Contents

1	What is Urban Nature?
1.1	What Does "Green City" Mean?
1.2	What Does Urban Nature Mean?
1.3	Components of Urban Nature
	References
2	How Urban Nature Developed?
2.1	Urban Nature as a Cultural Product
2.2	Urban Nature Is Establishing
2.3	Public Urban Nature for Beautification, Recreation, Public Health and Public Education
2.4	The Park Cemetery – A Place of Recreation for the Living
2.5	The Urban Forests and Forest Parks - How the Forest Stayed in the City
2.6	The Private Garden for Everyone Complements the Public Urban Nature
2.7	How the Waters Became Urban?
3	How Urban Nature Exists in the Context of Nature and Culture?
3.1	The Relationship Between City and Natural Environment
3.2	Example Forest City: Integration into the Natural Environment
3.3	Example Desert City: Turning Away from the Natural Environment
3.4	Example Mountain City: Dealing with Extreme Natural Environment
3.5	Forest and Wilderness in the City: Places for Religion and Rituals
3.6	Gardens and Parks: Designed Nature for the Urban Recreational Landscape
4	What Services Urban Nature Provides?
4.1	What Ecosystem Services Do We Expect From Urban Nature?
4.2	Which Urban Natures Provide What Kind of Ecosystem Services?
4.3	How Can Urban Ecosystem Services Be Valued?
	References
5	What Urban Nature Provides Which Services?
5.1	The Urban Park
5.1.1	Natural Element Urban Park
5.1.2	Services of Urban Parks
5.2	The Urban Tree Population (Urban Forest)
5.2.1	Nature Elements, Urban Trees and Urban Woodland
5.2.2	Services Provided by Urban Trees
5.3	The Urban Gardens
5.3.1	Natural Element Urban Garden
5.3.2	Urban Gardens as Services Providers
