Preface — V

About the Editors — XI

Contributing Authors — XIII

Abbreviations — XVII

Maria Georgiadou

Introduction — 1

Michele Aresta, Angela Dibenedetto and Franck Dumeignil

1 Transition from the linear to the circular economy. The role of biorefinery and catalysis — 7

Catia Bastioli, Cecilia Giardi and Fabio Sagnelli

2 Biorefineries of the future — 25

Myrsini Christou, Efthymia Alexopoulou, Ioannis Eleftheriadis, Ioanna Papamichael, Kostas Tsiotas, Mariusz Stolarski, Michal Krzyzaniak and Charles Themistocles

3 Terrestrial biomass production — 43

Angela Dibenedetto

4 Production, uses and LCA assessment of aquatic biomass — 93

Ludwig Selder, Wael Sabra, Wei Wang, Christin Prescher and An-Ping Zeng

5 Bioconversion and downstream processing in the context of biorefinery: Principles and process examples — 123

Raspolli Galletti Anna Maria and Antonetti Claudia

6 Biomass pretreatment: Separation of cellulose, hemicellulose and lignin. Existing technologies and perspectives — 165

David P. Serrano, Juan A. Melero, Gabriel Morales and Marta Paniagua

7 Catalytic systems for the chemical conversion of lignocellulosic platform molecules into drop-in fuels for transport — 199

Stefan Junne, Jasmina Cziommer, Simon Täuber and Peter Neubauer

8 From cellulose to lipids — 229

Matteo Gigli, Simone Cailotto and Claudia Crestini

9 New perspectives in lignin valorization: Lignin-derived nanostructures — 265

Kyriakos D. Panopoulos, Christos Christodoulou
and Efthymia-Ioanna Koytsoumpa

10 Biomass gasification: Gas production and cleaning for diverse applications: CHP and chemical syntheses — 321

Marco Ricci, Daniele Bianchi and Carlo Perego

11 From Syngas to fuels and chemicals: Chemical and biotechnological routes — 345

Michele Aresta

12 Anaerobic digestion of wet biomass. Biogas and biomethane world potential: Opportunities and challenges — 369

Prince N. Amaniampong, Karine De Oliveira Vigier, Cédric Fischmeister,
Christophe Darcel and François Jérôme

13 Homogeneously catalyzed conversion of sugars, sugar derivatives and oils to platform and specialty chemicals — 421

Francesco Nocito and Angela Dibenedetto

14 Heterogeneous catalysis applied to the conversion of biogenic substances, platform molecules and oils — 469

Egon Heuson and Angela Dibenedetto

15 Hybrid catalysis: bridging two worlds for greener chemicals and energy production — 493

Loïc Leclercq and Véronique Nardello-Rataj

16 Pickering emulsions and biomass — 537

Patrizio Salice and Catia Bastioli

17 Case study on bioplastics — 581

Michèle Friend

**18 Assessing the suitability of biomass conversion processes by region:
The economic, social and ecological context — 621**

Index — 637
