Preface.....	V
Figures.....	IX
Tables.....	XV
Abbreviations.....	XVII
Symbols.....	XIX
Abstract.....	XXIII
Kurzfassung.....	XXVII
1 Introduction.....	1
2 Fundamentals and State of the Art.....	3
2.1 Fundamentals of Thermochemistry.....	6
2.2 Operating Principle of Reaction Mechanisms.....	9
2.3 0D/1D Simulation Domain.....	12
2.3.1 1D Fluid Mechanics.....	12
2.3.2 Quasi-Dimensional Combustion Modelling of a Spark-Ignition Engine.....	14
3 Investigation on the Post-Oxidation Effect.....	19
3.1 Reaction Kinetic Investigation.....	20
3.1.1 0D Reaction Kinetics Simulation Setup.....	20
3.1.2 Investigation on Carbon Monoxide and Hydrogen Oxidation.....	23
3.1.3 Reaction Kinetic Investigation on the 0D Cylinder Raw Emissions.....	34
3.2 3D-CFD Simulation Results Evaluation.....	46
3.2.1 Investigation Data Base.....	46
3.2.2 Available Engine Operating Points.....	48
3.2.3 Cylinder Emissions.....	50
3.2.4 Evaluation of Heat Release due to Post-Oxidation Effects.....	51

3.2.5	Evaluation of Emission Oxidation due to Post-Oxidation Effects	61
3.2.6	Development of a Post-Oxidation Evaluation Methodology	68
3.3	Summary and Discussion.....	87
4	Post-Oxidation Model Development.....	91
4.1	Comparison of 3D-CFD and 1D Boundary Conditions	92
4.2	Modelling of Mixing Effects	95
4.3	Modelling of the Oxidation Effects	102
4.3.1	Direct Reaction Mechanism Implementation Approach..	103
4.3.2	Surrogate Reaction Mechanism Approach.....	108
4.4	1D Post-Oxidation Model Validation	127
4.5	1D Post-Oxidation Model Discussion	131
5	Influence of Post-Oxidation Effects on Engine Behavior	135
5.1	Low-End Torque Investigations.....	135
5.2	Engine Map Investigation	141
6	Conclusion and Outlook.....	143
	Bibliography	147
