Foreword	xiv
<i>Liming Li</i>	
Foreword	xv
<i>Guixing Qiu</i>	
Foreword	xvi
<i>Robert D. D'Ambrosia</i>	
Foreword	xvii
<i>Roy W. Sanders</i>	
Preface	xviii
Welcome to the Third Edition	xix
Acknowledgments	xxi
Contributors	xxviii
How to Use This Book	xxx
1. Introduction to Clinical Epidemiology of Orthopaedic Trauma	1
<i>Yingze Zhang, Hongzhi Lv, and Xiaolin Zhang</i>	
Fractures Overview	1
Fracture Classification	1
Bones	3
Segments	3
Types	4
Group and Subgroup	4
Epidemiological Investigation and Analysis of Traumatic Fractures Incidence in China	4
Methods	5
The Content and Method of this Investigation	5
Quality Control and Evaluation	5
Data Statistics and Analysis	6
Epidemiological Study of Fractures	12
Incidence of Sex-Specific Fractures	15
Fracture Location	21
Fractures in Children	22
Suggested Readings	22
2. Fractures of the Humerus	23
<i>Bo Liu, Qi Zhang, and Lin Jin</i>	
Overview of Humeral Fractures	23
Anatomic Features	23
AO Classification and Coding System for Humeral Fractures	24
Epidemiologic Features of Humeral Fractures in the China National Fracture Study	24
Humeral Fractures by Sex in CNFS	25
Humeral Fractures by Injury Side in CNFS	25
Humeral Fractures by Age Group and Sex in CNFS	26
Humeral Fractures by Location in CNFS	27
Humeral Fractures by Causal Mechanisms in CNFS	28
Clinical Epidemiologic Features of Humeral Fractures	29
Humeral Fractures by Sex	29
Humeral Fractures by Injured Side	30

Humeral Fractures by Age Group and Sex	31
Humeral Fractures by Location	33
Proximal Humeral Fractures (Segment 11)...	34
Anatomic Features.....	34
AO Classification of Proximal Humeral Fractures ...	34
Clinical Epidemiological Features of Proximal Humeral Fractures (Segment 11)	36
Injury Mechanism	50
Diagnosis	50
Treatment	51
Humeral Shaft Fractures (Segment 12).....	52
Anatomic Features.....	52
AO Classification for Humeral Shaft Fractures....	52
Clinical Epidemiologic Features of Humeral Shaft Fractures (Segment 12).....	53
Injury Mechanism	66
Diagnosis	66
Treatment	66
Distal Humeral Fractures (Segment 13)	67
Anatomical Features	67
AO Classification of Distal Humeral Fractures....	68
Clinical Epidemiologic Features of Distal Humeral Fractures (Segment 13)	69
Injury Mechanism	82
Diagnosis	82
Treatment	82
Other Classifications of Humeral Fractures...	82
The Neer Classification of Proximal Humeral Fractures	82
Classification of Humeral Fractures by Fracture Location	86
Clinical Epidemiologic Features of Medial Humeral Condylar Fractures.....	97
Suggested Readings	110

3.
Fractures of the Ulna and Radius
.....
111

Yingze Zhang, Song Liu, and Chenguang Du

Overview of Ulnar and Radial Fractures	111
Anatomic Features.....	111
AO Classification and Coding System for Fractures of Ulna and Radius	111
Epidemiologic Features of Radial/Ulnar Fractures in the China National Fracture Study ...	111
Clinical Epidemiologic Features of Radial/Ulnar Fractures	117
Proximal Radial/Ulnar Fractures (Segment 21)	122
Anatomic Features.....	122
AO Classification of Proximal Radial/Ulnar Fractures	122
Clinical Epidemiologic Features of the Proximal Radial/Ulnar Fractures (Segment 21).....	123
Injury Mechanism	137
Diagnosis	137
Treatment	137
Fractures of the Radial/Ulnar Shaft (Segment 22)	138
Anatomic Features.....	138
AO Classification of Fractures of Radial/Ulnar Shaft	138
Clinical Epidemiologic Features of the Radial/Ulnar Shaft Fractures (Segment 22)	139
Injury Mechanism	153
Diagnosis	153
Treatment	153
Distal Fractures of the Radius/Ulna (Segment 23)	153
Anatomic Features.....	153
AO Classification of Distal Fractures of the Radius/Ulna.....	153
Clinical Epidemiologic Features of Distal Fractures of the Radius/Ulna (Segment 23)	154
Injury Mechanism	169
Diagnosis	169
Treatment	169
Other Classifications of Ulnar and Radial Fractures	169
Monteggia Fractures.....	169
Galeazzi Fractures	176
Colles Fractures	180
Smith Fractures	184
Barton Fractures.....	189
Suggested Readings	193

4. Fractures of the Femur	195
<i>Yanbin Zhu, Yansen Li, and Enzeng Xing</i>	
Overview of Femoral Fractures	195
Anatomic Features	195
AO Classification and Coding System for Femoral Fractures	195
Epidemiologic Features of Femoral Fractures in the China National Fracture Study	195
Clinical Epidemiologic Features of Femoral Fractures	202
Proximal Femoral Fractures (Segment 31)	207
Anatomic Features	207
AO Classification of the Proximal Femoral Fractures	207
Clinical Epidemiologic Features of the Proximal Femoral Fractures (Segment 31)	207
Injury Mechanism	222
Diagnosis	222
Treatment	223
Diaphyseal Femoral Fractures (Segment 32)	223
Anatomic Features	223
AO Classification of Diaphyseal Femoral Fractures	223
Clinical Epidemiologic Features of Diaphyseal Femoral Fractures (Segment 32)	224
Injury Mechanism	240
Diagnosis	240
Treatment	240
Distal Femoral Fractures (Segment 33)	240
Anatomic Features	240
AO Classification of Distal Femoral Fractures	241
Clinical Epidemiologic Features of the Distal Femoral Fractures (Segment 33)	241
Injury Mechanism	257
Diagnosis	257
Treatment	257
Other Classifications of Femoral Fractures	257
Evans' Classification for Trochanteric Fractures of the Femur	257
The Garden Classification of Femoral Neck Fractures	261
The Pipkin Classification of Femoral Head Fractures	263
Suggested Readings	266
5. Fractures of the Tibia and Fibula	267
<i>Juan Wang, Guang Yang, and Xiao Chen</i>	
Overview of Tibial/Fibular Fractures	267
Anatomic Features	267
AO Classification and Coding System of Tibial/Fibular Fractures	267
Epidemiologic Features of Fractures of the Tibia and Fibula in the China National Fracture Study	268
Clinical Epidemiologic Features of Tibial/Fibular Fractures	274
Proximal Tibial Fractures (Segment 41)	280
Anatomic Features	280
AO Classification of Proximal Tibial Fractures	281
Clinical Epidemiologic Features of Proximal Tibial Fractures (Segment 41)	281
Injury Mechanism	296
Diagnosis	296
Treatment	296
Tibial Diaphyseal Fractures (Segment 42)	297
Anatomic Features	297
AO Classification of Tibial Diaphyseal Fractures	297
Clinical Epidemiologic Features of Tibial Diaphyseal Fractures (Segment 42)	297
Injury Mechanism	313
Diagnosis	313
Treatment	313
Distal Tibial Fractures (Segment 43)	313
Anatomical Features	313
AO Classification of Distal Tibial Fractures	313
Clinical Epidemiologic Features of Distal Tibial Fractures (Segment 43)	314
Injury Mechanism	328
Diagnosis	328
Treatment	328
Malleolar Injury (Segment 44)	328
Anatomical Features	328
AO Classification of Malleolar Injury	328
Clinical Epidemiologic Features of Malleolar Injury (Segment 44)	329
Injury Mechanism	345

Diagnosis	345	Tibial Plateau Fractures	345
Treatment	345	Pilon Fractures	351
Commonly Used Classifications for Fractures of the Tibia/Fibula	345	Suggested Readings	357

6. Fractures of the Spine

359

Wei Chen, Di Zhang, and Jiayuan Sun

Overview of Spinal Fractures	359	Treatment	383
Anatomic Features.....	359	Further Classification of Cervical Spine Fractures	384
AO Classification and Coding System for Spinal Fractures	360	Thoracolumbar Fractures (Segments 52 and 53)	388
Epidemiologic Features of Spinal Fractures in the China National Fracture Study	360	Anatomic Features.....	388
Clinical Epidemiologic Features of Fractures of the Spinal Column	365	AO Classification of Thoracolumbar Spinal Fractures	388
Cervical Fractures (Segment 51).....	368	Clinical Epidemiologic Features of Fractures of the Thoracolumbar Spine (Segments 52 and 53).....	389
Anatomic Features.....	368	Injury Mechanism.....	397
AO Classification of Cervical Spinal Fractures ...	369	Diagnosis	397
Clinical Epidemiologic Features of Fractures of the Upper Cervical Spine (Segment 51.01–51.02)	369	Treatment	397
Clinical Epidemiologic Features of Fractures of the Lower Cervical Spine (Segment 51.03–51.07)	378	Denis Classification of Thoracolumbar Spinal Fractures	398
Injury Mechanism.....	383	Suggested Readings	400
Diagnosis	383		

7. Fractures of the Pelvic Ring and Acetabulum

403

Zhiyong Hou, Haili Wang, and Shiji Qin

Overview of Pelvic Ring and Acetabular Fractures	403	Acetabular Fractures (Segment 62).....	430
Anatomical Features.....	403	Anatomical Features	430
AO Classification and Coding System for Fractures of the Pelvic Ring and Acetabulum. ...	404	AO Classification of Acetabular Fractures	431
Epidemiologic Features of Pelvic and Acetabular Fractures in the China National Fracture Study	405	Clinical Epidemiological Features of Acetabular Fractures (Segment 62)	431
Clinical Epidemiological Features of Fractures of the Pelvic Ring and Acetabulum	408	Injury Mechanism.....	445
Pelvic Ring Fractures (Segment 61).....	414	Diagnosis	445
Anatomical Features	414	Treatment	445
AO Classification of Pelvic Ring Fractures	414	Other Classifications for Fractures of the Pelvic Ring and Acetabulum	446
Clinical Epidemiological Features of Pelvic Ring Fractures (Segment 61)	414	Tile Classification of Pelvic Ring Fractures	446
Injury Mechanism.....	429	Young–Burgess Classification of Pelvic Ring Fractures	450
Diagnosis	429	Letournel Classification of Pelvic Ring Fractures	458
Treatment	429	Special Type of Pelvic Ring Fracture: Bilateral Sacroiliac Dislocation with an Intact Anterior Pelvic Ring	458

Letournel–Judet Classification of Acetabular Fractures	459
--	-----

Tile Classification of Acetabular Fractures	464
Suggested Readings	465

8. Fractures of the Hand 467

Jialiang Guo, Lei Liu, and Chenni Ji

Overview of Hand Fractures	467
Anatomic Features.....	467
OTA Classification and Coding System for Hand Fractures.....	467
Epidemiologic Features of Hand Fractures in the China National Fracture Study	467
Clinical Epidemiologic Features of Hand Fractures	472
Carpal Fractures (Segments 71–76)	477
Anatomic Features.....	477
OTA Classification of Carpal Fractures.....	477
Clinical Epidemiologic Features of Carpal Fractures (71–76)	478
Injury Mechanism.....	493
Diagnosis	493
Treatment	493
Further Classification for Scaphoid Fractures	493
Anatomic Features and Coding System	493
Clinical Epidemiologic Features of Scaphoid Fractures in Adults	493
Injury Mechanism.....	501
Diagnosis	501
Treatment	501
Metacarpal Fractures (Segment 77)	501
Anatomic Features.....	501
OTA Classification of Metacarpal Fractures	501

Clinical Epidemiologic Features of Metacarpal Fractures in Adults (Segment 77)	501
Injury Mechanism	518
Diagnosis	518
Treatment	518
Further Classification of Base Fracture of the First Metacarpal Bone	518
Anatomic Features and Classification	518
Clinical Epidemiologic Features of Fractures of the Base of the First Metacarpal Bone	518
Injury Mechanism.....	524
Diagnosis	524
Treatment	525
Phalanx Fractures (Segment 78)	525
Anatomic Features.....	525
OTA Classification of Phalanx Fractures	525
Clinical Epidemiologic Features of Phalanx Fractures (Segment 78)	525
Injury Mechanism.....	542
Diagnosis	542
Treatment	542
Multiple Fractures (Segment 79)	542
OTA Classification of Multiple Fractures of the Hand.	542
Clinical Epidemiologic Features of Multiple Fractures (Segment 79)	542
Suggested Readings	548

9. Fractures of the Foot 549

Fei Zhang, Ye Tian, Zongyou Yang, and Tao Liu

Overview of Foot Fractures	549
Anatomic Features.....	549
OTA Classification and Coding System for Foot Fractures	549
Epidemiologic Features of Foot Fractures in the China National Fracture Study.....	549
Clinical Epidemiologic Features of Foot Fractures	554
Talar Fractures (Segment 81)	560
Anatomic Features.....	560

OTA Classification of Talar Fractures	560
Clinical Epidemiologic Features of Talar Fractures	560
Injury Mechanism.....	574
Diagnosis	574
Treatment	574
Other Common Classifications of Talar Fractures	574
Calcaneal Fractures (Segment 82)	578
Anatomic Features.....	578

OTA Classification of Calcaneal Fractures	579	Clinical Epidemiologic Features of Cuneiform Fractures (Segment 85)	612
Clinical Epidemiologic Features of Calcaneal Fractures (Segment 82)	579	Injury Mechanism	619
Injury Mechanism	591	Diagnosis	619
Diagnosis	591	Treatment	619
Treatment	592	Metatarsal Fractures (Segment 87)	619
Other Classifications for Calcaneal Fractures	592	Anatomic Features	619
Fractures of the Tarsal Navicular Bone (Segment 83)	597	OTA Classification of Metatarsal Fractures	619
Anatomic Features	597	Clinical Epidemiologic Features of Metatarsal Fractures (Segment 87)	620
OTA Classification of Tarsal Navicular Fractures	597	Injury Mechanism	638
Clinical Epidemiologic Features of Tarsal Navicular (Segment 83)	597	Diagnosis	638
Injury Mechanism	603	Treatment	638
Diagnosis	603	Phalangeal Fractures (Segment 88)	638
Treatment	604	Anatomic Features	638
Cuboid Fractures (Segment 84)	604	OTA Classification of Phalangeal Fractures	638
Anatomic Features	604	Clinical Epidemiologic Features of Phalangeal Fractures (Segment 88)	639
OTA Classification of Cuboid Fractures	604	Injury Mechanism	657
Clinical Epidemiologic Features of Cuboid Fractures	604	Diagnosis	657
Injury Mechanism	610	Treatment	657
Diagnosis	610	Multiple Fractures of the Foot (Segment 89)	657
Treatment	611	Clinical Epidemiologic Features of Multiple Fractures of the Foot (Segment 89) by OTA Classification	657
Cuneiform Fractures (Segment 85)	611	Suggested Readings	660
Anatomic Features	611		
OTA Classification of Cuneiform Fractures	611		

10. Fractures of the Patella, Clavicle, and Scapula 661

Bing Yin, Shilun Li, and Zhaoyu Chen

Fractures of the Patella (Segment 34)	661	OTA Classification and Coding System for Clavicle Fractures	684
Anatomic Features	661	Epidemiologic Features of Clavicle Fractures in the China National Fracture Study	684
OTA Classification and Coding System for Patellar Fractures	661	Clinical Epidemiologic Features of Clavicle Fractures (Segment 15)	687
Epidemiologic Features of Patellar Fractures in the China National Fracture Study	661	Injury Mechanism	695
Clinical Epidemiologic Features of Patellar Fractures (Segment 34)	665	Diagnosis	695
Injury Mechanism	677	Treatment	695
Diagnosis	677	Further Classifications of Clavicle Fractures	695
Treatment	677	Scapular Fractures (Segment 14)	708
Further Classifications of Patellar Fractures: The Regazzoni Classification	677	Anatomic Features	708
Clavicle Fractures (Segment 15)	682	OTA Classification and Coding System for Scapular Fractures	709
Anatomic Features	682	Epidemiologic Features of Scapular Fractures in the China National Fracture Study	709
Anatomic Features and Muscular Attachment of the Clavicle	683		

Epidemiologic Features of Scapular Fractures (Segment 14)	712	Treatment	727
Injury Mechanism	727	Further Classifications of Scapular Fractures	728
Diagnosis	727	Suggested Readings	754
11. Epidemiologic Features of Fractures in Taiwan Between 2011 and 2013	755		
<i>Tao Zhang, Pan Hu, Xiaodong Cheng, and Peizhi Yuwen</i>			
Introduction to the Taiwan Study	755	Patients with Hand Fractures	770
Fractures by Sex	755	Patients with Foot Fractures	772
Fractures by Age Group and Sex	758	Patients with Patellar Fractures	774
Patients with Humeral Fractures	758	Patients with Clavicle Fractures	776
Patients with Ulnar and Radial Fractures	760	Patients with Scapular Fractures	778
Patients with Femoral Fractures	762	Fracture Location	780
Patients with Tibia and Fibula Fractures	764	Fractures in Children	780
Patients with Spinal Fractures	766	Suggested Readings	781
Patients with Fractures of the Pelvic Ring and Acetabulum	768		
Index	783
