1	Introduction	1
2	Atomic Bose-Einstein condensate	7
2.1	Non-interacting Bose gases	8
2.1.1	Bose statistics	8
2.1.2	Matter wave picture	9
2.2	Interacting atomic Bose gases	10
2.2.1	Generation of atomic Bose gases	10
2.2.2	Gross-Pitaevskii equation	13
2.2.3	Quantum vortices	15
2.3	Spinor Bose-Einstein condensate	17
2.3.1	Coupled Gross-Pitaevskii equations	17
2.3.2	Spin texture	18
2.3.3	Spin vortices	19
3	Electromagnetic waves and optical vortex	21
3.1	Maxwell's equations	21
3.2	Plane waves	24
3.3	Multipole waves	24
3.4	Twisted waves	26
3.4.1	Paraxial approximation	26
3.4.2	Bessel modes	27
3.4.3	Laguerre-Gaussian modes	28
3.4.4	Intrinsic spin-orbit interaction of light	30
3.5	Multipole expansion	31
4	Transfer of orbital angular momentum from light to bound electron	33
4.1	Rabi oscillation	34
4.2	Multipole excitations by twisted beam	35
4.2.1	Selection rules	35
4.2.2	Position-dependent multipole composition	37
4.3	Example: Excitation of Ca^+ ion by Bessel beam	39
5	Transfer of coupled spin and orbital angular momentum from light to atom	43
5.1	Electric dipole transitions	43
5.2	Atomic excitation in a tripod scheme	44

5.2.1	Schrödinger equation	44
5.2.2	Far-detuned case	46
5.3	Center-of-mass motion of atom	49
5.4	Comparison to other schemes	51
6	Spin-orbital-angular-momentum coupled Bose-Einstein condensate	55
6.1	Model Hamiltonian	56
6.2	Symmetry properties	58
6.2.1	Rotational symmetry	58
6.2.2	Time-reversal symmetry	59
6.2.3	Spontaneous symmetry breaking	59
6.3	Numerical method	60
6.4	Ground-state phases	61
7	Vortex molecule and phase transitions	67
7.1	Quantum phase transitions	67
7.2	The role of vortex molecule	69
7.2.1	Two-vortex molecule	69
7.2.2	Vortex-antivortex molecule	72
7.3	Two-colored necklace of vortices	73
8	Summary and Outlook	77
	Appendices	81
A	Reduction to lower dimensions	83
A.1	Gross-Pitaevskii equation for Bose Einstein condensate in disk-shaped geometry	83
B	Numerical methods	85
B.1	Split-step Fourier method	85
B.2	Imaginary-time method	86
	Bibliography	87
	Publications by the Author	93
	Acknowledgements	95
