Vorwort.....	VII

Teil A Wissenschaftliche Forschungsbeiträge

The paradigm shift of supply chain management: risks, technological innovation and social impact

Hendrik Birkel

Abstract.....	3
1 Introduction	3
2 Structure of research objectives	5
2.1 Part 1: Risk framework for Industry 4.0 within the context of sustainability	6
2.2 Part 2: Challenges and risks of the Internet of Things for supply chain management.....	8
2.3 Part 3: The future of managing supply chain risk through the Internet of Things	11
2.4 Part 4: Supply chain risk management through a bibliometric and network lens	13
3 Moving further: research development and endeavors	16
4 Summary and implications	16
References.....	18

Supply network transparency: structure model, mapping procedure and performance impact

Antonia Kappel

Abstract.....	23
1 Introduction	23
1.1 Increasing risks requiring a high transparency.....	23
1.2 Research gaps and questions.....	24
1.3 Mixed-methods research design	25
2 Theoretical background.....	26
2.1 Supply chain transparency and visibility	26
2.2 Supply chain mapping	27

3	Supply Network Map Structure Model.....	27
3.1	Objectives of Supply Network Mapping	27
3.2	Conceptualization of the structure model	29
3.3	Definitions for actors and relationships	30
4	Supply Network Mapping Procedure	31
4.1	Procedure steps	31
4.2	Desired knowledge for data collection.....	32
4.3	Information sources for data collection.....	33
5	Performance impact	35
5.1	Cost-saving and innovation performance benefits.....	35
5.2	Multi-group analysis: cost vs. innovation leaders	36
6	Conclusion and future research.....	37
6.1	Theoretical and practical contribution	37
6.2	Future research fields	38
	References	39

Towards sustainable supply chains for electric mobility

Christian Thies

	Abstract.....	45
1	Introduction	45
2	Sustainability assessment of products with global supply chains.....	47
2.1	Fundamentals and challenges of sustainability assessment.....	47
2.2	Activity analysis based modeling approach for sustainability assessment.....	49
3	Assessment of alternative supply chains for lithium-ion batteries.....	51
3.1	The supply chain of lithium-ion batteries.....	51
3.2	Assessment setup and implementation	53
3.3	Results and implications	55
4	Conclusions	58
	References	59

Digitization in procurement – challenges and success factors:

A study of the current state in German-speaking companies

Tobias Held, Lukas Schneider, Frank Koppenhagen

	Abstract.....	63
1	Introduction	63
2	Literature review	66
3	Study overview – research design and sample structure.....	69
4	Results.....	71
4.1	Current state of digitization in procurement in German-speaking countries.....	71
4.2	Impact of new IT applications and systems on corporate success	73

4.3	Challenges of digitization	79
4.4	Possible strategies for improved implementation	81
5	Limitations	86
6	Conclusion	86
	References	88

Analysis of business process models in procurement

Marcel Graf

	Abstract	95
1	Introduction	95
1.1	Research topic and approach	95
1.2	Description of different business process models	97
1.3	Publications on process models in procurement	98
1.4	Methodology of literature analysis	99
2	Analysis of the reference models	101
2.1	Overview of the reference models	101
2.2	Identification of the model perspectives	101
2.3	Assessment of the reference models	104
3	Analysis of the process models	106
4	Summary and prospect	108
	References	110
	Appendix A	115

Governance design of blockchain consortia for efficient and transparent procurement and supply chain management

Jacob Lohmer, Lucas Petzok, Rainer Lasch

	Abstract	117
1	Introduction	117
2	Literature review	119
2.1	Blockchain technology and consortia	119
2.2	Governance mechanisms and blockchain technology	120
2.3	Research need	122
3	Methodology of the empirical study	123
3.1	Research approach	123
3.2	Data collection and analysis	123
4	Results of the empirical study	124
4.1	Within-case analysis	124
4.2	Cross-case analysis	128
5	Critical steps to design governance structures in blockchain coordinated supply networks	129
6	Conclusion and outlook	131
	References	132

**Back to the future – development and validation
of a second-order competence model for tomorrow’s purchasing and
supply chain management (PSCM) professionals**

Andreas Fries, Matthias Groß, Hugo Ecksele, Jan Tümmeler

Abstract.....135

1 Introduction135

2 Theoretical foundation137

 2.1 Conceptual basis137

 2.2 Strategy- and evidence-based competence modeling139

 2.3 TALENT-net competence model.....141

3 Methodology143

 3.1 Literature review of PSCM skill requirements143

 3.2 Development and empirical validation of our
 second-order PSCM competency profile147

4 Contributions, implications and future research153

References.....155

Teil B Anwendungsorientierte Forschungsbeiträge

**Anwendungsmöglichkeiten von Process Mining am Beispiel des
Purchase-to-Pay-Prozesses für Raw Materials bei Bosch Power Tools –
ein Theorie-Praxis-Transfer**

Dirk H. Hartel, Filip Javorovic, Leonard Norberg

Abstract.....161

1 Einleitung161

2 Theoretische Grundlagen zum Begriff „Process Mining“163

3 Methodisches Vorgehen und Stand der Forschung.....167

 3.1 Methodisches Vorgehen.....167

 3.2 Stand der Forschung.....169

4 Anwendungsmöglichkeiten von Process Mining am Beispiel von Bosch PT170

 4.1 Untersuchungsbereich.....170

 4.2 Projektzielsetzung.....172

 4.3 Vorgehensweise von Process Mining im Pilotumfeld174

5 Kritische Reflexion der Ergebnisse im Nexus der Forschungsfragen179

6 Übertragbarkeit des gewählten Ansatzes auf weitere Anwendungsfälle.....182

7 Fazit und Ausblick.....183

Literatur184

Transport drones in production logistics: Is there a use case?

Stephan L. K. Freichel, Christoph S. Zoller, Johannes K. Wörtge, Wladimir Rempel

Abstract.....	189
1 Introduction	189
2 Theoretical background.....	191
2.1 General logistics and special production logistics requirements.....	191
2.2 Drones in production logistics	192
2.3 Research questions.....	194
3 Methodology.....	195
3.1 Data collection	195
3.2 Data analysis.....	197
4 Findings.....	198
4.1 Factors influencing the implementation of a use case.....	198
4.2 Requirements for the drone based logistics system	200
4.3 Legal and economic considerations for a use case.....	201
5 Identification of a use case for drone transport in production logistics.....	202
5.1 Requirements and restrictions for a possible use case of drone deployment in production logistics	202
5.2 Possible application scenarios for drone transport in production logistics	203
6 Contribution, limitation and further areas of research.....	204
References.....	206

Digital supplier integration – Transaction 4.0 in buyer-supplier relationships

Markus Burger, Julia Arlinghaus

Abstract.....	211
1 Introduction	211
2 Theoretical background.....	213
2.1 Industry 4.0 and implementation measurement.....	213
2.2 Buyer-supplier relationships in new institutional economics.....	213
2.3 Research gap.....	215
3 Research methodology	216
4 The concept of Transaction 4.0 capabilities.....	218
5 Transaction 4.0 capabilities and supply chain performance – a case analysis	222
6 Discussion	226
7 Conclusion, limitations and further research	227
References.....	228

Managing the supply side of digital platforms: framework, categorization and selection of complementors for industrial IoT and financial services platforms

Wolfgang Buchholz, Holger de Bie

Abstract.....	233
1 Introduction	233
2 Conceptual framework	234
2.1 Framework for platform business models.....	234
2.2 What is the value contribution of the platform?	236
2.3 Why is added value being created?	236
2.4 Who are the actors involved?	237
2.5 How is added value created?	239
3 Research design	240
4 Categorization of complementors	242
4.1 Industry platforms	242
4.2 Financial services platforms	244
5 Factors of influence for selecting and evaluating complementors.....	245
6 Conclusion.....	248
6.1 Summary	248
6.2 Theoretical and managerial implications.....	249
6.3 Research limitation and future research	250
References.....	251

Empirical studies of proposing KPIs for corporate procurement and its strategic suppliers to steer and control sustainable procurement practices

Elisabeth Fröhlich, Lisa Nießen

Abstract.....	257
1 Introduction	257
1.1 Relevance of sustainability and sustainable procurement.....	257
1.2 Research question and structure of the article	259
2 Theoretical foundation, methodological approach and data analysis.....	260
2.1 Theoretical foundation	260
2.2 Methodological approach	263
2.3 Data analysis and implications	263
3 Results.....	265
3.1 KPIs for corporate procurement and its strategic suppliers (economic, ecological and social) – in relation to codes 1 to 4	265
3.2 Reporting, monitoring and implementation strategy – in relation to codes 5 & 6.....	269
4 Outlook	271
References.....	273

Sustainability Governance – Nachhaltigkeit in der Bekleidungsindustrie

Jakob Keller, Kristin Laub, Rainer Lasch

Abstract.....	275
1 Einleitung	275
2 Theoretische Vorbetrachtung.....	277
2.1 Nachhaltigkeit in der Bekleidungsindustrie	277
2.2 Governance	278
2.3 GRI-Standard.....	278
3 Methodik	280
3.1 Case Study Research.....	280
3.2 Untersuchte Fälle	281
4 Ergebnisse.....	282
4.1 Ziele	282
4.2 Governance-Mechanismen	286
4.3 Diskussion.....	289
5 Fazit und Limitationen	292
Literatur	293
Anhang.....	298
 Autorenverzeichnis.....	 299
