<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Previous Philosophical Attempts to Explore the Theme of Human Creation	3
1.1.1	European Philosophers' Attempts to Explore the Theme of Human's Creation in History	3
1.1.2	Chinese Philosophers' Attempts to Explore the Theme of Human's Creation in History	5
1.2	Heralding the Rise of the Philosophy of Engineering	7
1.2.1	The Burgeoning Philosophy of Engineering and Technology	7
1.2.2	The Second Rise of the Philosophy of Technology and the Advent of the Philosophy of Engineering	8
1.3	Triism or Trichotomy of Science, Technology, and Engineering	10
1.3.1	Critical Questions at the Gateway to Philosophy of Engineering	10
1.3.2	Triism or Trichotomy of Science, Technology, and Engineering	13
1.3.3	"I Create, Therefore I Am" as a Maxim for Philosophy of Engineering	15
1.4	A Columbian Voyage in the Philosophical World and the Main Concepts of Philosophy of Engineering	17
1.4.1	The Establishment of Philosophy of Engineering as a Columbian Voyage	17
1.4.2	The Three Phases of Engineering Process and the Main Concepts of Philosophy of Engineering	18
	References	19
<b>2</b>	<b>The First Stage of Engineering Activity: Planning and Decision-Making</b>	<b>21</b>
2.1	<i>Telos</i> , Goal-Setting, and Goal-Orientatation	23

2.1.1	<i>Telos</i> , Teleology, and Causality .....	24
2.1.2	The Classification of Goals and Their Determination .....	26
2.1.3	Goal Orientation and the Purpose of Organization .....	29
2.2	Initial and Environmental Factors, Constraints and Expected Conditions .....	32
2.2.1	Initial and Environmental Factors .....	33
2.2.2	Investigation into and Identification of Initial and Environmental Conditions .....	35
2.2.3	Constraints and Expected Conditions .....	38
2.3	Knowing Yourself, Understanding the Situation, and Seizing Opportunities .....	41
2.3.1	Knowing Yourself in Philosophy of Engineering .....	42
2.3.2	Analysis and Judgment of Situations as Power Contrast, Strategic Potential, and Future Trends .....	44
2.3.3	Discerning, Capturing but not Missing an Opportunity .....	46
2.4	Operations Research, Risk, and Decision-Making .....	47
2.4.1	Operations Research: Rules and Methods .....	48
2.4.2	The Nature of Risk and the Attitudes Toward It .....	52
2.4.3	Decision Makers, Elements of Decision Making, and Pre-evaluation .....	57
2.5	Ideas, Rationality, and Traps in Decision Making .....	61
2.5.1	Supreme Good and Ideals .....	61
2.5.2	Rationality: Instrumental Rationality and Substantive Rationality .....	62
2.5.3	Errors in Planning and Traps in Decision Making .....	67
	References .....	69
<b>3</b>	<b>The Second Stage of Engineering Activity: Operating and Implementing .....</b>	<b>73</b>
3.1	Natural Resources, Raw Materials, and Machines .....	75
3.1.1	Naturalistic Theory of Matter and Axiological Theory of Matter .....	75
3.1.2	The Infinity of Natural Matter and the Finiteness of Natural Resources .....	78
3.1.3	The Nature of Matter and the Potential of Raw Materials .....	79
3.1.4	Tools and Machines as the Means of Actualization .....	80
3.1.5	All Roads Lead to Rome and One Road Leads to Many Cities .....	84
3.1.6	Machines and Tools as Device Paradigms and the Extension of Human Organs .....	85
3.2	Operations, Procedure, and Micro Modes of Production .....	87
3.2.1	Semantics and Usage of Production and Operation .....	88
3.2.2	Operations: Bridgman, Piaget, and Management Science .....	89

3.2.3	Command, Operations, and Operational Interface .....	90
3.2.4	Unit Operation and Operation Procedure .....	92
3.2.5	Operational Types, Procedural Modes, and Micro-production Modes .....	94
3.3	Organizations, Institutions, and Rules .....	98
3.3.1	Institutional Economics and Institutions .....	99
3.3.2	Institutions, Organizations, and Rules .....	102
3.3.3	Rules and Scientific Laws .....	105
3.3.4	Semantic Analysis of the Popular Chinese Saying “Do as Objective Scientific Law Requires” .....	106
3.3.5	Rules: Make Them, Break Them, or Follow Them .....	107
3.3.6	Institutional Arrangements, Institutional Environment, and Institutional Running .....	109
3.4	Management, Incentives, and Control .....	111
3.4.1	Ownership, Managing Power, and Contract .....	112
3.4.2	Management, Position Function, and Responsibility .....	116
3.4.3	Leadership, Incentive, and Interpersonal Relationships ....	118
3.4.4	Control, Feedback, and Standards .....	121
3.5	Efficiency, Will, and Labor as a Mode of Existence .....	123
3.5.1	Labor and Human Existence .....	124
3.5.2	Finiteness, Efficiency, and Equity .....	129
3.5.3	The Process of Labor and the Concept of Will .....	131
	References .....	134
<b>4</b>	<b>The Third Stage of Engineering Activity: Using Artifacts and Living a Life .....</b>	<b>139</b>
4.1	Value, Transaction, Communication, and Intersubjectivity .....	141
4.1.1	The Correlation between the Economic Concept of Value and the Philosophical Concept of Value .....	143
4.1.2	Exchange, Transaction, and Communication .....	145
4.1.3	Three Major Mediums of Modern Social Communication .....	148
4.2	Consumption and Use of Artifacts .....	150
4.2.1	Types of Consumption and Consumer Behavior .....	152
4.2.2	Interpersonal Relationships in Consumption Types and Consumer Behavior .....	156
4.2.3	The Human-Made Thing, or Artifact, as a Semi-Thing-in-Itself .....	158
4.2.4	I Use Artifacts, Therefore I Am .....	161
4.3	Cause, Effect, Purpose, and Alienation .....	163
4.3.1	Purpose and Consequence .....	164
4.3.2	Alienation of Artifacts .....	166
4.3.3	Alienation of Signs .....	167
4.3.4	Alienation of Human .....	169
4.3.5	Purpose and Consequence Revisited .....	171

4.4 Life and Freedom ..... 172

4.4.1 Life Content and Lifestyle ..... 173

4.4.2 Being Digital and Poeticized Life ..... 176

4.4.3 Freedom and the Community of Free Individuals ..... 179

References ..... 181

**5 Philosophy of Engineering: An Emerging Branch of Philosophy .... 185**

5.1 The Relationship Between Philosophy of Engineering  
and Other Disciplines ..... 186

5.1.1 The Relationship Between the Philosophy  
of Engineering and the Philosophies of Science,  
Technology, and Society ..... 186

5.1.2 The Relationship between Philosophy of Engineering,  
History of Engineering, and Sociology of Engineering ..... 190

5.1.3 The Relationship Between Philosophy of Engineering  
and Interdisciplinary Engineering Studies ..... 197

5.2 Some Key Philosophical Issues from the Perspective  
of Philosophy of Engineering ..... 199

5.2.1 A New Understanding of Human Nature: From  
Human Being as Rational Animal to Human Being  
as Engineering Animal ..... 201

5.2.2 A New Form of Philosophy: From World-Interpreting  
to World-Changing ..... 203

5.2.3 Engineering Thinking and Engineering Knowledge ..... 207

5.3 The Theories of Two Worlds, Three Worlds, and Four Worlds ..... 217

5.3.1 Plato’s Theory of the “Two Worlds” and Popper’s  
Theory of the “Three Worlds” ..... 217

5.3.2 The Theory of Four Worlds in Philosophy  
of Engineering ..... 218

5.4 Home Constructing, and Harmony Among Heaven, Earth,  
and the Human ..... 224

5.4.1 The Life Turn in Western Philosophy in the 20th  
Century ..... 225

5.4.2 A Reflection on Home and Its Reconstructing ..... 226

5.4.3 The Harmony of Heaven, Earth and Humans ..... 228

References ..... 230
