

Inhaltsverzeichnis

1. Prototypical System for Situation Awareness Using the “CE-Box” of Computer Engineering, TU

Chemnitz.....	1
1.1 Abstract.....	1
1.2 Motivation.....	1
1.3 Introduction.....	2
1.4 Implementations and Demonstrations.....	3
1.5 Results.....	4
1.6 Conclusion	7
2. Realtime Detection of Hand Movement by EMG signal.....	8
2.1 Abstract.....	8
2.2 Motivation.....	8
2.3 Introduction.....	9
2.4 Research questions and methods	9
2.5 Implementation and demonstration.....	11
2.6 Results.....	13
2.7 Reference	14
3. Digital Processes for interactive Mentoring Approaches.....	15
3.1 Abstract.....	15
3.2 Introduction.....	15
3.3 Database.....	15
3.4 Research Methodology	17
3.5 Guide to Task Completion	18
3.6 Theoretical framework.....	18
3.7 Research Objective	19
3.8 Task Implementation and Results	19
3.9 Results & Discussion	24
3.10 Conclusion	28
3.11 Acknowledgement	28
3.12 References.....	28
4. Implementation of digital processes via Reliance program from Scada.....	30
4.1 Abstract.....	30
4.2 Motivation.....	30
4.3 Introduction.....	31

4.4 Research questions and Methods	31
4.5 Implementations and Demonstrations.....	33
4.6 Results.....	38
4.7 References.....	38
5. Automotive II.....	39
5.1 Abstract.....	39
5.2 Motivation.....	39
5.3 Introduction.....	39
5.4 Research questions and Methods.....	40
5.5 Implementations and Demonstrations.....	40
5.6 Results.....	41
5.7 Conclusion	42
5.8 References.....	42
6. Deployment of Self-checking and Self-diagnosis in Complex Systems	43
6.1 Abstract.....	43
6.2 Motivation.....	43
6.3 Introduction.....	44
6.4 Research questions and Methods.....	44
6.5 Task solving and Results.....	45
6.6 Conclusion	55
6.7 References.....	55
