

Contents

Preface	xvi
Contributors	xvii
Section 1 General	
1. The Anatomy and Functional Importance of Finger Joints: A Short Atlas	3
<i>Martin Franz Langer, David Warwick, Frank Unglaub, and Jörg Grünert</i>	
1.1 Introduction	3
2. Biomaterials in Arthroplasty of the Hand	21
<i>Koo Siu Cheong Jeffrey Justin</i>	
2.1 Introduction	21
2.2 Behavior of Biomaterials	21
2.2.1 Biocompatibility	21
2.2.2 Nontoxicity	21
2.2.3 Corrosion Resistance	22
2.2.4 Strength	22
2.2.5 Modulus of Elasticity	22
2.2.6 Fatigue Resistance	22
2.2.7 Wear Resistance	22
2.2.8 Creep Resistance	22
2.2.9 Osteointegration	22
2.3 Classical Biomaterials	22
2.3.1 Polymers	22
2.3.2 "Nouvelle Vague" for Hand Arthroplasty Development	24
2.3.3 Surface Treatment to Improve Bone Bonding	29
2.3.4 Pyrolytic Carbon	30
2.4 The Limitations of Current Materials	32
2.5 Future of Biomaterials in Hand Arthroplasty	32
2.6 Conclusion	33
3. Proprioception and Neural Feedback in Thumb and Wrist Arthroplasty	37
<i>Elisabet Hagert and Susanne Rein</i>	
3.1 Basis of Proprioception for Joint Control	37
3.1.1 Conscious Proprioception Senses	37
3.1.2 Unconscious Proprioception Senses	37
3.1.3 Sensory Nerve Endings	38
3.2 Innervation Patterns (► Fig. 3.3)	40
3.2.1 Wrist	40
3.2.2 Trapeziometacarpal Joint	40
3.2.3 Distal Radioulnar Joint (DRUJ)	40
3.3 Innervation Patterns in Osteoarthritis	41
3.4 Neural Feedback of the Wrist and Thumb	41
3.5 Clinical Implications	41
3.5.1 The Case for Nerve-Sparing Surgery	41
3.5.2 The Case for Denervation	41
3.6 In Conclusion—to Denervate or Reinnervate?	42

4.	Outcome Measurement in Hand and Wrist Arthroplasty	44
	<i>Miriam Marks</i>	
4.1	Introduction	44
4.2	Frequently Used PROMs Suitable for Patients Undergoing Hand Arthroplasty	44
4.2.1	Michigan Hand Outcomes Questionnaire (MHQ)/Brief MHQ	44
4.2.2	Patient-Rated Wrist Evaluation (PRWE) ...	44
4.2.3	Disability of the Arm, Shoulder, and Hand Questionnaire (DASH)/ <i>Quick</i> DASH?	45
4.2.4	Patient-Reported Outcomes Measurement Information System (PROMIS).....	46
4.2.5	Patient-Specific Functional Scale (PSFS).....	46
4.2.6	Single Assessment Numeric Evaluation (SANE) Score	46
4.2.7	Quality-of-Life Measures	46
4.2.8	Further Validated Hand-Specific PROMs	47
4.3	Core Sets.....	47
4.4	Measurement Properties	47
4.4.1	Reliability	47
4.4.2	Validity	47
4.4.3	Responsiveness.....	47
4.4.4	Interpretability	47
4.5	Choosing an Appropriate Outcome Measure	47
4.6	Collecting and Processing Outcome Measures	48
4.7	Interpretation of Outcomes.....	48
4.7.1	Minimal Important Difference (MID) and Minimal Important Change (MIC)	49
4.7.2	Patient Acceptable Symptom State (PASS)	49
4.8	Conclusion	49
5.	The Norwegian Arthroplasty Register.....	52
	<i>Ynvar Krukhaug</i>	
5.1	Introduction	52
5.2	Wrist Replacements	52
5.2.1	Method	52
5.2.2	Results.....	52
5.3	CMC IA Replacements.....	53
5.3.1	Results.....	53
5.4	Finger Joint Replacement	56
5.4.1	MCP Joint Replacement	56
5.4.2	PIP Joint Replacement.....	56
6.	The History of Arthroplasty in the Hand and Wrist	58
	<i>Michael Brodbeck</i>	
6.1	The Very Early History	58
6.1.1	The Era of Zeus and His Fellow Gods	58
6.1.2	Amputation—Upper Paleolithic to the Middle Ages.....	58
6.2	Milestones in the Modern History of Wrist Arthroplasty.....	58
6.2.1	Resection Arthroplasty.....	58
6.2.2	Interposition Arthroplasty.....	59
6.2.3	The First Total Knee and Wrist Replacement—Themistocles Gluck (1853–1942)	59
6.2.4	The Concept of Flexible Implant Arthroplasty—Alfred B. Swanson (1923–2016)	60

6.3	Early Design Developments in Wrist Arthroplasty	60	6.6	Arthroplasty of Metacarpophalangeal and Proximal Interphalangeal Joints	65
6.3.1	First Generation: Elastomer Flexible Hinge Design	61	6.6.1	Resection/Interposition Arthroplasty	65
6.3.2	Second Generation: Multicomponent Implants	61	6.6.2	Transplant Arthroplasty	66
6.4	Contemporary Designs in Wrist Arthroplasty	64	6.6.3	Hinged Implant Arthroplasty	66
6.4.1	Third Generation: Minimal Bone Resection	64	6.6.4	One-Piece Polymer Arthroplasty	66
6.5	Arthroplasty of the Distal Radioulnar Joint (DRUJ)	65	6.6.5	Metalloplastic Arthroplasty	67
6.5.1	Resection/Interposition Arthroplasty	65	6.6.6	Surface Replacement Arthroplasty	68
6.5.2	Ulna Head Replacement	65	6.6.7	Pyrocarbon Implant Arthroplasty	68
6.5.3	Partial Ulna Head Replacement	65	6.7	Arthroplasty of the Trapeziometacarpal (TMC) Joint	68
6.5.4	Total DRUJ Replacement	65	6.7.1	Interposition Arthroplasty	68
			6.7.2	Hemiarthroplasty of the TMC Joint	69
			6.7.3	Total TMC Arthroplasty	69

Section 2 Arthroplasty of Finger Joints

Section 2A MCP-Arthroplasty

7.	Failure Analysis of Silicone Implants in Metacarpophalangeal and Proximal Interphalangeal Joints	77			
	<i>Grey Giddins and Tom Joyce</i>				
7.1	Introduction	77	7.4	Improving Silicone Implants	79
7.2	Failure Mechanisms	78	7.5	Conclusion	79
7.3	Material Properties	79			
8.	Silicone Interposition Arthroplasty for MCP and PIP joints	81			
	<i>Sarah E. Sasor and Kevin C. Chung</i>				
8.1	Introduction	81	8.3.8	Expected Outcomes	85
8.2	Characteristics of Silicone Implants ..	81	8.4	PIP Joint Arthroplasty	85
8.3	MCP Joint Arthroplasty	81	8.4.1	Indications	86
8.3.1	Indications	81	8.4.2	Contraindications	86
8.3.2	Contraindications	81	8.4.3	Preoperative Evaluation	86
8.3.3	Preoperative Evaluation	81	8.4.4	Surgical Anatomy	86
8.3.4	Surgical Anatomy	82	8.4.5	Approach	86
8.3.5	Approach	82	8.4.6	Authors' Preferred Technique	86
8.3.6	Authors' Preferred Technique	83	8.4.7	Postoperative Care	88
8.3.7	Postoperative Care	85	8.4.8	Expected Outcomes	88

9.	Surface Gliding Implants for the Metacarpophalangeal Joints	91		
	<i>Marco Rizzo</i>			
9.1	Introduction	91	9.4	Results in the Literature
9.2	Characteristics of Surface Gliding Implants	91	9.4.1	Pyrocarbon..... 95
9.2.1	Pyrocarbon.....	91	9.4.2	Surface Replacement Arthroplasty (SRA) 96
9.2.2	Surface Replacement Arthroplasty (SRA) MCP joint	92	9.5	Personal Experience (Pearls/Pitfalls).....
9.3	Indications/Contraindications.....	93	9.6	Conclusion
				97
10.	Vascularized Toe Joint Transfers for Proximal Interphalangeal and Metacarpophalangeal Joint Reconstruction	99		
	<i>Gilles Dautel</i>			
10.1	Introduction	99	10.4.4	Reconstruction of Donor Site
10.2	Anatomical Bases for Joint Transfer to the Hand	99	10.5	Surgical Technique for MTP Transfer from the Second Toe.....
10.2.1	Arterial Network.....	99		101
10.2.2	Venous Drainage of Toe Joint Transfers ..	99	10.6	Outcomes of Vascularized Toe Joint Transfers.....
10.3	Indications for Toe Joint Transfers ..	100		101
10.4	Surgical Technique for PIP Transfer from the Second Toe.....	100	10.6.1	PIP Joint Reconstruction (► Fig. 10.1a-l).....
10.4.1	Preparation of the Recipient Site	100		102
10.4.2	Dissection of Transplant (Donor Site)..	100	10.6.2	MCP Reconstruction (► Fig. 10.2a-e)...
10.4.3	In Situ Arrangement of Transplant	101	10.7	Discussion
			10.8	Conclusion
				104
Section 2B PIP and DIP-Arthroplasty				
11.	The Treatment Strategy in PIP Arthroplasty	109		
	<i>Daniel B. Herren</i>			
11.1	Introduction	109	11.2.3	Combination of Different Interventions.....
11.1.1	Anatomical Considerations for PIP Arthroplasty.....	109		112
11.1.2	Evaluation of PIP Joint Problems	109	11.3	Strategies and Indications in the Treatment of PIP Joint Destruction
11.1.3	Nonoperative Treatment of PIP Destruction	109		112
11.2	PIP Joint Replacement.....	110	11.3.1	Case Example (► Fig. 11.5).....
11.2.1	General Remarks	110		112
11.2.2	Choice of Implants	110	11.3.2	Revision of Failed PIP Arthroplasty
			11.3.3	Discussion of the Case Example
				115

12.	Second-Generation Surface Gliding Proximal Interphalangeal Joint Implants (Metal, Pyrocarbon, and Ceramic).....	117		
	<i>Athanasios Terzis, Florian Neubrech, Lukas Pindur, Nikolai Kuz, and Michael Sauerbier</i>			
12.1	Introduction	117	12.4.1	Results for SR-PIP 119
12.2	Characteristic of Implant or Technique.....	117	12.4.2	Results for Pyrocarbon PIP Arthroplasties 120
12.2.1	SR-PIP Prosthesis	117	12.4.3	Results for the Ceramic PIP Arthroplasty..... 120
12.2.2	Pyrocarbon Prosthesis.....	117	12.5	Authors' Own Experience and Preferred Technique: Tips and Tricks..... 120
12.2.3	Ceramic Prosthesis.....	118		
12.3	Indication and Contraindication ...	118		
12.4	Results in the Literature	119		
13.	Third-Generation PIP Joint Arthroplasty: Tactys	122		
	<i>Michaël Y. Papaloïzos</i>			
13.1	Introduction	122	13.4	Results in the Literature 126
13.2	Development	122	13.5	Author's Own Experience..... 127
13.3	Characteristics of the Implant	123	13.6	Tips and Tricks 127
13.3.1	Surgical Technique.....	123		
13.3.2	Indications/Contraindications.....	125		
14.	Third-Generation PIP Arthroplasty: CapFlex-PIP.....	128		
	<i>Martin Richter</i>			
14.1	Introduction	128	14.5	Author's Own Experience and Preferred Technique 129
14.2	Characteristic of Implant.....	128	14.5.1	Author's Preferred Technique
14.3	Indication and Contraindication ...	129	14.5.2	After-Care.....
14.4	Results in the Literature	129	14.5.3	Author's Own Results
15.	Third-Generation PIP Arthroplasty: The PIP-R	134		
	<i>Chris Williams and Timothy Hardwick</i>			
15.1	Design Rationale	134	15.5	Published Results 135
15.2	Design Features.....	134	15.6	Author's Results 136
15.3	Indications	135	15.7	How We Do the Procedure and Tips .. 136
15.4	Contraindications	135	15.8	Rehabilitation..... 137

16. Surgical Approaches for PIP Joint Arthroplasty.....	138
<i>Massimo Ceruso, Sandra Pfanner, and Giovanni Munz</i>	
16.1 Introduction	138
16.2 Dorsal Approach	138
16.2.1 Dorsal Skin Incision	138
16.2.2 Dorsal Tenotomy to the PIP Joint	138
16.3 Lateral Approach.....	139
16.4 Volar Approach	139
16.5 Literature Review and Authors' Preferred Technique	140
17. Joint Replacement of Osteoarthritic and Posttraumatic Distal Interphalangeal Joints	142
<i>David Elliot, Maria Sirotakova, Adam Sierakowski, and Claire Jane Zweifel</i>	
17.1 Introduction	142
17.2 Characteristic of Silicone Implants for DIP Joint.....	142
17.3 Own Results in the Literature	142
17.4 Own Experience and Preferred Technique for DIP Joint Arthroplasty	143
17.5 Postoperative Care.....	143
17.6 Technique Modification.....	143
17.7 Thumb-IP-Joint Arthroplasty with Silicone Implant.....	144
17.8 Skin Closure.....	145
17.9 Discussion	145
Section 3 Arthroplasty of the Thumb	
18. Silicone Implants and Total Joint Prostheses for Osteoarthritis of the Trapeziometacarpal Joint: A Systematic Review.....	149
<i>Nadine Hollevoet and Grey Giddins</i>	
18.1 Introduction	149
18.2 Materials and Methods	149
18.3 Results	150
18.3.1 Silicone Implants	150
18.3.2 Total Trapeziometacarpal Joint Implants	151
18.4 Discussion	152
19. Pi² and Nugrip Pyrocarbon Arthroplasties of the Thumb CMC Joint.....	168
<i>Ludovic Ardouin</i>	
19.1 Introduction	168
19.2 Characteristic of Implants.....	168
19.2.1 Pi ²	168
19.2.2 Nugrip	168
19.3 Results in the Literature	168
19.3.1 Pi².....	168
19.3.2 Nugrip	169
19.4 Indications/Contraindications.....	169
19.4.1 Indications	169
19.4.2 Contraindications.....	169

19.5	Pi² Implant: Author's Own Experience and Preferred Technique.....	169	19.5.5	Capsuloplasty and Ligament Reconstruction	170
19.5.1	Anteroexternal Approach.....	169	19.5.6	Closure and X-Rays	171
19.5.2	Nontraumatic Trapeziectomy	169	19.5.7	Postoperative Care and Rehabilitation	171
19.5.3	Partial Trapezoidectomy.....	170	19.5.8	Possible Complementary Procedures	171
19.5.4	Placing a Trial Implant and the Final Implant	170			
20.	Pyrocardan and Pyrodisk Arthroplasties of the Thumb CMC Joint.....	173			
	<i>Philippe Bellemère</i>				
20.1	Introduction	173	20.3.1	Characteristics of the Implant.....	176
20.2	Pyrodisk	173	20.3.2	Indications	176
20.2.1	Characteristics of the Implant.....	173	20.3.3	Surgical Technique (► Fig. 20.7).....	176
20.2.2	Indications	173	20.3.4	Results in the Literature	177
20.2.3	Surgical Technique.....	174	20.3.5	Author's Experience.....	177
20.2.4	Results in the Literature	175	20.4	Tips and Tricks for Pyrodisk and Pyrocardan Implants.....	179
20.2.5	Author's Experience.....	175	20.5	Conclusion	179
20.3	Pyrocardan.....	176			
21.	Total Thumb CMC Arthroplasty.....	181			
	<i>Bruno Lussiez</i>				
21.1	Introduction	181	21.4.3	Postoperative Care	185
21.2	Historical Aspects.....	181	21.5	Results	185
21.3	Different Types of Total CMC Arthroplasty (TCA).....	182	21.5.1	Results of the Prosthesis.....	185
21.3.1	The Models (► Table 21.1).....	183	21.5.2	Comparison with Trapeziectomies	185
21.4	Surgical Technique.....	184	21.5.3	Complications (► Table 21.2)	185
21.4.1	Surgical Approaches for TCA.....	184	21.5.4	Revision.....	187
21.4.2	Steps for Insertion	185	21.6	Indications	187
			21.7	Conclusion	188
22.	STT and Peritrapezium Joints Arthroplasties	190			
	<i>Philippe Bellemère</i>				
22.1	Introduction	190	22.3	Double Pyrocarbon Interposition for Peritrapezial OA: "Burger Arthroplasty"	193
22.2	Pyrocarbon Implants for STT Arthroplasty	190	22.3.1	Indications	194
22.2.1	Indications	191	22.3.2	Surgical Technique.....	195
22.2.2	STPI.....	191	22.3.3	Author's Experience.....	195
22.2.3	Pyrocardan Implant in STT Joint.....	192	22.4	Conclusion	195

23.	Thumb IP Joint Arthroplasty: An Alternative to Arthrodesis	196
	<i>Stephan F. Schindele</i>	
23.1	Introduction	196
23.1.1	Treatment Strategies at the Thumb IP Joint	196
23.1.2	Arthroplasty.....	197
23.2	Characteristics of Possible Implants for Thumb IP Joint Replacement	197
23.3	Indications and Contraindications for Thumb IP Joint Replacement	197
23.4	Published Outcomes and Our Own Results	197
23.5	Author's Own Experience and Preferred Technique (Tips and Tricks)	198
 Section 4 Arthroplasty of the Wrist		
24.	Systematic Review of Wrist Arthroplasty	203
	<i>Onur Berber, Lorenzo Garagnani, and Sam Gidwani</i>	
24.1	Introduction	203
24.1.1	Evolution of Total Wrist Arthroplasty..	203
24.1.2	Current Implants	203
24.2	Objectives	205
24.3	Methods	205
24.3.1	Study Inclusion Criteria	205
24.3.2	Search Methods	206
24.3.3	Data Collection and Analysis.....	206
24.4	Results	206
24.4.1	Description of Studies.....	206
24.4.2	Effects of Interventions.....	209
24.5	Discussion	216
25.	Surface Replacement Wrist Arthroplasty	220
	<i>Michel E. H. Boeckstyns and Guillaume Herzberg</i>	
25.1	Introduction	220
25.2	Implants	220
25.3	Indications and Contraindications .	221
25.4	Results in the Literature (Short Version)	221
25.4.1	Complications	221
25.4.2	Functional Results	221
25.4.3	Implant Durability	222
25.5	Authors' Own Experience and Preferred Technique (Tips and Tricks)	222
25.5.1	Personal Experience	222
25.5.2	Revision Surgery.....	223
25.5.3	Tips and Tricks.....	224
26.	Ball-and-Socket Wrist Arthroplasty	226
	<i>Ole Reigstad</i>	
26.1	History of Ball-and-Socket Wrist Arthroplasty	226
26.1.1	Meuli Wrist Arthroplasty.....	226
26.2	Development of a New Ball-and-Socket Arthroplasty	226
26.2.1	Fixation.....	226
26.2.2	Articulation	227

26.3	Introduction of a New Arthroplasty	227	26.3.3	Surgical Method and Follow-Up	228
26.3.1	The Implant	227	26.3.4	Results	228
26.3.2	Patient Selection	227	26.3.5	Revisions	229
			26.4	Conclusion	230
27.	Wrist Hemiarthroplasty for Acute Irreparable Distal Radius Fracture in the Independent Elderly	232			
	<i>Guillaume Herzberg and Marion Burnier</i>				
27.1	Introduction	232	27.4	Authors' Experience	233
27.2	Current Therapeutic Options for Acute IDRF in the Independent Elderly ...	232	27.5	Conclusion	235
27.3	Current Evidence	233			
28.	Pyrocarbon Implants in the Wrist: Amandys and RCPI	236			
	<i>Philippe Bellemère and Augusto Marcuzzi</i>				
28.1	Introduction	236	28.3	RCPI Implant	241
28.2	Amandys Implant	236		<i>Augusto Marcuzzi</i>	
	<i>Philippe Bellemère</i>		28.3.1	Characteristics of Implant	241
28.2.1	Characteristics of the Implant	236	28.3.2	Indications and Contraindications	242
28.2.2	Indications and Contraindications	237	28.3.3	Surgical Technique	242
28.2.3	Surgical Technique	237	28.3.4	Results in the Literature	243
28.2.4	Associated Procedures	238	28.3.5	Author's Own (AM) Experience and Preferred Technique	244
28.2.5	Results	238	28.4	Conclusion	246
28.2.6	Pitfalls, Tips, and Tricks	240			
28.2.7	Summary	240			
29.	Partial Wrist Joint Arthroplasties: APSI, Capitollunate Joint, Pisotriquetral Joint, and Little Finger Carpometacarpal Joint	247			
	<i>Marc Leroy</i>				
29.1	APSI: Adaptative Proximal Scaphoid Implant	247	29.2.4	Results in Literature and in Our Experience	251
29.1.1	Introduction	247	29.3	Pisotriquetral Joint Arthroplasty ...	251
29.1.2	Implant and Surgical Technique	247	29.3.1	Introduction	251
29.1.3	Indication and Contraindication	248	29.3.2	Implant Pyrocardan	251
29.1.4	Results in Literature	248	29.3.3	Surgical Technique and Management ..	252
29.1.5	Comparison with Other Techniques ...	249	29.3.4	Results in Our Experience	252
29.2	Capitolunate Joint Arthroplasty	250	29.4	Little Finger Carpometacarpal Joint Arthroplasty	253
29.2.1	Introduction	250	29.4.1	Introduction	253
29.2.2	Pi2 and RCPI Implants	250			
29.2.3	Surgical Technique and Indication	251			

29.4.2	Current Surgical Techniques	253	29.5	Conclusion	256
29.4.3	Our Approach and Management	254			
30.	Revision Wrist Arthroplasty	258			
	<i>Sumedh C. Talwalkar, Matthew Ricks, and Ian Trail</i>				
30.1	Introduction	258	30.3.4	Summary of Options for Revision of a Wrist Arthroplasty	262
30.2	Causes of Failure of a Wrist Arthroplasty	258	30.4	Revision Arthroplasty Technique ..	262
30.2.1	Infection	258	30.4.1	Technique	262
30.2.2	Aseptic Loosening	258	30.4.2	The Technique Steps	263
30.2.3	Implant Fracture	261	30.5	Unit Experience at Wrightington Hospital	264
30.2.4	Biomechanical Mismatch	261	30.5.1	Unit Experience Background	264
30.3	Managing Bone Loss	262	30.5.2	Survivorship of the Revision TWA in Our Series	264
30.3.1	Bone Grafting	262	30.5.3	Comparison with Other Units	264
30.3.2	Wrist Arthrodesis	262	30.6	Summary	266
30.3.3	Resection Arthroplasty	262			
Section 5 Arthroplasty of the DRUJ					
31.	Systematic Review of Distal Radioulnar Joint (DRUJ) Arthroplasty	271			
	<i>Lawrence Stephen Moulton and Grey Giddins</i>				
31.1	Introduction	271	31.2.7	Assessment of Survivorship	272
31.2	Methods	271	31.3	Results	272
31.2.1	Inclusion Criteria	271	31.3.1	Studies Identified	272
31.2.2	Exclusion Criteria	272	31.3.2	Implant Types	272
31.2.3	Literature Search	272	31.3.3	Literature Quality and Risk of Bias	275
31.2.4	Outcome Measures	272	31.4	Discussion	278
31.2.5	Assessment of the Level of Evidence	272	31.5	Conclusions	282
31.2.6	Assessment of Methodological Quality	272			
32.	First Choice Distal Radioulnar Joint Arthroplasty	284			
	<i>Ladislav Nagy</i>				
32.1	Introduction	284	32.4	Indications	286
32.2	Implant Characteristics	284	32.5	Results in the Literature	287
32.3	Surgical Technique	285	32.6	Author's Own Experience	287

33. UHP DRUJ Arthroplasty	289		
<i>Jörg van Schoonhoven</i>			
33.1 Introduction	289	33.5 Contraindications	292
33.2 Herbert Ulnar Head Prosthesis	290	33.6 Results	292
33.3 Operative Technique	290	33.6.1 Results in the Literature	292
		33.6.2 Patient Example	293
33.4 Indications	291	33.7 Conclusion	294
34. Eclipse Distal Radioulnar Joint Arthroplasty	296		
<i>Dirck Ananos Flores and Marc Garcia-Elias</i>			
34.1 Introduction	296	34.4 Results in the Literature	300
34.2 Characteristics of the Implant and Technique	296	34.5 Author's Experience and Preferred Technique (Tips and Tricks)	300
34.2.1 Technique	296	34.5.1 Results	300
34.3 Indications and Contraindications ..	298	34.5.2 Tips and Tricks	300
35. Salvage Distal Radioulnar Joint Arthroplasty with the Aptis Implant	301		
<i>Maurizio Calcagni, Thomas Giesen, Marco Guidi, Lisa Reissner, and Florian S. Frueh</i>			
35.1 Introduction	301	35.5 Authors' Own Experience and Preferred Technique (Tips and Tricks)	302
35.2 The Implant and Technique	301		
35.3 Indications and Contraindications ..	302	35.6 Conclusions	305
35.4 Results in the Literature	302
