Preface	VI
Preface to the 1st Edition	VII

A Muscle Chains 1

Philipp Richter

1 Introduction.....2

2 Models for Myofascial Chains9

2.1 Herman Kabat (1950): Proprioceptive Neuromuscular Facilitation	9	2.4 Leopold Busquet	17
Motion Patterns	9	Muscle Chains	17
Application Modalities	10	Myofascial Chains According to Busquet.	17
Observations	10	Functions of the Myofascial Muscle Chain.	23
2.2 Godelieve Denys-Struyf	10	2.5 Paul Chauffour: Mechanical Link in Osteopathy	24
Classification of the Five Muscle Chains	11	Paul Chauffour's Biomechanical Chains	24
2.3 Thomas W. Myers	14	2.6 Summary of Myofascial Chain Models	25
"Anatomy Trains" (Myofascial Meridians)	14		
Myofascial Chains According to T. Myers.	14		

3 Physiology.....26

3.1 Connective Tissue	26	3.4 Vegetative Innervation of Organs	32
Cells	26	3.5 Irvin M. Korr	32
Intercellular Substance	26	Significance of Somatic Dysfunctions of the Spine for the Entire Organism	32
Connective Tissue Supply	27	Role of the Spinal Cord	33
"Creep" Phenomenon	28	Role of the Autonomic Nervous System	33
3.2 Muscles	28	Significance of Nerves for Trophism	33
3.3 Fasciae	28	3.6 Sir Charles Sherrington	33
Functions of Fasciae	28	Inhibition of Antagonists or Reciprocal Innervation (or Inhibition)	34
Manifestations of Fascial Disorders	29	Postisometric Relaxation	34
Evaluation of Fascial Tensions	29	Temporal and Spatial Summation	34
Causes of Musculoskeletal Dysfunctions	30	Successive Induction	34
Genesis of Myofascial Disorders	30		
Pain Patterns	30		

3.7	Harrison H. Fryette	34	Gait Analysis	37
	Lovett's Laws	35	Muscle Activity while Walking	37
	Fryette's Laws	35	Conclusion	41
	Gait as a Global Functional Motion Pattern.	36		
4	The Craniosacral Model	43		
4.1	William G. Sutherland	43	Sidebending–Rotation	50
4.2	Biomechanics of the Craniosacral System.	44	Vertical and Lateral Strain.	51
4.3	Motions and Dysfunctions of the Craniosacral Mechanism.	47	Compression Dysfunction in the Sphenobasilar Synchondrosis	51
	Flexion–Extension	47	Intraosseal Dysfunctions	52
	Torsion	47	Sacrum Dysfunctions	54
4.4	Impact of Cranial Dysfunctions and Malpositions on the Periphery	54		
5	The Biomechanical Model of John Martin Littlejohn: Mechanics of the Spine.	56		
5.1	History	56	5.4 Arches, Pivots, and Double Arches.	60
5.2	“Mechanics of the Spine” and the Body's Lines of Force.	56	Arches	60
	Central Gravity Line	57	Pivots	61
	Anterior Body Line	57	Double Arches	61
	Anteroposterior Line	59	5.5 Specific Adjusting Technique as per Dummer	62
	Two Posteroanterior Lines	59	History	62
5.3	Polygon of Forces	60	Procedure	63
			Three Units	63
6	Postural Muscles, Phasic Muscles, and Crossed Syndrome: Vladimir Janda's Contributions to Myofascial Treatment Methods	64		
6.1	Posture	64	6.6 Muscles That Tend toward Weakening	66
6.2	Motor Function	64	6.7 Crossed Syndrome	67
6.3	Postural Muscle Fibers (Red Fibers)	65	Upper Crossed Syndrome	67
6.4	Phasic Muscle Fibers (White Fibers)	65	Lower Crossed Syndrome	67
6.5	Muscles That Tend toward Contraction.	65	6.8 Practical Implications	68
7	Zink Patterns	69		
7.1	The Composition of Zink Patterns	70	Inferior Thoracic Aperture	72
	Occipitoatlantoaxial Complex	70	Pelvis	72
	Superior Thorax Aperture.	71		

7.2 Practical Applications of the Zink Pattern	73	Inferior Thorax Aperture	73
Occipitoatlantal Axis	73	Pelvis	73
Superior Thorax Aperture	73		
 8 Myofascial Chains: A Model	 75		
8.1 Muscle Chains	76	8.4 Special Characteristics of Some Muscles and	
Flexion Chain	77	Muscle Chains	84
Extension Chain	81	Sternocleidomastoid	84
8.2 Summary and Conclusion about Flexion and		Scalene Muscles	85
Extension Chains	83	Diaphragm	86
Flexion Chain	83	Iliopsoas Muscle	88
Extension Chain	83	Hip Rotators	89
8.3 Torsion	83	Summary	90
 9 Posture	 91		
9.1 Factors Impacting Posture	91	Posture Analysis	100
9.2 Impact of Gravity on the Locomotor System . .	93	Differentiation: Parietal–Visceral–Cranial	102
9.3 Hinge Zones	94	Examination of Posture Receptors	103
9.4 Maintaining Equilibrium	95	Conclusion	107
Practical Relevance	96	9.6 Leg Length Differences	107
Posture Receptors	96	Leg Length Differences and Posture Changes of	
Summary: Maintaining Equilibrium	99	Pelvis and Spine	107
9.5 Examination	99	Symptoms of Leg Length Differences and	
Method	99	Impact on Musculoskeletal System	108
		Diagnosing Leg Length Differences	109
		Should Leg Length Differences be Corrected? . .	109
		Conclusion	110
 10 Diagnostics	 111		
10.1 Anamnesis	111	Observation	111
10.2 Examination	111	Palpation	111
		Motion Tests	111
 11 Therapy	 116		
11.1 Muscle Energy Techniques	116	11.2 Myofascial Release Techniques	119
Definition	116	11.3 Neuromuscular Technique	120
Indications and Contraindications	117	11.4 Myofascial Release Technique with Ischemic	
Prerequisites for Optimal Muscle Energy		Compression	120
Technique Application	117		
Technical Prerequisites and Enhancers for			
Muscle Energy Techniques	117		
Muscle Energy Technique Variants	118		
Physiologic Principles	118		

B Trigger Points: Diagnosis and Treatment

121

Eric Hebgren

12 Definition.	122
13 Classification of Trigger Points.	123
14 Pathophysiology of Trigger Points.	124
15 Diagnosing Trigger Points	128
16 Trigger Point Therapy	131
17 Trigger Point Perpetuating Factors	133
18 Facilitated Segments.	134
19 Trigger Points	135
19.1 Head and Neck Pain: Related Muscles	135
Trapezius Muscle	135
Sternocleidomastoid Muscle	137
Masseter Muscle	138
Temporal Muscle	140
Lateral Pterygoid Muscle	141
Medial Pterygoid Muscle	142
Digastric Muscle	142
Orbicular Muscle of Eye, Greater Zygomatic Muscle, Platysma Muscle	143
Occipitofrontal Muscle	145
Splenius Muscle of Head and Splenius Muscle of Neck	146
Semispinal Muscle of Head, Semispinal Muscle of Neck, Multifidus Muscles	148
Rectus Capitis Posterior Major and Minor Muscles, Inferior and Superior Oblique Muscles of Head	149
Stretching the Lateral Cervical and Nuchal Muscles	150
19.2 Upper Thorax, Shoulder, and Arm Pain: Related Muscles	151
Levator Muscle of Scapula	151
Scalene Muscles	152
Supraspinous Muscle	153
Infraspinous Muscle	154
Teres Minor Muscle	155
Stretching the External Shoulder Rotators	156
Teres Major Muscle	156
Latissimus Dorsi Muscle	157
Stretching the Lateral Side of the Trunk	158
Subscapular Muscle	158
Rhomboid Muscles	159
Deltoid Muscle	159
Coracobrachial Muscle	161
Biceps Muscle of Arm	162
Stretching the Biceps Muscle of Arm	163
Brachial Muscle	164
Triceps Muscle of Arm	165
Anconeus Muscle	166
19.3 Elbow and Finger Pain: Related Muscles	167
Brachioradial Muscle	167
Long Radial Extensor Muscle of Wrist	168
Short Radial Extensor Muscle of Wrist	169
Ulnar Extensor Muscle of Wrist	169
Extensor Muscle of Fingers	170
Extensor Muscle of Index Finger	170
Supinator Muscle	171
Stretching the Lower Arm Extensors	172
Long Palmar Muscle	173
Radial Flexor Muscle of the Wrist	173
Ulnar Flexor Muscle of Wrist	173

Superficial Flexor Muscle of Fingers	174	Sartorius Muscle	207
Deep Flexor Muscle of Fingers	175	Pectineal Muscle	207
Long Flexor Muscle of Thumb	175	Quadriceps Muscle of Thigh	208
Pronator Teres Muscle	176	Stretching the Quadriceps Muscle of Thigh	211
Stretching the Lower Arm Flexors	176	Gracilis Muscle	211
Adductor Muscle of Thumb	177	Long Adductor Muscle	212
Opposing Muscle of Thumb	178	Short Adductor Muscle	212
Abductor Muscle of Little Finger	179	Great Adductor Muscle	213
Interosseous Muscles of Hand	180	Stretching the Short Hip Adductors	214
19.4 Upper Trunk Pain: Related Muscles	182	Stretching the Long Hip Adductors	214
Greater Pectoral Muscle	182	Biceps Muscle of Thigh	215
Smaller Pectoral Muscle	184	Semitendinous Muscle	216
Subclavius Muscle	185	Semimembranous Muscle	216
Stretching the Pectoral Muscles	185	Stretching the Ischiocrural Muscles	217
Sternal Muscle	187	Popliteal Muscle	217
Superior Posterior Serratus Muscle	187	19.7 Lower Leg, Ankle, and Foot Pain:	
Inferior Posterior Serratus Muscle	188	Related Muscles	219
Anterior Serratus Muscle	189	Anterior Tibial Muscle	219
Erector Muscle of Spine	190	Posterior Tibial Muscle	220
Stretching the Autochthonous Back Muscles	192	Long Peroneal Muscle	222
Rectus Abdominis Muscle, Internal and External		Short Peroneal Muscle	222
Oblique Muscles of Abdomen, Transverse		Third Peroneal Muscle	223
Abdominal Muscle, Pyramidal Muscle	192	Gastrocnemius Muscle	223
Stretching the Abdominal Muscles	195	Soleus Muscle	224
19.5 Lower Trunk Pain: Related Muscles	196	Plantar Muscle	225
Quadratus Lumborum Muscle	196	Stretching the Calf Muscles	226
Stretching the Lateral Side of the Trunk	197	Long Extensor Muscle of Toes	226
Iliopsoas Muscle	197	Long Extensor Muscle of Great Toe	226
Stretching the Hip Flexors and Gluteal Muscles	199	Long Flexor Muscle of Toes	228
Muscles of the Pelvic Floor	199	Long Flexor Muscle of Great Toe	228
Gluteus Maximus Muscle	201	Short Extensor Muscle of Toes	229
Gluteus Medius Muscle	202	Short Extensor Muscle of Great Toe	229
Gluteus Minimus Muscle	203	Abductor Muscle of Great Toe	230
Piriform Muscle	204	Short Flexor Muscle of Toes	230
Stretching the Piriform Muscle	205	Abductor Muscle of Little Toe	232
19.6 Hip, Upper Leg, and Knee Pain: Related		Quadratus Plantae Muscle	232
Muscles	206	Dorsal Interosseous Muscles of Foot	233
Tensor Fasciae Latae Muscle	206	Plantar Interosseous Muscles	234
		Adductor Muscle of Great Toe	234
		Short Flexor Muscle of Great Toe	236
20 Bibliography	238		
21 Illustration Credits	242		
22 List of Abbreviations	243		
Index	244
