

Table of Contents

Invited Talks

Build Intelligence from the Physical World	1
<i>Xing Xie</i>	
How OpenStreetMap Is Changing the World	4
<i>Steve Coast</i>	

Geographic Information Retrieval

GeoST: Geographic, Thematic and Temporal Information Retrieval from Heterogeneous Web Data Sources	5
<i>Felix Mata and Christophe Claramunt</i>	
Extraction and Geographical Navigation of Important Historical Events in the Web	21
<i>Mitsuo Yamamoto, Yuku Takahashi, Hirotoshi Iwasaki, Satoshi Oyama, Hiroaki Ohshima, and Katsumi Tanaka</i>	
Investigation of Recommendation Method Considering Region-Restrictedness of Spots	36
<i>Kenta Oku and Fumio Hattori</i>	

Geospatial Semantic and Sensor Web

A Case Study of Participatory Data Transfer for Urban Temperature Monitoring	50
<i>Houtan Shirani-Mehr, Farnoush Banaei-Kashani, Cyrus Shahabi, and Lin Zhang</i>	
A Folksonomy-Based Recommendation System for the Sensor Web	64
<i>Rohana Rezel and Steve Liang</i>	
Semantically Enriching VGI in Support of Implicit Feedback Analysis	78
<i>Andrea Ballatore and Michela Bertolotto</i>	

Location-Based Services and Applications

A Mobile Navigation and Orientation System for Blind Users in a Metrobus Environment	94
<i>Felix Mata, Andres Jaramillo, and Christophe Claramunt</i>	

A Rich Cloud Application to Improve Sustainable Mobility 109
Sergio Di Martino, Clemente Giorio, and Raffaele Galiero

Mobile Task Computing: Beyond Location-Based Services and
EBooks 124
*John Liagouris, Spiros Athanasiou, Alexandros Efentakis,
Stefan Pfennigschmidt, Dieter Pfoser, Eleni Tsigka, and
Agnès Voisard*

Advanced GIS Visualization Techniques

*Cinematic Street: Automatic Street View Walk-through System Using
Characteristics of Modified Maps* 142
Kaori Kobayashi, Daisuke Kitayama, and Kazutoshi Sumiya

HYDROSYS – A Mixed Reality Platform for On-Site Visualization of
Environmental Data 159
Antti Nurminen, Ernst Kruijff, and Eduardo Veas

Inferring and Focusing Areas of Interest from GPS Traces 176
Pablo Martinez Lerin, Daisuke Yamamoto, and Naohisa Takahashi

Web and Mobile Map Adaptation

Remote-Evaluation of User Interaction with WebGIS 188
Jens Ingensand and François Golay

Touch2Query Enabled Mobile Devices: A Case Study Using
OpenStreetMap and iPhone 203
Junjun Yin and James D. Carswell

Geospatial Data Quality and Context

Delimiting Imprecise Regions with Georeferenced Photos and Land
Coverage Data 219
Bruno Martins

Visualization of Relationships among Historical Persons Using
Locational Information 230
*Takahiko Osaki, Sho Itsubo, Fuminori Kimura, Taro Tezuka, and
Akira Maeda*
