List of Figures	III
1. Introduction	1
2. Mathematical Framework	7
2.1. Bundles	7
2.2. Jet Bundles	9
2.3. Evolution Equations	13
2.4. Formal Change of Hamiltonian Functionals	14
2.4.1. Hamiltonian Densities	14
2.4.2. Miscellaneous Items	16
2.4.3. Decomposition of the Formal Change of Functionals	18
2.5. Dirac Structures	22
2.6. Functional Analytic Tools	23
3. System Representations for Infinite-Dimensional Port-Hamiltonian Systems	25
3.1. Port-Hamiltonian Systems based on Differential Geometry	26
3.1.1. Lumped-Parameter Port-Hamiltonian Systems	27
3.1.2. Distributed-Parameter Port-Hamiltonian Systems I	28
3.1.3. Distributed-Parameter Port-Hamiltonian Systems II	47
3.2. Port-Hamiltonian Systems based on Stokes-Dirac Structures	64
3.2.1. Structural Preliminaries	64
3.2.2. System Representation	66
3.3. Conclusion	70
4. Contributions to the Energy-Based Control of Infinite-Dimensional Port-Hamiltonian Systems	71
4.1. Controller Design for Boundary-Actuated Systems	72
4.1.1. Casimir Control	72
4.1.2. Energy-Balancing Control	82
4.2. Casimir-based Controller Design for In-Domain Actuated Systems	87
4.2.1. Controller Design within the Jet-Bundle Approach	88
4.2.2. Controller Design within the Stokes-Dirac Scenario	96
4.3. Conclusion	101
5. Observer Design based on Port-Hamiltonian Formulations	103
5.1. Observer Design for Boundary Measurements	104

5.2. Observer Design with In-Domain Correction Terms	114
5.2.1. Observer Design within the Jet-Bundle Approach	115
5.2.2. Observer Design within the Stokes-Dirac Scenario	126
5.3. Conclusion	129
6. Energy-Based Observer Design for a Single Mast Stacker Crane	131
6.1. Equations of Motion	133
6.2. Energy-Based Observer Design	134
6.2.1. Observer Design	135
6.2.2. Stability Analysis of the Observer Error	139
6.2.3. Comparison with Measurement Results	143
6.3. Observer Design within the Stokes-Dirac Scenario	144
6.4. Conclusion and Outlook	149
7. Concluding Remarks and Outlook	151
A. Appendix	153
A.1. Detailed Proofs and Computations	153
A.1.1. Determination of the Formal Adjoint of certain Differential Oper- ators	153
A.1.2. Stability Analysis of the Observer Error of a SMC	157
A.2. Miscellaneous Control Examples	161
A.2.1. Boundary Control of Nonlinear Port-Hamiltonian Systems with One-dimensional Spatial Domain	161
A.2.2. Energy-Based Control of In-domain Actuated Systems with One- Dimensional Spatial Domain	163
Bibliography	165
