Preface — V

Polymer Surface Characterization – 2nd Edition — XI

Stefania Cometa, Luigia Sabbatini

1 Introductory remarks on polymers and polymer surfaces — 1

Elvira De Giglio, Nicoletta Ditaranto, Luigia Sabbatini

2 Polymer surface chemistry: characterization by XPS — 45

Adam P. Hitchcock

3 Polymer surface characterization by near-edge X-ray absorption fine structure spectroscopy — 89

Beat A. Keller, Marco Consumi, Gemma Leone, Agnese Magnani

4 Investigation of polymer surfaces by time-of-flight secondary ion mass spectrometry — 125

Filippo Mangolini, Antonella Rossi

5 Advances in attenuated total reflection (ATR) infrared spectroscopy: a powerful tool for investigating polymer surfaces and interfaces — 173

Dalia Yablon

6 Scanning probe microscopy of polymers — 217

Miroslav Šlouf, František Lednický, Petr Wandrol, T. Vacková

7 Polymer surface morphology: characterization by electron microscopies — 239

Eva Bittrich, Klaus-Jochen Eichhorn

8 Application of spectroscopic ellipsometry in the analysis of thin polymer films/polymer interfaces — 281

Rosa Di Mundo, Fabio Palumbo

9 Wettability of polymer surfaces: significance and measurements. Recent developments and applications — 323

X — Contents

Elisabetta Tranquillo, Antonio Gloria, Marco Domingos

10 Nanoindentation: characterizing the mechanical properties of polymeric surfaces — 361

Index — 385
