Preface	xv
Acknowledgments	xvi
Contributors	xvii
Part I Getting Started	1
<i>Esther M. M. Van Lieshout, Parag Sancheti</i>	
1 Leadership and Management: The Principal Investigator and Research Coordinator	2
<i>Heather Dwyer</i>	
1.1 Introduction	2
1.2 Leadership Styles	2
1.2.1 Autocratic Leaders	2
1.2.2 Democratic Leaders	3
1.2.3 Laissez-Faire Leadership	3
1.3 Building a Motivational Workplace	3
1.3.1 Emotional Intelligence	3
1.3.2 Physical Environment	4
1.3.3 Mandates and Vision	4
1.4 Mentoring New Staff	4
1.4.1 Orientation	4
1.4.2 Mentoring	5
1.4.3 Performance Reviews	6
1.5 Communicating with Staff	6
1.5.1 Communication Strategies	6
1.5.2 Communicating with External Staff	7
1.5.3 Relationship/Team Building	7
1.6 Organization	8
1.6.1 Documentation	8
1.6.2 Time Management	8
1.7 Management Competence	10
1.7.1 Managing Up and Managing Down	10
1.7.2 Professional Development	10
1.8 Conclusion	11
2 Roles: Why a Research Coordinator Is Critical	12
<i>Kelly Trask</i>	
2.1 Introduction	12
2.1.1 Why a Research Coordinator is Necessary	12
2.1.2 Education and Certification	13
2.1.3 Delegation of Duties	14
2.2 Duties	15
2.2.1 Study Participant Care	16
2.2.2 Data Management	17
2.2.3 Study Planning, Coordination, and Administration	18
2.2.4 Further Tasks	20
2.3 Practical Application	20
2.4 Conclusion	22
3 Hiring: Characteristics of a Highly Qualified Research Coordinator	24
<i>Milena R. Vicente</i>	
3.1 Introduction	24
3.1.1 The Research Coordinator Role	24
3.1.2 The Decision to Hire	24
3.1.3 Hiring Process	25
3.1.4 The Interview	28
3.1.5 Making a Decision	29
3.2 Desirable Characteristics	29
3.2.1 Communication Skills	29
3.2.2 Team Building Skills	30
3.2.3 Interpersonal Skills	30
3.2.4 Positive Attitude	31
3.2.5 Professional Skills	31

3.2.6	Regulatory and Ethics Guidelines.....	32	3.2.10	Financial or Grant Management	34
3.2.7	Computer Skills and Project Management	33	3.3	The Newly Hired Research Coordinator	35
3.2.8	Clinical Experience	34	3.4	Conclusion	35
3.2.9	Writing Skills.....	34			
4	Growth: From 0 to 100, Real Quick!	37			
	<i>Nicole M. Harris, Darren M. Roffey</i>				
4.1	Introduction	37	4.7.2	Who will approach the patient?	44
4.2	Protocol Development	37	4.7.3	When will the patient be contacted? ...	44
4.3	Informed Consent Form	39	4.7.4	Where will the patient be contacted? ...	44
4.4	Communication.....	39	4.7.5	How will patient contact occur?	45
4.5	Enthusiasm.....	40	4.8	Practical Application	45
4.6	Training.....	41	4.8.1	Designing a Recruitment Plan	45
4.7	Recruitment	42	4.9	Conclusion	46
4.7.1	Identifying Eligible Patients.....	43			
Part II	What Every Research Coordinator Needs To Know	49			
	<i>Ernesto Guerra Farfán, Dinesh Kumbhare, Anthony Adili</i>				
5	What Is Evidence-Based Medicine?	50			
	<i>Ellie B. M. Landman</i>				
5.1	Introduction	50	5.4	Where Do We Stand in Evidence-Based Medicine Today?.....	54
5.2	The History of Evidence-Based Medicine.....	50	5.4.1	Criticism of Evidence-Based Medicine	54
5.3	Principles of Evidence-Based Medicine.....	51	5.4.2	Clinical Research.....	55
5.3.1	Best Available Evidence	51	5.5	Practical Application	55
5.3.2	Evaluate Available Evidence.....	52	5.5.1	Clinical Example	55
5.3.3	Application of Evidence in the Care for Individual Patients	53	5.6	Conclusion	56
6	Randomized Controlled Trials	58			
	<i>Miriam Garrido Clua</i>				
6.1	Introduction	58	6.5	Recruitment of Study Participants	63
6.2	What Is a Randomized Controlled Trial?	58	6.5.1	Tips for Coordinators	63
6.2.1	Study Population	59	6.6	Participant Adherence	64
6.2.2	Randomized Controlled Trial Study Design	59	6.7	Assessing and Reporting Adverse Events (AEs)	64
6.2.3	Random Assignment (Randomization).....	60	6.7.1	Monitoring a Randomized Controlled Trial.....	65
6.2.4	Blinding	61	6.8	Ethical Considerations.....	65
6.3	Outcome Measurement	62	6.9	Practical Application	66
6.3.1	Reliability and Validity of Outcomes Measures.....	62	6.10	Conclusion	66
6.4	Quality Control and Data Collection	62			

7	Observational Studies	68		
	<i>Pieta Krijnen</i>			
7.1	Introduction	68	7.6	Performing the Study
7.2	Types of Observational Studies ..	68	7.6.1	Initiation Phase
7.2.1	Cohort Studies	68	7.6.2	Data Collection
7.2.2	Case-Control Studies	68	7.6.3	Patient Inclusion in Prospective Studies
7.2.3	Case Series	69	7.6.4	Keep the Staff Informed and Committed during the Study
7.3	Pros and Cons of Observational Studies	69	7.7	Data Analysis
7.4	Types of Bias Associated with Observational Studies	69	7.7.1	Dealing with Confounding
7.5	Designing Observational Studies ..	70	7.7.2	Handling Missing Outcome Data
7.5.1	General Information	70	7.8	Reporting
7.5.2	Define Research Questions Based on a Literature Review	70	7.9	Practical Application
7.5.3	Choose the Study Design	71	7.9.1	Background
7.5.4	Define the Study Population	72	7.9.2	Study Objective
7.5.5	Describe the Treatment and Procedures	72	7.9.3	Study Design
7.5.6	Describe the Study Parameters	73	7.9.4	Patients
7.5.7	Outcomes and Other Study Parameters	73	7.9.5	Treatment
7.5.8	Study Procedure	74	7.9.6	Study Outcomes and Other Parameters
7.5.9	Statistical Analysis Plan	74	7.9.7	Sample Size
7.5.10	Ethical Considerations/Data Handling	74	7.9.8	Statistical Analysis
			7.9.9	Ethical Considerations
			7.10	Conclusion
8	Surveys	81		
	<i>Miriam Garrido Clua</i>			
8.1	Introduction	81	8.5	Research Tool Design
8.1.1	What Is a Survey Study?	81	8.5.1	Types of Questions
8.2	Research Methods	82	8.5.2	Questionnaire Layout
8.2.1	Questionnaires	82	8.5.3	Question Wording
8.2.2	Face-to-Face Interviews	83	8.5.4	Question Order
8.2.3	Telephone Interviews	83	8.6	Training the Interviewers
8.3	Selecting the Survey Method ...	84	8.7	Pilot Testing
8.3.1	Population	84	8.8	Translation
8.3.2	Research Question	84	8.9	Reliability and Validity
8.3.3	Content of the Study	85	8.10	Analysis of Survey Data
8.3.4	Bias Issues	85	8.11	Ethics of Survey Research
8.3.5	Resources	85	8.12	Practical Application
8.4	Sample and Sampling	85	8.13	Conclusion
8.4.1	Random Sampling	86		
8.4.2	Nonrandom Sampling	86		

9	Qualitative Studies	94
	<i>Patricia Schneider</i>	
9.1	Objectives	94
9.2	Introduction	94
9.2.1	Why Qualitative Research?	94
9.2.2	What is Qualitative Research?	94
9.2.3	Qualitative versus Quantitative Research	94
9.2.4	Advantages of Qualitative Research	94
9.3	Designing and Conducting the Study	95
9.3.1	General Study Details	95
9.3.2	Research Question	95
9.3.3	Research Objectives	95
9.4	Study Methods	95
9.4.1	Ethnography	95
9.4.2	Grounded Theory	95
9.4.3	Phenomenology	95
9.5	Sampling	95
9.5.1	Purposive Sampling	96
9.5.2	Quota Sampling	96
9.5.3	Chain-Referral (Snowball) Sampling	96
9.6	Sample Size	96
9.7	Qualitative Data Collection	97
9.7.1	Observation	97
9.7.2	Interview	97
9.7.3	Focus Group	97
9.7.4	Discussion Guide/Interview Script Development	98
9.7.5	Interview/Focus Group Question Development	99
9.7.6	Collecting Initial Demographic Details	99
9.7.7	Obtaining Adequate Responses	99
9.7.8	Transcription of Interviews and Focus Groups	100
9.8	Data Analysis and Interpretation	100
10	Principles of Good Clinical Practice and Research Conduct	109
	<i>Naveen Khan</i>	
10.1	Introduction	109
10.2	History of Good Clinical Practice	109
10.2.1	Revisiting a Drastically Different Era of Clinical Studies	109
10.3	The History of GCP Guidelines	110
9.8.1	Qualitative Data Analysis Approaches	100
9.8.2	Qualitative Data Coding	100
9.8.3	Data Management Software	101
9.9	Reporting and Disseminating the Study	101
9.9.1	Where to Publish?	102
9.9.2	Authorship	102
9.10	Ethical Implications	102
9.10.1	Informed Consent	102
9.10.2	Protecting Confidentiality	102
9.11	Other Considerations	102
9.11.1	Generalizability	102
9.11.2	Ambiguities	102
9.11.3	Frequency	103
9.12	Types of Bias Associated with Qualitative Studies	103
9.12.1	Strategies for Managing Bias	103
9.13	Practical Application	103
9.13.1	Background	103
9.13.2	Study Objective	104
9.13.3	Study Design	104
9.13.4	Participants	104
9.13.5	Discussion Guide	104
9.13.6	Sample Size	104
9.13.7	Ethical Considerations	104
9.13.8	Analysis	105
9.13.9	Reporting	105
9.14	Conclusion	105
9.15	Appendix A: Collaborative Research Focus Group Discussion Guide	107
9.15.1	Welcome, Introductions, and Informed Consent	107
9.15.2	Discussion Topics	107
10.4	The ICH-GCP Guidelines	111
10.4.1	Introduction and Major Principles	111
10.4.2	Roles and Responsibilities of Involved Parties	111
10.4.3	Essential Documents	113

10.4.4	Advantages of the ICH-GCP Guidelines	115	10.5.2	Technological Advancements	116
10.5	Future Directions and Challenges	115	10.6	Practical Application	116
10.5.1	Globalization and the Universal Adoption of GCP.	115	10.6.1	Good Clinical Practice Checklist for Clinical Research Coordinators	117
			10.7	Conclusion	117
Part III	From Idea to Study Start-Up	119			
	<i>Rebecca Ivers, Jack Chun-Yiu Cheng</i>				
11	Principles of Grant Writing: Tips for a Successful Experience	120			
	<i>Milena R. Vicente, Sarah Desjardins</i>				
11.1	Introduction	120	11.3	Conclusion	128
11.2	Getting Started	120	11.4	Practical Application	128
11.2.1	Start early	120	11.4.1	Common issues That Result in Grant Rejection.	129
12	Dollars and “Sense”: A Guide to Research Finances	130			
	<i>Johanna Dobransky, Darren M. Roffey</i>				
12.1	Introduction	130	12.2.9	Need for a Contingency Budget	134
12.2	Planning and Creating a Research Budget	130	12.2.10	Pitfalls Associated with Budgetary Planning	135
12.2.1	Preplanning Phase	130	12.3	Ongoing Monitoring of a Research Budget	135
12.2.2	Funding Source	130	12.3.1	Invoicing and Payments	135
12.2.3	Centralized versus Decentralized Budgetary Management	131	12.3.2	Amending the Study Budget	136
12.2.4	Financial Lifecycle	131	12.4	Study Termination	136
12.2.5	Planning the Budget	131	12.4.1	Premature Study Termination	136
12.2.6	Key Expenses	131	12.5	Practical Application	136
12.2.7	Direct and Indirect Costs	132	12.6	Conclusion	138
12.2.8	Negotiating the Study Budget	132			
13	Maintaining Records and the Trial Master File	143			
	<i>Alisha Garibaldi</i>				
13.1	Introduction	143	13.1.6	When the Methods Center Is also a Participating Clinical Site	152
13.1.1	What Is a Trial Master File?	143	13.1.7	Do I Really Need a Binder?	152
13.1.2	Why All of the Documentation?	149	13.1.8	Spotlight: The Clinical Site Manual	152
13.1.3	Setting up a Trial Master File at a Participating Clinical Site	149	13.1.9	Internal audits	153
13.1.4	Setting up a Trial Master File at a Methods Center	151	13.1.10	Practical Application	153
13.1.5	Document Control and the Trial Master File	152	13.2	Conclusion	154
14	Ethics Submissions	155			
	<i>Bregje J. W. Thomassen, Michel Sourour, Kesh Reddy</i>				
14.1	Introduction	155	14.1.3	Review Process	157
14.1.1	Research Ethics Committee	155	14.1.4	Multicenter Human Studies and International Studies	159
14.1.2	Research Ethics Committee Submission	157	14.2	Conclusion	160

15	The Basics of Research Contracts	161
	<i>Caroline Woods</i>	
15.1	Introduction	161
15.2	Different Types of the Agreements	161
15.2.1	Grant Funding	161
15.2.2	Collaboration	161
15.2.3	Sites	162
15.2.4	Industry Involved in Investigator Initiated Study	162
15.2.5	Industry-Initiated Study Agreement	162
15.3	The Parts of an Agreement	162
15.3.1	The Parties	162
15.3.2	The Preamble	163
15.3.3	The Clauses	163
15.3.4	Signatories	165
15.4	Practical Application	165
15.4.1	Examples of Clauses	165
15.5	Study Budget	165
15.5.1	Overview	165
15.5.2	The Terms	166
15.6	Intellectual Property	166
15.6.1	Overview	166
15.6.2	The Terms	166
15.7	Publication Clause	167
15.7.1	Overview	167
15.7.2	The Terms	167
15.8	Conclusion	167
16	How to Start-Up a Study	169
	<i>Ellie B. M. Landman</i>	
16.1	Introduction	169
16.2	Study Start-Up Phase	169
16.2.1	Identify and Contact Sites	170
16.2.2	Feasibility	171
16.2.3	Clinical Trial Agreement Negotiation	171
16.2.4	Regulatory and Ethics Approval	172
16.2.5	Site Initiation Visit	172
16.2.6	Site Activation	173
16.3	Challenges Encountered During Start-Up	173
16.3.1	Protocol Adherence	173
16.3.2	Meeting Recruitment Goals	173
16.3.3	Delaying Factors	174
16.3.4	Guidelines for Good Clinical Practice	174
16.3.5	Drug, Device, or Procedure	174
16.4	Practical Application	174
16.5	Keys to Success	174
16.6	Conclusion	175
Part IV	Study Execution and Close-Out	177
	<i>Aaron Nauth, Kim Madden, Paul Tornetta</i>	
17	Screening and Recruiting Participants	178
	<i>Nienke Wolterbeek</i>	
17.1	Introduction	178
17.2	Recruitment, prescreening, and study screening	178
17.3	Barriers for Inclusion	179
17.4	Ethical Considerations	179
17.5	How to Improve Recruitment and Screening	180
17.5.1	Target Population	180
17.5.2	Recruitment Plan and Contact Methods	180
17.5.3	Screening Mechanism	182
17.5.4	Study Design	182
17.6	Practical Application	182
17.6.1	Recruitment	184
17.6.2	Prescreening Phase	184
17.6.3	Screening Phase	185
17.7	Conclusion	185

18	Obtaining Informed Consent	187
	<i>Chandni Patel, Nazanin Barkhordari</i>	
18.1	Introduction: What Is Informed Consent?	187
18.2	The Informed Consent Process ...	187
18.3	Voluntary Consent	188
18.4	Consent Should Be Informed	188
18.5	Basic Elements of Informed Consent	188
18.6	Participants Must Be Free to Withdraw	189
19	Collecting Data: Paper and Electronic Data Capture Systems	193
	<i>Esther M. M. Van Lieshout, Stephanie M. Zielinski</i>	
19.1	Introduction	193
19.2	The Aim of Data Collection in a Clinical Study	193
19.3	What Data Should Be Collected ..	193
19.4	Source Data	194
19.5	Multidisciplinary Approach	194
19.6	Case Report Forms, Remote Data Entry, and Electronic Data Capture	194
19.7	Datasheets on Paper versus eCRF	195
19.8	Examples of Available EDCs	195
19.9	Case Report Form Design Guidelines	197
19.9.1	Response Types and Coding	199
19.10	Conclusion	199
20	Follow-Up: Why It Is Important and How to Minimize Loss to Follow-Up	203
	<i>Stephanie L. Tanner</i>	
20.1	Introduction	203
20.2	Why Is Follow-Up Important?	203
20.3	Why Are Participants Lost to Follow-Up (Why Do Patients Leave a Study)?	204
20.4	Strategies to Minimize Loss to Follow-Up	205
20.4.1	Study Design Strategies	205
20.4.2	Methods Center/Sponsor Study Management	207
20.4.3	Local Site Study Management to Maintain Follow-Up	207
20.4.4	Retention Strategies	211
20.5	Practical Application	212
20.6	Conclusion	212
21	How to Close Out a Study	214
	<i>Kelly Trask</i>	
21.1	Introduction	214
21.2	Reasons for Study Closure	214
21.3	The Process of Study Closure	215
21.3.1	Preparing for the Closeout Visit	215
21.4	The Closeout Visit	216
21.4.1	What if There Isn't a Closeout Visit? ...	217
21.5	After the Closeout Visit	217
21.5.1	Closing the Study with the Ethics Committee	217
21.6	Record Retention	217
21.7	After the Study Closure	218
21.8	Practical Application	219
21.9	Conclusion	219

22	Knowledge Dissemination: Getting the Word Out!	222
	<i>Cheryl Kreviazuk, Darren M. Roffey</i>	
22.1	Introduction	222
22.1.1	Knowledge Dissemination.....	222
22.1.2	Maximizing Uptake of Knowledge Dissemination.....	223
22.1.3	Developing an Effective Dissemination Plan.....	224
22.1.4	Traditional Knowledge Dissemination.....	225
22.1.5	Nontraditional Knowledge Dissemination.....	227
22.1.6	Traditional versus Nontraditional Knowledge Dissemination: Which Is Better?.....	229
22.1.7	Barriers to Implementation	229
22.2	Practical Application	230
22.3	Conclusion	231
Part V	Advanced Principles of Research Coordination	235
	<i>Ydo V. Kleinlugtenbelt, Rudolf W. Poolman</i>	
23	Regulatory Trials: Key Differences from Standard Trials	236
	<i>Deborah J. Carr</i>	
23.1	Introduction	236
23.1.1	What Are Clinical and Regulatory Trials?.....	236
23.2	History of Regulation and International Harmonization	236
23.2.1	Role of the Regulatory Agency	237
23.2.2	Structure of Regulatory Trials	238
23.2.3	Key Differences between Standard Clinical Trials and Regulatory Trials.....	238
23.2.4	Good Clinical Practice Relevant in Regulatory Trials.....	239
23.2.5	Follow a Detailed Protocol.....	240
23.2.6	Trial Registration.....	240
23.2.7	Prompt Reporting and Public Disclosure of Interventional Clinical Trial Results.....	241
23.2.8	Safety Reporting.....	242
23.3	The Research Coordinator's Responsibilities	242
23.4	Standard Definitions	242
23.5	Expedited Reporting: When, What, Why, and How?	243
23.5.1	What and Why?	243
23.5.2	When?.....	243
23.5.3	Event Time Frame.....	243
23.5.4	How?	243
23.5.5	Documentation	243
23.5.6	Audits	243
23.5.7	Investigator Qualifications and Agreements	244
23.5.8	Clinical Study Report	244
23.5.9	Practical Application	244
23.6	Conclusion	249
24	How to Survive a Site Audit	251
	<i>Annemieke I. J. M. Schellevis-Mintiens, Esther M. M. Van Lieshout</i>	
24.1	Introduction	251
24.2	The Difference between Monitoring and Auditing	251
24.2.1	First Line of Defense: Procedures	251
24.2.2	Second Line of Defense: Monitoring	252
24.2.3	Third Line of Defense: Auditing.....	252
24.3	What to Do When You Find Out You Will Be Audited	253
24.4	Content of the Study: The Big Picture	253
24.5	Documentation	253
24.6	Meetings and Interviews with Auditors	254
24.6.1	Introduction or Start-Up Meeting.....	254
24.6.2	Audit Interviews	254
24.6.3	Daily Briefings.....	255
24.6.4	Informal Conversations in between Audit Events	255
24.6.5	Final Audit Meeting	255

24.7	Role of the PI, Research Coordinator, and Team	255	24.9.1	Audit Report	256
24.8	Practical Aspects: Travel, Space, Food and Drinks	256	24.9.2	Corrective Action/Preventive Action Plan (CAPA Plan)	256
24.9	Report and Corrective Action/ Preventive Action Plan (CAPA Plan)	256	24.9.3	Life after the Audit	257
			24.10	Practical Application	257
25	Monitoring in a Clinical Study: Why and How?	258			
	<i>David Pogorzelski</i>				
25.1	Introduction	258	25.12	Risk-Based Monitoring	264
25.2	Purpose of Monitoring	258	25.13	Data and Safety Monitoring Committee	265
25.3	Responsibilities, Extent, and Nature of Monitoring	258	25.14	Practical Application: Ensuring an AWESOME Site Visit	265
25.4	Monitor Qualifications	258	25.15	Scheduling	265
25.5	Monitoring Visits	259	25.16	Preparation	265
25.6	Site Selection Visit	259	25.17	Previous Monitoring Reports	265
25.7	Site Initiation Visit	260	25.18	During the Visit	266
25.8	Routine Monitoring Visits	260	25.19	After the Visit	266
25.9	Closeout Visit	261	25.20	Managing Expectations	266
25.10	Monitoring Reports	262			
25.11	Centralized Monitoring	262			
26	Managing Large Studies: Organization and Committees	267			
	<i>Stephanie L. Tanner</i>				
26.1	Introduction	267	26.3	Additional Study Oversight Committees	270
26.2	Study Management Committee	267	26.3.1	Steering Committee	271
26.2.1	Study Principal Investigator	267	26.3.2	Data Safety Monitoring Committee/Data Safety Monitoring Boards	271
26.2.2	Coinvestigators	268	26.3.3	Adjudication Committee	273
26.2.3	Study Manager	269	26.4	Other Study Committees	274
26.2.4	Database Managers	269	26.4.1	Writing Committee/Data Dissemination Committee	274
26.2.5	Financial Analysts/Business Analysts	269	26.4.2	Audit/Monitoring Committee	274
26.2.6	Research Assistants	270	26.5	Practical Application	274
26.2.7	Study Statistician	270	26.6	Conclusion	275
26.2.8	Study Monitors	270			
26.2.9	Additional Team Members	270			
27	International Research: Challenges and Successes	276			
	<i>Chuan Silvia Li, Mandeep S. Dhillon</i>				
27.1	Introduction	276	27.6	Language Challenges	278
