

Contents

1	Fundamentals of Airline Revenue Management	1
1.1	Prerequisites for Applying Revenue Management	1
1.2	The Rationale for Applying Revenue Management	4
1.3	Fundamental KPIs Used in Airline Revenue Management	6
1.4	Practitioner View: Balancing Yield and Load Factor	8
1.5	Revenue Management Within the Value Chain of an Airline	10
1.6	Challenge: Seasonality of Demand	10
1.7	Demand Curve Revisited	11
1.8	Checkpoint Chap. 1	12
2	Computerized Revenue Management	15
2.1	Process Flow of a Revenue Management System	15
2.2	Limitations of Fully Automated Revenue Management	18
2.3	Checkpoint Chap. 2	20
3	Estimation and Forecasting	21
3.1	Practical Relevance of Estimation and Forecasting	21
3.2	Unconstraining of Demand Data: EM Algorithm	24
3.3	Pick-up Forecasting	30
3.4	Stationary and Nonstationary Time-Series Models	32
3.5	ARMA Processes	33
3.6	M-period Moving Average Forecasting	35
3.7	Exponential Smoothing	36
3.8	Checkpoint Chap. 3	37
4	Optimization, Types of Control, and Overbooking	39
4.1	Booking Limits	39
4.2	Littlewood's Rule	41
4.3	Expected Marginal Seat Revenue (EMSR)	43
4.4	Overbooking	45
4.5	Rationale for Overbooking	45
4.6	Deterministic Overbooking Approach	47

4.7	Stochastic Overbooking Approach	48
4.8	Cost-based Overbooking Approach	49
4.9	Legal Implications: EU Regulation 261	50
4.10	Checkpoint Chap. 4	51
5	Network Revenue Management	53
5.1	Pros and Cons of Network Revenue Management	53
5.2	The Fundamentals of Network Revenue Management	54
5.3	Revenue Value Buckets	56
5.4	Displacement Costs	57
5.5	Bid Price Control	58
5.6	Checkpoint Chap. 5	58
6	Ancillary Revenues	61
6.1	Types of Ancillary Products	64
6.2	Implications for Revenue Management	65
6.3	Checkpoint Chap. 6	67
7	Data Science and Revenue Management	71
7.1	The Fundamental Idea(s) Behind Data Science	72
7.1.1	Understanding Analytics: Model-based Analytical Approaches	72
7.1.2	Applying Analytics: A Taxonomy of Modern Analytical Methods	74
7.1.2.1	Statistics	75
7.1.2.2	Mathematical Optimization	76
7.1.2.3	Machine Learning	77
7.1.3	The Analytical Cycle: Solving Business Problems with Analytical Methods	78
7.2	Engineering Analytics: Big Data Infrastructure and Data Pipelines . . .	80
7.3	Managing Analytics: Structuring Analytical Capabilities and Processes	81
7.4	Data Science—Revenue Management Use Cases	84
7.4.1	Data Science—Use Case: Mid-/long-term Demand Forecasting	85
7.4.1.1	Business Problem	85
7.4.1.2	Data Sourcing and Structure	85
7.4.1.3	Methodological Problem	89
7.4.1.4	Goal Definition	91
7.4.1.5	Development of the Approach(es)	95
7.4.1.6	Results and Discussion	105

7.4.2	Data Science: Use Case—Overbooking	107
7.4.2.1	Business Problem	107
7.4.2.2	Data Sourcing and Structure	107
7.4.2.3	Methodological Problem and Goal Definition	107
7.4.2.4	Development of the Approach(es)	107
7.4.2.5	Results and Discussion	108
7.5	Data Science—An Annotated Bibliography	108
7.5.1	Theory	109
7.5.2	Practical	110
7.5.3	Applied	111
7.6	Checkpoint Chap. 7	111
	Bibliography	113
