hormone	262
13.2.5	Diuretics	262
13.2.6	Blood Doping	262
13.2.7	Gene Doping	263
13.3	Conventional Techniques in Doping	263
13.4	Sensors for Dope Agent Analysis	265
13.4.1	Biosensors	266
13.4.1.1	Electrochemical Sensors	266
13.4.1.2	Plasmonic Sensors	270
13.4.2	Gas Sensors	272
13.4.3	Other Sensors for the Detection of Illegal Drugs	273
13.5	Conclusions and Future Perspectives	274
	References	274

Section VI Emerging Technologies in Forensic Science 279

14	Nanotechnology and Taggant Technology in Forensic Science	281
	<i>Payal V. Bhatt, Gaurav Pandey, Maithri Tharmavaram, Deepak Rawtani, and Chaudhery Mustansar Hussain</i>	
14.1	Introduction	281
14.2	Forensic Science	282
14.3	Nanotechnology	282
14.3.1	Special Properties of Nanomaterials	283
14.3.1.1	Surface-Area-to-Volume Ratio	283
14.3.1.2	Quantum Confinement Effect	283
14.3.1.3	Surface Plasmon Resonance	284
14.4	Taggant Technology	284
14.4.1	Special Characteristics of Taggant Material	285
14.5	Classification of Nanomaterials and Taggants	285
14.5.1	Classification of Nanomaterials	285
14.5.1.1	Based on Dimension	286
14.5.1.2	Based on Composition Material	287
14.5.2	Classification of Taggants	287
14.5.2.1	Taggant Based on Properties	287
14.5.2.2	Taggant Based on Coding and Material	289
14.6	Application of Nanotechnology in Forensic Science	289
14.6.1	Fingerprint Identification	289
14.6.2	Explosive Residue Detection	290
14.6.3	DNA Analysis	291
14.6.4	Nano Tracker	291
14.6.5	Illicit Drug Detection	292
14.6.6	GSR Analysis	292
14.6.7	Biosensors	293

14.7	Application of Taggant Technology in Forensic Science	293
14.7.1	Pre-blast and Post-blast Identification	294
14.7.2	Currency Identification	295
14.7.3	Document Identification	295
14.7.4	Other Applications	296
14.8	Conclusions	296
	References	297

Section VII Modern Perspective of Forensic Science Technologies Software 303

15	Advanced Forensic Models	305
	<i>Akshay Sharma, and Piyush K. Rao</i>	
15.1	Introduction	305
15.2	Forensic Models	306
15.2.1	Computer Fire Model	306
15.2.1.1	Zone Model	306
15.2.1.2	Field Model	306
15.2.2	Interpretational Models for DNA Analysis	306
15.2.2.1	Binary Model	307
15.2.2.2	Semi-continuous Model	307
15.2.2.3	Continuous Model	307
15.2.3	Analytical Crime Scene Procedure Model	307
15.2.3.1	Managerial Activity	307
15.2.3.2	Crime Scene Examination	308
15.2.3.3	System Assurance	308
15.2.3.4	Evidence Search	308
15.2.3.5	Evidence Acquisition	309
15.2.3.6	Event Hypothesis and Validation	309
15.2.3.7	Organization of Evidence	309
15.2.3.8	Physical Management of Evidence	309
15.2.3.9	System Service Restoration	309
15.2.3.10	Documentation and Chain of Custody	309
15.2.4	Falsification Model	310
15.2.4.1	The Basic Model	310
15.2.4.2	The Simple Interaction Model	311
15.2.4.3	The Compound Model	311
15.2.5	Drone Forensic Model	311
15.2.5.1	Drone Acquisition	311
15.2.5.2	Physical or Hardware Drone Forensics	311
15.2.6	Digital Forensic Model	313
15.2.6.1	Preparation and Planning	313
15.2.6.2	Collection	314
15.2.6.3	Examination	314

15.2.6.4	Analysis	314
15.2.6.5	Reporting	314
15.2.6.6	Presentation	314
15.2.6.7	Archiving and Returning	314
15.2.7	Behavioral Digital Forensics Model	314
15.2.7.1	Review	315
15.2.7.2	Recognition and Collection	316
15.2.7.3	Examination and Analysis	316
15.2.7.4	Interpretation and Reporting	317
15.2.8	Systematic Digital Forensic Investigation Model	317
15.2.8.1	Preparation	318
15.2.8.2	Securing the Scene	318
15.2.8.3	Survey and Recognition	318
15.2.8.4	Documenting the Scene	318
15.2.8.5	Communication Shielding	318
15.2.8.6	Evidence Collection	319
15.2.8.7	Preservation	319
15.2.8.8	Examination	320
15.2.8.9	Analysis	320
15.2.8.10	Presentation	320
15.2.8.11	Result and Review	320
15.3	Conclusions	321
	References	322

Section VIII Ethical and Legal Issues of Forensic Science 327

16	Conventional and Internal Standards in Forensic Science	329
	<i>Rohith Krishna, and Sheetal Rajan</i>	
16.1	Introduction	329
16.2	Accreditation in Forensic Science	330
16.3	History of Forensic Science Accreditation	330
16.3.1	International Standardization Organization (ISO)	331
16.3.2	The Chartered Society of Forensic Sciences (CSFS)	332
16.3.3	American Board of Criminalistics (ABC)	332
16.3.4	International Association for Identification (IAI)	332
16.3.5	American Association for Laboratory Accreditation (A2LA)	333
16.3.6	National Association of Medical Examiners (NAME)	333
16.3.7	United Kingdom Accreditation Service (UKAS)	333
16.3.8	National Association of Testing Authorities (NATA), Australia	334
16.3.9	National Accreditation Board for Testing and Calibration Laboratories (NABL)	334
16.3.10	Canadian Association for Laboratory Accreditation (CALA)	334
16.4	Ethics in Forensic Science	334
16.4.1	Confirmation Bias	335
16.4.2	Ethics Related to Expert Testimony	336

- 16.4.3 Research Ethics in Forensic Science 336
- 16.5 Standards in Forensic DNA Fingerprinting 336
- 16.6 Standards in Forensic Toxicology 337
- 16.7 Conclusions 339

Section X Future of Forensic Science Technologies 357

- 18 Future of Forensic and Crime Scene Science Technologies 359**
Aakash Arora
- 18.1 Introduction 359
- 18.2 Personal Identification 359
- 18.2.1 Unconventional Ways of Identification 360
- 18.2.1.1 Forensic Radiology 360
- 18.2.1.2 Tiny Friends: Microbiome 361
- 18.2.1.3 Unconventional Biometrics 362
- 18.2.2 Use of Databases in Forensics 362
- 18.2.3 DNA Phenotyping and Facial Reconstruction 363
- 18.3 Virtopsy 363
- 18.4 DNA Analysis Technology 364

18.4.1	Touch DNA	364
18.4.2	MPS or NGS	365
18.4.3	DNA Barcoding	366
18.5	Geotagging in Forensics	366
18.6	Conclusions	367
	References	367
19	Concluding Notes: Future of Technology in Forensic Science	371
	<i>Deepak Rawtani, and Chaudhery Mustansar Hussain</i>	
19.1	Introduction	371
19.2	Modern Society and Forensic Science	371
19.3	Emerging Challenges for Forensic Science	372
19.4	Rereads of the Book	372
19.5	Conclusions	374
	References	374
