

Table of contents

Previous publication of contents	xiii
Symbols and abbreviations	xv
1 Introduction	1
2 State of the art	3
2.1 Anisotropic hardening	3
2.1.1 Basics of anisotropic hardening	3
2.1.2 Characterization of anisotropic hardening	9
2.1.3 Constitutive modelling of anisotropic hardening	13
2.1.4 Anisotropic hardening in sheet and incremental metal forming	20
2.2 Cold forging	22
2.2.1 Basics of forward rod extrusion	23
2.2.2 Workpiece material and preparation	26
2.2.3 Material properties after cold forging	28
2.2.4 Multi-stage and combined cold forging	34
2.2.5 Anisotropic hardening in cold forging	36
2.3 Summary	38
3 Aim and scope	39
4 Work-hardening behavior under monotonic strain paths	41
4.1 Investigated materials	42
4.2 Characterization via conventional methods	43
4.2.1 Tensile and upsetting tests	43
4.2.2 Torsion of cylindrical specimens	45
4.3 Characterization via new methods	47
4.3.1 Tensile tests on forward extruded material	47
4.3.2 In-plane torsion of material extracted from metal bars	63
4.4 Results on the monotonic work-hardening behavior	65
4.4.1 Tension and upsetting	66
4.4.2 Torsion of cylindrical specimens	66
4.4.3 Tensile tests on forward extruded material	67
4.4.4 In-plane torsion	69
4.4.5 Comparison of characterization methods	70
4.5 Summary	71
5 Work-hardening behavior under non-monotonic strain paths	73
5.1 Characterization via conventional methods	73
5.1.1 Upsetting of elongated material	73
5.1.2 Forward-reverse torsion of cylindrical specimens	75

5.2	Characterization via new methods	75
5.2.1	Upsetting of forward extruded material	75
5.2.2	Forward-reverse in-plane torsion	76
5.2.3	Torsion of forward extruded material	76
5.3	Results on the forward-reverse work-hardening behavior	76
5.3.1	Quantification of forward-reverse work-hardening characteristics.....	77
5.3.2	Tension-compression.....	78
5.3.3	Forward-reverse torsion.....	83
5.3.4	Comparison of characterization methods.....	85
5.3.5	Additional materials	86
5.4	Results on the cross-hardening behavior	90
5.5	Summary.....	91
6	Modeling anisotropic hardening in cold forging	93
6.1	Constitutive models	93
6.1.1	Isotropic hardening.....	94
6.1.2	Chaboche combined hardening	94
6.1.3	Modified Yoshida-Uemori combined hardening	95
6.1.4	Homogeneous anisotropic hardening model.....	96
6.1.5	Parameter sensitivity study.....	97
6.2	Parameter identification	100
6.2.1	Direct parameter identification.....	100
6.2.2	Inverse parameter identification	102
6.2.3	Results of the parameter identification	103
6.3	Summary.....	107
7	Anisotropic hardening in single-stage cold forging processes	109
7.1	Investigated cold forging processes	109
7.1.1	Forward rod extrusion	109
7.1.2	Backward can extrusion	110
7.2	Influence of anisotropic hardening on component properties	111
7.2.1	Flow stress	111
7.2.2	Residual stresses	115
7.3	Influence of anisotropic hardening on process forces	123
7.4	Summary.....	126
8	Anisotropic hardening in multi-stage cold forging processes	129
8.1	Influence of anisotropic hardening on process forces	129
8.2	Influence of pre-compression before forward rod extrusion.....	134
8.3	Influence of heat-treatment on anisotropic hardening	136
8.4	Summary.....	139

9	Conclusion and outlook	141
9.1	Conclusion	141
9.2	Outlook	143
