List of Figures	ix
List of Tables	x
List of Symbols	xi
List of Acronyms	xix
1 Introduction	1
2 Yield Curve Shapes of Vasicek Interest Rate Models and Measure Transformations	5
2.1 Definitions and Notations	6
2.2 Empirical Facts on the Frequency of Yield Curve Shapes	7
2.3 Yield Curve Shapes in Vasicek Models	9
2.3.1 The One-Factor Vasicek Model	10
2.3.2 The Two-Factor Vasicek Model	20
2.4 Measure Change and Yield Curve Shapes	34
2.4.1 Pricing Measure, Physical Measure, and their Use in Simulation	35
2.4.2 Evolution of the Short Rate and Yield Curves under the Real-World Measure in the One-Factor Vasicek Model	35
2.4.3 The Choice of the Real-World Measure $\mathbb{P}$	37
2.5 Conclusion	41
3 Multi-Step Yield Curve Forecasting Using Machine Learning	43
3.1 Literature Review	44
3.2 Setup and Objective	45
3.2.1 Forecasting Models	46
3.2.2 Forecasting Strategies	50
3.2.3 Selection Procedures	52
3.3 Approach	55
3.3.1 Models under Consideration	55
3.3.2 Hyperparameter Optimization	56
3.3.3 Performance Measures	60
3.3.4 Selection Procedure	61
3.4 Forecasting the European Yield Curve	61
3.4.1 Yield Curve Data	62

3.4.2	Evaluation	64
3.5	Conclusion	68
4	Chance-Risk Classification of a Portfolio consisting of State-Subsidized Pension Products and its Impact on Customer Consulting	71
4.1	Classification of State-Subsidized Pension Products	72
4.1.1	The Classification Algorithm	72
4.1.2	Chance-Risk Class Boundaries	74
4.2	Properties of the Chance and Risk Parameters	77
4.3	Chance-Risk Class of a Portfolio and the Consequences for Customer Consulting	81
4.3.1	Diversification Effect	83
4.3.2	Portfolio of Two New Pension Products	88
4.3.3	Portfolio of an Existing and New Pension Product	94
4.4	Chance-Risk Class of a Pension Product over the Contract Term	105
4.5	Conclusion	112
	Appendices	115
	Bibliography	122
