## Part I

### Ecology of brackish water

By Adolf Remane

Introduction . . . . .	1
I. Salinity as a factor in the distribution of animals and definitions of brackish water . . . . .	2
A. Boundaries and subdivisions of brackish water . . . . .	2
B. The origin of brackish water . . . . .	7
C. Specific hydrographic features of brackish waters . . . . .	10
II. Special ecological features of brackish-water organisms . . . . .	16
A. Poverty of species . . . . .	16
B. Changes in form and way of life in brackish water . . . . .	25
1. Changes in size (reduction in brackish water, depauperization) of marine organisms . . . . .	25
2. Changes in size in fresh-water organisms . . . . .	36
3. Deviation of form and structure of organisms in brackish water . . . . .	39
a) Reduction of calcareous skeletons . . . . .	39
b) Meristic reductions and anomalies . . . . .	39
c) Other deviations . . . . .	40
4. Reproductive changes in brackish water . . . . .	42
5. Special ecological features of brackish-water inhabitants . . . . .	46
a) Occurrence at greater depths in brackish water . . . . .	46
b) Changes of biotope on transition from sea to brackish water . . . . .	49
c) Differences of biotope in the range brackish water — fresh water . . . . .	50
III. Brackish water as an area of colonization of fresh-water and marine organisms and specific habitat of brackish-water organisms . . . . .	51
A. Types of brackish-water inhabitants . . . . .	51
B. Holoeyhaline animals and plants . . . . .	57
C. Behaviour of fresh-water animals and plants (limnobionts) towards brackish water . . . . .	62
D. Penetration of marine animals and plants into brackish water . . . . .	87
E. Species confined to brackish water (Hyphalmyrobies) . . . . .	98
a) Halophye species . . . . .	99
b) Regional brackish-water species . . . . .	101
c) Survey of the behaviour of specific brackish-water organisms . . . . .	116
d) Origin of brackish-water species . . . . .	117
IV. The biotopes in brackish water . . . . .	118
A. Phytal zone (plant and animal epibiosis) "Aufwuchs" . . . . .	118
1. Conditions of vegetation . . . . .	118
2. Colonization of the phytal zone . . . . .	125
3. Reef formation . . . . .	125
B. Sandy floors . . . . .	127
C. Unconsolidated sea floor . . . . .	129
D. Plankton . . . . .	132

## VIII

V. Types of brackish water . . . . .	133
A. Brackish-water seas . . . . .	134
1. The Baltic . . . . .	135
a) History . . . . .	135
b) Hydrography . . . . .	137
c) Biology . . . . .	141
2. The Pontocaspian brackish seas . . . . .	143
a) History . . . . .	143
b) Hydrography . . . . .	144
c) Faunal elements in the Pontocaspian brackish seas . . . . .	147
d) Former brackish seas . . . . .	155
B. Lagoons (Strandseen, Haffe, Étangs, Limane, Nör, Noore, Lake-Estuaries) . . . . .	157
C. River mouths (estuaries) . . . . .	168
D. Pools . . . . .	171
E. Interstitial brackish water on the sea shore (coastal ground water) . . . . .	175
References . . . . .	180

## Part II

### Physiology of brackish water (Physiological features of life in brackish water)

By Carl Schlieper

1. Introduction . . . . .	211
2. Salinity ranges and osmotic resistance . . . . .	212
3. Rate of activity and activity changes . . . . .	229
4. Volume and regulation of volume . . . . .	239
5. Osmotic concentration of the internal medium and osmoregulation . . . . .	250
6. Ionic content and ionic regulation . . . . .	264
7. Oxygen requirements and respiration . . . . .	274
8. Permeability of the integument . . . . .	297
9. Effects of temperature and temperature resistance . . . . .	292
10. Ionic effects in balanced and non-balanced brackish water . . . . .	306
11. The food cycle in brackish water . . . . .	316
12. Tables of the ionic composition of sea and brackish water . . . . .	322
References . . . . .	322

## To Part I and II

Subject Index . . . . .	351
Index of Genera . . . . .	353
Author Index . . . . .	365
